Core Curriculum for Specializing in Intellectual and Developmental Disability Wendy M. Nehring, 2005 The first interdisciplinary text on health issues concerning persons of all ages with intellectual and developmental disabilities designed for the classroom

Essentials of Disease in Wild Animals Gary A. Wobeser, 2013-05-07 The interrelationship between wild animal domestic animals and human health is appreciated now more than ever before This is because of the recognition of the involvement of wild animals in diseases of humans and domestic animals the impact of disease on wildlife management and conservation biology recognition of new forms of environmental contamination and academic interest in disease as an ecological factor This is the first introductory level book about disease in wild animals that deals with basic subjects such as the nature of disease what causes disease how disease is described and measured how diseases spread and persist and the effects of disease on individual animals and populations In contrast to authors of many other veterinary books Gary A Wobeser takes a more general approach to health in wild animals recognizing that disease is one ecological factor among many and that disease can never be considered satisfactorily in isolation Rather than focus on individual causative

agents and their effect on the individual animal the emphasis is on why disease occurred and on the complex interactions that occur among disease agents the environment and host populations Written by a leading researcher in wildlife diseases this book will fill a knowledge gap for those called to work with disease in wild animals who lack experience or training in the general features of disease as they relate to wild animals Veterinarians ecologists wildlife biologists population biologists and public health workers will find this book invaluable **SARS Unmasked** Michael G.
