## SUMMARY

*As part of our on-going efforts to formulate an alternative paradigm for health promotion research, we discuss an approach that we have called a 'critical social science perspective' (CSSP). This perspective consists of a set of 'reflective' questions concerning the explicit assumptions and ideology underlying the research process, and the role of power, contradiction and dialectical relationships in theory and research practice. The paper briefly outlines key features of a CSSP and models its application*

*to health promotion research by examining why and how smoking among young girls has emerged as a research issue. We illustrate how the 'problem' of young girls smoking has been constructed in terms of epidemiological evidence, scientific imperative, flawed strategies, feasibility, symbolic appeal, vested interests and resistance. A CSSP reveals the socio-political construction of research problems. The paper reflects on the implications of adopting such a stance to research.*

*Key words:* critical social science perspective; health promotion; research

## INTRODUCTION

The 1993 Annual Health Promotion Research Conference in Canada ended with a call for the development of a solid scientific base for health promotion practice and policy, and for rigorous research and evaluation. However, as researchers, we have felt increasingly doubtful whether the research envisaged in this appeal—including research in both positivist and constructivist traditions—is adequate for the 'new' health promotion (Eakin and Maclean, 1992; Poland, 1992; Robertson and Minkler, 1994), particularly its focus on reducing inequities in access to health through addressing the determinants of health (Labonte and Robertson, 1994). We also sense that many practitioners perceive a disjuncture

between research knowledge and their real-life experiences with health promotion practice.

Much current research presumes that science is a relatively neutral and non-ideological instrument for discovering 'reality'. Although this notion of science has been questioned for two decades or more in other fields, such as philosophy (Kuhn, 1970; Longian, 1990), it still appears to be the predominant perspective in health promotion. We propose that an alternative approach to research is needed if researchers are to produce knowledge that can assist in bringing about the kinds of changes to which the health promotion movement aspires.

In recent years, some authors have sought to develop an appropriate theoretical framework for health promotion (see, for example, Caplan, 1993), while others have critically examined the new health promotion (see, for example, Grace, 1991; Stevenson, and Burke, 1992; Labonte, 1994; Robertson and Minkler, 1994), and health

Poststructuralism Citizenship and Social Policy shows how poststructuralist ideas can be usefully applied in the areas of welfare health education and science and technology policy making particular reference to the theme of citizenship The impact of poststructuralism on thinking in the social sciences and humanities over the last decade has been profound However to date there has been little systematic analysis of the implications of poststructuralism for the critical analysis of social policy Poststructuralism Citizenship and Social Policy will provide essential reading for students and researchers working in the areas of welfare studies the sociology of health and medicine political studies social work social administration and education

**Bridging Occupational, Organizational and Public Health** Georg F. Bauer, Oliver Hämmig, 2013-10-11 In our complex fast changing society health is strongly influenced by the continuously changing interactions between organisations and their employees Three major fields contribute to health oriented improvements of these interactions occupational health organizational health and public health As currently only partial links exist amongst these fields the book aims to explore potential synergies more systematically Considering the high mental and social demands in a service and knowledge sector economy the first part of the book focuses on work related psychosocial factors As a large proportion of inequalities in health in developed countries can be explained by inequalities in working conditions those psychosocial factors with a particularly high public health impact are highlighted As addressing these psychosocial factors requires to involve the organization as the key change agent the second part covers approaches to improve public health through organizational level health interventions The last section takes a look into the future of occupational organizational and public health what are the future challenges regarding occupational health and how can they be tackled within and beyond the organizational level Overall this integrating book will help to broaden the evidence base legitimacy and efficacy of occupational and organizational level health interventions and thus increase their public health impact

Person, Society and Value Paulina Taboada, K.F. Cuddeback, P. Donohue-White, 2013-03-14 Besides offering a critical analysis of the WHO definition and a review of both ancient and contemporary conceptions of health the cooperative effort of physicians and philosophers presented in this book works through the challenges which any definition of health faces if it is to be both truly personalist and at the same time operational The overall purpose of this book is to capture the essentials of human health and to propose the outlines for a personalist understanding of this concept i.e. a conception that does justice to the personal nature of human beings by introducing dimensions that are essential to personal life and well being such as the realms of rationality affectivity and freedom the realms of meaning values morality and spirituality the realms of social and interpersonal relations

