Heart Of Altruism Perceptions Of A Common Humanity:

The Heart of Altruism Kristen Renwick Monroe, 1998-07-21 Is all human behavior based on self interest Many social and biological theories would argue so but such a perspective does not explain the many truly heroic acts committed by people willing to risk their lives to help others Kristen Monroe boldly lays the groundwork for a social theory toward altruism by examining the experiences described by altruists themselves

The Heart Of Altruism ,2001 Is all human behavior based on self interest Many social and biological theories would argue so but such a perspective does not explain the many truly heroic acts committed by people willing to risk their lives to help others In The Heart of Altruism Kristen Renwick Monroe boldly lays the groundwork for a social theory receptive to altruism by examining the experiences described by altruists themselves from Otto a German businessman who rescued over a hundred Jews in Nazi Germany to Lucille a newspaper poetry editor who armed with her cane saved a young girl who was being raped Monroe s honest and moving interviews with these little known heroes enable her to explore the causes of altruism and the differences between altruists and other people By delineating an overarching perspective of humanity shared by altruists Monroe demonstrates how social theories may begin to account for altruism and debunks the notions of scientific inevitability that stem from an overemphasis on self interest As Monroe has discovered the financial and religious backgrounds of altruists vary greatly as do their views on issues such as welfare civil rights and morality Altruists do however share a certain way of looking at the world where the rest of us see a stranger altruists see a fellow human being It is this perspective that many social theories overlook Monroe restores altruism to a general theory of ethical political behavior She argues that to understand what makes one person act out of concern for others and not the self we need to ask how that individual s perspective sets the range of options he or she finds available

The Heart of Altruism Kristen R. Monroe, 1996 Is all human behavior based on self interest Many social and biological theories would argue so but such a perspective does not explain the many truly heroic acts committed by people willing to risk their lives to help others In The Heart of Altruism Kristen Renwick Monroe boldly lays the groundwork for a social theory receptive to altruism by examining the experiences described by altruists themselves from Otto a German businessman who rescued over a hundred Jews in Nazi Germany to Lucille a newspaper poetry editor who armed with her cane saved a young girl who was being raped Monroe s honest and moving interviews with these little known heroes enable her to explore the causes of altruism and the differences between altruists and other people By delineating an overarching perspective of humanity shared by altruists Monroe demonstrates how social theories may begin to account for altruism and debunks the notions of scientific inevitability that stem from an overemphasis on self interest As Monroe has discovered the financial and religious backgrounds of altruists vary greatly as do their views on issues such as welfare civil rights and morality Altruists do however share a certain way of looking at the world where the rest of us see a stranger altruists see a fellow human being It is this perspective that many social theories overlook Monroe restores altruism to a general theory of

ethical political behavior She argues that to understand what makes one person act out of concern for others and not the self we need to ask how that individual's perspective sets the range of options he or she finds available *The Heart of Altruism* Prof Kristen Renwick Monroe, 1996-01-01 Is all human behavior based on self interest Many social and biological theories would argue so but such a perspective does not explain the many truly heroic acts committed by people willing to risk their lives to help others Kristen Monroe boldly lays the groundwork for a social theory toward altruism by examining the experiences described by altruists themselves **Altruism in International Law** Jason Rudall, 2021-08-12 Much emphasis has been placed on the role that individualism self interest and reciprocity have in the formation and function of international legal rules Rarely has attention been given to the presence of altruism in legal systems let alone the international legal system In a study that is the first of its kind in international legal scholarship *Altruism in International Law* explores and analyses the emergence of altruistic legal relationships between states and people in other countries The book also argues that the impulse for the emergence of these relationships is a cosmopolitan ideology which co exists with a persisting statist ideology among the major actors in international law making processes Further still the book reveals that individualistic legal norms are more often manifested as strict rules while altruistic legal norms find expression in flexible standards This suggests that there is a connection between substance and form in international law **The Global Politics of Human Rights** Miguelángel Verde Garrido, Philani Mthembu, Adam S. Wilkins, 2020-07-13 Now available online *The Global Politics of Human Rights Bringing the Universal Declaration of Human Rights UDHR into the 21st Century 2020* a publication from the Berlin Forum on Global Politics BFGP in collaboration with the Institute for Global Dialogue and the RECLAIM Universal Human Rights Initiative The Universal Declaration of Human Rights UDHR even more than 70 years after its adoption continues to provide the foundation for national and international laws concerned with human dignity and the universal and inalienable freedoms and claims of every person A living document the core principles enshrined in the UDHR are as relevant as ever to better the human condition and societies worldwide This collected volume is an open knowledge publication freely accessible under a Creative Commons license which includes 24 articles written by numerous well informed stakeholders from across the globe who include human rights scholars and practitioners experts and activists researchers and members of civil society and non governmental organizations It addresses particular aspects of the history of the UDHR the expansion and implementation of its Articles its role in the prevention of violence and its potential to address a changing world As a whole the publication serves two goals on the one hand it clarifies why the UDHR continues to be strongly relevant to the contemporary values dynamics and conditions of human rights in the 21st century and on the other hand it illustrates how the UDHR and its Articles can be further adapted and implemented to uphold and safeguard human rights even in times when global politics often follow the siren songs of populism authoritarianism nativism and extremism Means, Ends and Medical Care H.G. Wright, 2007-06-30 In this remarkable book Gary Wright brings his thirty years of experience as a

