Health Myths Exposed Shane Ellison, 2004-11 Florence Henderson city bred concert pianist and Tom Martin raised on a farm in Pennsylvania a professional soldier fall in love at first sight The story chronicles the day to day life of this unlikely couple and their growing family in the 1920 s and 30s and follows them from Tom s posting near Baltimore to his training at Fort Leavenworth and his assignments as instructor at West Point and Assistant Military Attach at Paris Tom and his fellow officers try to hold together an army gutted by their country s optimism that there will never be another war while from his vantage point in Paris Tom watches Adolph Hitler prepare for war *Screening Sandy Hook* Deanna Spingola, 2015-02-03 Most parents would never consider dispensing deadly addictive street drugs to their children but if a trusted physician writes a prescription for an FDA approved schedule 2 medication for their two year old based on some questionable mental health screening those unwary parents do not question or object Despite side effect warnings regularly revealed during TV ads parents frequently fail to take those warnings seriously perhaps presuming that the side effects are happenstance or rarely occur Over the decades because organized psychiatry represented by the American Psychiatric Association APA convened numerous consensus panels that designed hundreds of non biologically based disorders for its Diagnostic and Statistical Manual of Mental Disorders DSM especially suitable for the pill for every ill pharmaceutical industry that conceivably already had many profitable solutions for the disorders in the pre production process The consequences have been disastrous with no discernable end in sight some people taking prescription drugs or withdrawing from them have perpetrated school mall and public shootings That is in addition to thousands of suicides that the public never hears about unless the victim is a well known public figure like Robin Williams Just the military related suicide rate is 8 000 per year untold numbers of these are the result of the psych drug cocktails doled out by psychiatrists working for the VA The government is big pharma s largest customer In addition to the homicides and suicides irreversible brain damage results from drug remedies to temporary problems that might have been easily resolved through compassionate interaction and talk therapy Despite the claims that drugs were not a factor in the Sandy Hook mass murders certain circumstances provide a different picture Adam Lanza always a unique individual changed from being a geeky weird kid to being a mass murderer not of people his own age but of beautiful vulnerable children feeling secure in their classrooms in a sleepy bedroom community in Connecticut **The Dangerous Sex** Hoffman R Hays, 2023-07-07 First published in 1966 *The Dangerous Sex* shows how the irrational concept of the dangerous sex evolved and how it was and is used by man to maintain his dominance He examines sexual practices and beliefs marriage customs and rituals and social behaviour in every society and every age from pre historic times to the present day The result is a revealing picture of the deep seated male hostility that generates the way of the sexes and has fed it throughout human history It is also a blazing indictment of this ingrained psycho social pattern as it unconsciously destroys and disrupts huge areas of human happiness In this enquiry into misogyny H R Hays suggests that men must face their own

compulsions before a true and balanced relation between the sexes is achieved This book therefore throws a new light on the problems of feminism the feminine mystique and the whole controversy concerning the place of women in society and will be of interest to students of literature gender studies anthropology and psychology **The Psychosocial Aspects of a Deadly**

Heart Health J Shah, 2019-09-11 In the absence of good trustworthy information patients are guided mostly by their fear instincts when diagnosed with heart disease With the misperception that more is better they all too often end up agreeing to undergo every test and treatment recommendation of their harried healthcare provider who could well be influenced by accepted norms cognitive biases medicolegal concerns or

economic considerations All this leads to gross overuse of cardiac procedures even when the risks of test and treatment can be worse than the disease itself In this book Dr J Shah explains the various cardiac tests and treatments including situations in which they are critical others in which they are reasonable and yet others in which they could be unnecessary and even harmful Using real life stories he helps readers cultivate a better understanding of heart disease and correct the myths that have guided and misguided patients for years He teaches the reader to become a more informed consumer of cardiac care and to make better decisions based on their individual needs and the latest scientific evidence Congressional Record United States. programs are the foundation of conventional thinking and treatment for people with addictive behaviors But are they truly the best Here Tony Bevacqua explains why these one size fits all approaches are not appropriate for everyone since each person is a unique human being This book takes a humanistic perspective that offers guidance for sufferers their families and friends practitioners and anyone interested in understanding the nature of addictive behaviors What do we know about addictive behavior and mental health Bevacqua maintains our common perceptions are loaded with outdated emotionally charged and deficit based vocabulary Words like addiction addict alcoholic denial recovery clean and others have become absorbed into our vocabulary but conjure up the worst case descriptions of undesirable behavior These labels are generalized to all behaviors and to all people regardless of the details of their specific circumstances By rethinking and changing the language new learning can take place and new approaches to treatment can emerge While biology may play a role in addiction the author argues that the disease model strips sufferers of their ability to see their issues as within their control to address Understanding the role of learning and behavior allows people to redefine addiction in terms of their own personal circumstances allowing that the brain is an organ of social adaptation and is constantly able to wire and rewire itself through enriched environments and new learning Bevacqua proposes a language that also supports an individual with kindness compassion and empathy and suggests ways in which this new perspective and approach can help individuals improve the quality of their thinking which will improve the quality of their behavior