**Health and Exclusion** David Banks, Michael Purdy, 2005-08-08 Health and Exclusion is a pioneering examination of those policies and practices of exclusion currently experienced by health customers in the UK Chapters document examples of exclusion in a number of controversial areas including the impact of poverty on the health of

children exclusion in maternity care exclusion of those with mental health problems exclusion of the elderly in health care the silenced voice of the patient barriers to recruitment and advancement within the health professions The authors challenge whether New Labour policies sufficiently address the inequalities in health experienced by some sectors of society Moreover they suggest that health professionals at times actively contribute to exclusion and suggest strategies and practices to combat marginalisation and resist exclusion *Lifestyle in Medicine* Emily Hansen, Gary Easthope, 2007-01-24 In Western societies lifestyle as an explanation for health and illness has become increasingly popular *Lifestyle in Medicine* explores the ambiguity of the term lifestyle and the way it is conceived and applied within medicine Based on real doctor patient consultations and in depth interviews with doctors the book discusses the history behind current medical use of lifestyle the variable usage of the lifestyle concept in different medical settings critical writings and recent shifts in sociological thinking about lifestyle public and government concerns about unhealthy lifestyles the ways in which health is discussed doctor to patient Evidence based in its approach this book uses original research to highlight this topical issue and provides professional and lay perspectives on health and illness It is essential reading for students and academics of medical sociology health and allied health studies and anyone interested in health and society **Potentiating Health and the Crisis of the Immune System** S. Fulder, A. Mizrahi, N. Sheinman, 2013-06-29 With all the enormous resources that are invested in medicine it is sometimes a mystery why there is so much sickness still in evidence Our life span though higher than at any time in history has now leveled off and has not significantly increased in the last two generations There is a one third increase in long term illness in the last 20 years and a 44% increase in cancer incidence which are not related to demographic issues In some modern countries the level of morbidity defined as days off work because of sickness has increased by two thirds in this time Despite 1 trillion spent on cancer research in 20 years the War On Cancer has recently been pronounced a complete failure by the u s President s Cancer Panel Evidently we still have a long way to go The goal of Health for All by the Year 2000 as the World Health Organization has put it is another forgotten dream As ever the answer will be found in breaking out of the old philosophical patterns and discovering the new as yet unacceptable concepts The problems of medicine today require a Kuhnian breakthrough into new paradigms and new ways of thinking And these new ways will not be mere variations of the old but radical departures This book and the conference upon which it was based is part of a search for these new pathways **Canadian Journal of Public Health**, 1995 **Children and Families in Health and Illness** Marion Broome, 1998-03-09 Written and edited by leading pediatric and family nurse researchers this book provides a synthesis of the research literature in nursing and health promotion of children pediatric acute and chronic conditions and children and families in the health care system *Children and Families in Health and Illness* will prove an excellent shelf reference for researchers and a thought provoking read for advanced level practitioner in child or family nursing *Nutrition Through the Life Cycle* Prakash Shetty, 2007-10-31 Nutrition is viewed traditionally as the specific

dietary requirements of different age groups without exploring diet in the context of a life long contributory factor to well being Nutrition Through the Life Cycle summarises what is known about the relationship between diet and health at different points in the life cycle and the nutritional requirements of individuals of different ages Nutrition policy and health promotion are discussed together with how dietary interventions can provide long term benefits to individuals and populations Also covered are the major dietary challenges that exist in modern society including the rise in incidence of obesity in both children and adolescents anaemia in children and adolescents and diet related cancers This book is published in association with Leatherhead Food International

**Handbook of Gender, Culture, and Health** Richard M. Eisler, Michel Hersen, 2012-10-02 This Handbook illustrates how gender ethnicity age and even sexual orientation and understanding influence the health practices and risk factors for health problems in diverse groups of people Contributions from leading researchers in psychology health and epidemiology provide an interdisciplinary approach to the topic In addition to epidemiological issues this book discusses the view that public health policy and programs must be individually tailored to specific groups to maximize their effectiveness Part I deals with the effects of stress on the health of diverse populations Part II of the book raises the issues of varied health risk factors and health practices for different cultural and socioeconomic groups Part III examines specific health problems and issues common to women and men of varying ethnicity The last section deals with the health problems of specific populations Featuring the latest information for understanding how diverse groups of people perceive and respond to issues relating to their health this Handbook should prove to be a valuable resource to a wide range of practitioners and researchers in psychology medicine psychiatry sociology social work nursing exercise science and counseling
