Secret Agents Madeline Drexler, 2002-02-23 So you think modern medicine has the whole virus game figured out Think again And it s not even a question of if we ll be hit by some new and deadly disease it s when The war on germs is being fought on many fronts from the skirmishes with disease carrying mosquitoes that cross oceans hidden away in airline wheel wells to the high profile battle against terrorists wielding deadly bioweapons Today s bold headlines would have us believe that the biggest threat comes from bioterrorism But don t underestimate Mother Nature perhaps the most savage bioterrorist of all Assisted by the increasing ease with which people and the germs they carry move across international borders she s an effective force to be reckoned with a key player on this battlefield As author Madeline Drexler makes clear we d do best not to ignore her Human beings and the pathogens that attack them are crossing paths more and more frequently particularly as modern life grows increasingly complex Whatever the infectious agent may be whether it s pandemic flu foodborne illness a debilitating disease carried far and wide by biting insects or some new microbial horror we have yet to detect keen surveillance and rapid response are really the only weapons in our arsenal Secret Agents looks at today s new and emerging infections those that have increased in attack rate or geographic range or threaten to do so and tells the stories of scientists racing to catch up with invisible adversaries superior in both speed and guile Each chapter focuses on a different threat foodborne pathogens antibiotic resistance animals and insectborne diseases pandemic influenza
