Health And Society In Aotearoa New Zealand:

Health and Society in Aotearoa New Zealand Peter Davis, Kevin Dew, 1999 This book offers fascinating insights into issues of public health and the health care system in New Zealand Drawing on a number of significant studies it provides a comprehensive overview of how the New Zealand health care system has evolved analyses recent developments and considers possible new directions in public health *Health and Society in Aotearoa New Zealand* Kevin Dew, Peter Davis, 2004 Health and Society in Aotearoa New Zealand provides an up to date and comprehensive overview of how the New Zealand health care system operates This book considers the frameworks social structures cultural patterns and policy initiatives that influence the health and delivery of health care to New Zealanders **The Palgrave Handbook of Social Theory in Health, Illness and Medicine** F. Collyer, 2015-02-12 This wide reaching handbook offers a new perspective on the sociology of health illness and medicine by stressing the importance of social theory Examining a range of classic and contemporary female and male theorists from across the globe it explores various issues including chronic illness counselling and the rising problems of obesity *Continuing the Journey to Reposition Culture and Cultural Context in Evaluation Theory and Practice* Stafford Hood, Rodney Hopson, Henry Frierson, 2014-12-01 Racial ethnic linguistic and cultural diversity has become of global importance in places where many never would have imagined Increasing diversity in the U S Europe Africa New Zealand and Asia strongly suggests that a homogeneity based focus is rapidly becoming an historical artifact Therefore culturally responsive evaluation CRE should no longer be viewed as a luxury or an option in our work as evaluators The continued amplification of racial ethnic linguistic and cultural diversity and awareness among the populations of the U S and other western nations insists that social science researchers and evaluators inextricably engage culturally responsive approaches in their work It is unacceptable for most mainstream university evaluation programs philanthropic agencies training institutes sponsored by federal agencies professional associations and other entities to promote professional evaluation practices that do not attend to CRE Our global demographics are a reality that can be appropriately described and studied within the context of complexity theory and theory of change e g Stewart 1991 Battram 1999 And this perspective requires a distinct shift from simple linear cause effect models and reductionist thinking to include more holistic and culturally responsive approaches The development of policy that is meaningfully responsive to the needs of traditionally disenfranchised stakeholders and that also optimizes the use of limited resources human natural and financial is an extremely complex process Fortunately we are presently witnessing developments in methods instruments and statistical techniques that are mixed methods in their paradigm designs and likely to be more effective in informing policymaking and decision making Culturally responsive evaluation is one such phenomenon that positions itself to be relevant in the context of dynamic international and national settings where policy and program decisions take place One example of a response to address this dynamic and need is the newly established Center for Culturally Responsive Evaluation and Assessment CREA in

the College of Education at the University of Illinois at Urbana Champaign CREA is an outgrowth of the collective work and commitments of a global community of scholars and practitioners who have contributed chapters to this edited volume It is an international and interdisciplinary evaluation center that is grounded in the need for designing and conducting evaluations and assessments that embody cognitive cultural and interdisciplinary diversity so as to be actively responsive to culturally diverse communities and their aspirations The Center's purpose is to address questions issues theories and practices related to CRE and culturally responsive educational assessment Therefore CREA can serve as a vehicle for our continuing discourse on culture and cultural context in evaluation and also as a point of dissemination for not only the work that is included in this edited volume but for the subsequent work it will encourage

Evidence-Based Healthcare in Context Jon Adams, 2016-12-05 With new methods of treatment standardisation resulting in various benefits for patient outcomes evidence based medicine and evidence based practice have emerged as defining features of western healthcare provision in recent years Most health professions are now adopting some form of evidence based framework for clinical training and practice However the rise of evidence based healthcare has drawn sustained criticism regarding the limits of trial based evidence the reductive character of epidemiological study designs and the potential for an erosion of the importance of lay perspectives and clinical judgement Evidence Based Healthcare in Context introduces readers to the social cultural and historical underpinnings of evidence in healthcare critically examining questions about what constitutes evidence and effectiveness from perspectives outside medicine including those of patients complementary medicine and midwifery It focuses on the application of contemporary theoretical debates around the nature of medical and health knowledge providing readers with a series of critical analyses of the production application and translation of evidence in a range of healthcare contexts Featuring cutting edge work from leading social scientists in the UK US Canada Norway Australia and New Zealand this volume draws on the latest empirical research to provide a thorough critical overview of this important field of health research