physician in pediatric and family medicine together with his Ph D in philosophy to address the important problem of the nature of good medical reasoning His intimate experiential knowledge of the founding assumptions of managed health care in America today is abundantly evident in his powerful critique of the overly simplistic models of medical judgment that ground most of our health programs Writing with exceptional clarity heart felt compassion for the physical and emotional suffering of patients and deep philosophical insight into the nature of human cognition Wright uses the conceptual tools of recent cognitive science to analyze and critique some of the most basic underlying conceptions of contemporary medical care To make it clear why we desperately need a richer more nuanced account of medical reasoning Wright gives a brilliant analysis of the complex internal structure of our concepts of health and disease showing that our present models are wholly incapable of dealing with the realities of actual human disease He then shows the error of assuming that we always know in advance what the medical and moral ends are for any medical situation This leads to a radical questioning of so called rational actor or economic models of rationality that are popular in medicine today However Wright s project is not merely critical More constructively he draws extensively on empirical research coming out of the cognitive sciences concerning the nature of concepts reasoning and judgment and he then appropriates this research into a broader pragmatist philosophical framework developed by the American philosopher John Dewey Wright finds in Dewey s theories of mind thought and experience a comprehensive account of human thinking that adequately captures the complexity of actual human conceptualization and reasoning At the heart of this new view lies an acknowledgment of the central role of imagination and values in all of our thinking He shows how we actually make sense of our experience by employing cognitive prototypes metaphorically defined concepts radially structured categories and other processes of imaginative reflection and evaluation The result of Wright s alternative view of mind and medical judgment is a practically useful model of medical reasoning that although not specifiable by a set of fixed rules can yet give realistic guidance for medical decisions It is a sensitive model that each of us would want our own physicians to adopt Prof Mark Johnson Department of Philosophy University of Oregon This is one of the best books I have read that addresses Dewey s method of intelligence in the context of practical including clinical decision making I loved it Prof Griffin Trotter Center for Health Care Ethics Saint Louis University USA **Doing Good**

Resisting Injustice and the Feminist Ethics of Care in the Age of Obama David A.J. Richards, 2014-02-05 David A J Richards s Resisting Injustice and The Feminist Ethics of Care in The Age of Obama Suddenly All The Truth Was Coming Out builds on his and Carol Gilligan s The Deepening Darkness to examine the roots of the resistance movements of the 1960s the political psychology behind contemporary conservatism and President Obama s present day appeal as well as the reasons for the reactionary politics against him Richards begins by laying out the basics of the ethics of care and proposing an alternative basis for ethics relationality which is based in convergent findings in infant research neuroscience and evolutionary psychology He critically analyzes patriarchal politics and states that they are rooted in a reactionary psychology that attacks human relationality and ethics From there the book examines the 1960s resistance movements and argues that they were fundamentally oriented around challenging patriarchy Richards asserts that the reactionary politics in America from the 1960s to the present are in service of an American patriarchy threatened by the resistance movements ranging from the 1960s civil rights movements to the present gay rights movement Reactionary politics intend to marginalize and even

reverse the ethical achievements accomplished by resistance movements creating in effect a system of patriarchy hiding in democracy Richards consequently argues that Obama's appeal is connected to his challenge to this system of patriarchy and will examine both Obama's appeal and the reactions against him in light of the 2012 presidential election This book positions recent American political development in a broad analysis of the role of patriarchy in human oppression throughout history and argues that a feminist based ethics of care is necessary to form a more humane and inclusive democratic politics The Problematics of Moral and Legal Theory Richard A. Posner, 2009-06-01 Ambitious legal thinkers have become mesmerized by moral philosophy believing that great figures in the philosophical tradition hold the keys to understanding and improving law and justice and even to resolving the most contentious issues of constitutional law They are wrong contends Richard Posner in this book Posner characterizes the current preoccupation with moral and constitutional theory as the latest form of legal mystification an evasion of the real need of American law which is for a greater understanding of the social economic and political facts out of which great legal controversies arise In pursuit of that understanding Posner advocates a rebuilding of the law on the pragmatic basis of open minded and systematic empirical inquiry and the rejection of cant and nostalgia the true professionalism foreseen by Oliver Wendell Holmes a century ago A bracing book that pulls no punches and leaves no pieties unpunctured or sacred cows unkicked The Problematics of Moral and Legal Theory offers a sweeping tour of the current scene in legal studies and a hopeful prospect for its future Emotions and Mass Atrocity Thomas Brudholm, Johannes Lang, 2018-03-22 The study of genocide and mass atrocity abounds with references to emotions fear anger horror shame and hatred Yet we don't understand enough about how ordinary emotions behave in such extreme contexts Emotions are not merely subjective and interpersonal phenomena they are also powerful social and political forces deeply involved in the history of mass violence Drawing on recent insights from philosophy psychology history and the social sciences this volume examines the emotions of perpetrators victims and bystanders Editors Thomas Brudholm and Johannes Lang have brought together an interdisciplinary group of prominent scholars to provide an in depth analysis of the nature value and role of emotions as they relate to the causes and dynamics of mass atrocities The result is a new perspective on the social political and moral dimensions of emotions in the history of collective violence and its aftermath **Intersections of Religion and Migration** Jennifer B.
