**How Do You Get Clinicians Involved in Quality Improvement?** Tom Ling, 2010 **Leadership by Example** Institute of Medicine, Committee on Enhancing Federal Healthcare Quality Programs, 2003-06-21. The federal government operates six major health care programs that serve nearly 100 million Americans. Collectively, these programs significantly influence how health care is provided by the private sector. Leadership by Example explores how the federal government can leverage its unique position as regulator, purchaser, provider and research sponsor to improve care not only in these six programs but also throughout the nation's health care system. The book describes the federal programs and the populations they serve: Medicare, elderly Medicaid, low income SCHIP, children, VHA, veterans, TRICARE, individuals in the military and their dependents, and IHS, native Americans. It then examines the steps each program takes to assure and improve safety and quality of care. The Institute of Medicine proposes a national quality enhancement strategy focused on performance measurement of clinical quality and patient perceptions of care. The discussion on which this book focuses includes recommendations for developing and pilot testing performance measures, creating an information infrastructure for comparing performance and disseminating results, and more. Leadership by Example also includes a proposed research agenda to support quality enhancement.
