Forget Me Not The Neuroethical Case Against Memory Manipulation contends that any attempt to directly and intentionally erase episodic memories poses a grave threat to the human condition that cannot be justified within a normative moral calculus Grounding its thesis in four evidential effects namely i MM disintegrates autobiographical memory ii the disintegration of autobiographical memory degenerates emotional rationality iii the degeneration of emotional rationality decays narrative identity and iv the decay of narrative identity disables one to seek identify and act on the good DePergola argues that MM cannot be justified as a morally licit practice insofar as it disables one to seek identify and act on the good A landmark achievement in the field of neuroethics this book is a welcome addition to both the scholarly and professional community in philosophical and clinical bioethics

The complexities of the brain and nervous system make neuroscience an inherently interdisciplinary pursuit one that comprises disparate basic clinical and applied disciplines Behavioral neuroscientists approach the brain and nervous system as instruments of sensation and response cognitive neuroscientists view the same systems as a solitary computer with a focus on representations and processes The Oxford Handbook of Social Neuroscience marks the emergence of a third broad perspective in this field Social neuroscience emphasizes the functions that emerge through the coaction and interaction of conspecifics the neural mechanisms that underlie these functions and the commonality and differences across social species and superorganismal structures With an emphasis on the neural hormonal cellular and genetic mechanisms underlying social behavior social neuroscience places emphasis on the associations and influences between social and biological levels of organization This complex interdisciplinary perspective demands theoretical methodological statistical and inferential rigor to effectively integrate basic clinical and applied perspectives on the nervous system and brain Reflecting the diverse perspectives that make up this field The Oxford Handbook of Social Neuroscience brings together perspectives from across the sciences in one authoritative volume Feelings and Emotions Antony S. R. Manstead, Nico Frijda, Agneta Fischer, 2004-04-05 Publisher Description

Why Love Hurts Eva Illouz, 2013-05-20 Few of us have been spared the agonies of intimate relationships They come in many shapes loving a man or a woman who will not commit to us being heartbroken when we are abandoned by a lover engaging in Sisyphean internet searches coming back lonely from bars parties or blind dates feeling bored in a relationship that is so much less than we had envisaged these are only some of the ways in which the search for love is a difficult and often painful experience Despite the widespread and almost collective character of these experiences our culture insists they are the result of faulty or insufficiently mature psyches For many the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives The purpose of this book is to change our way of thinking about what is wrong in modern relationships The problem is not dysfunctional childhoods or insufficiently self-aware psyches but rather the institutional forces shaping how we love The argument of this book is that the modern romantic

experience is shaped by a fundamental transformation in the ecology and architecture of romantic choice The samples from which men and women choose a partner the modes of evaluating prospective partners the very importance of choice and autonomy and what people imagine to be the spectrum of their choices all these aspects of choice have transformed the very core of the will how we want a partner the sense of worth bestowed by relationships and the organization of desire This book does to love what Marx did to commodities it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors

Complexity and Entrepreneurship Andreas Liening, 2024-07-03 Starting from the question of what systematic peculiarities in the behavior of leaders and entrepreneurs need to be considered this book provides a new theoretical perspective for entrepreneurial analysis evaluation decision making and action Various theories of complex systems such as the theory of self organization synergetics are presented Additionally methodological approaches for the empirical examination of complexity and the resulting consequences in the field of entrepreneurship are discussed Overall it suggests that old models like the Laplacean worldview or Kant's question of what we can know need to be reconsidered This book offers surprising answers particularly revealing new opportunities and possibilities in complex processes like starting a business The second expanded and updated edition strengthens the focus on entrepreneurship as the book's main theme It includes new and current examples from the real economy as well as additional empirical data supporting the model analysis

Forms of Emotion Peta Tait, 2021-11-29 Forms of Emotion analyses how drama theatre and contemporary performance present emotion and its human and nonhuman diversity This book explores the emotions emotional feelings mood and affect which make up a spectrum of emotion to illuminate theatrical knowledge and practice and reflect the distinctions and debates in philosophy neuroscience psychology and other disciplines This study asserts that specific forms of emotion are intentionally unified in drama theatre and performance to convey meaning counteract separation and subversively champion emotional freedom The book progressively shows that the dramatic and theatrical representation of the nonhuman reveals how human dominance is offset by emotional connection with birds animals and the natural environment This book will be of great interest to students and researchers interested in the emotions and affect in dramatic literature theatre studies performance studies psychology and philosophy as well as artists working with emotionally expressive performance

Terrorist Recruitment, Propaganda and Branding Anna Kruglova, 2022-08-05 This book analyses the marketing techniques that terrorist organisations employ to encourage people to adopt their ideology and become devoted supporters The book's central thesis is that due to the development of digital technologies and social media terrorist groups are employing innovative marketing techniques and advertising strategies to foster an emotional connection with their audiences particularly those in younger demographics By conducting thematic and narrative analyses of Islamic State of Iraq and Syria ISIS propagandist magazines as well as looking at the group's online communities the book demonstrates that terrorist groups behave as commercial brands by establishing an emotional connection with their potential

recruits Specifically groups and their potential supporters follow the logic of emotional choice The book emphasizes that while ISIS became the first group that discovered and benefited from the power of marketing it did not have a supernatural power and thus it is possible to find a response to it which is particularly important now The book eventually poses a question about whether terrorism has become the product of marketing in the same way as any mainstream consumer product is and asks what can we do to battle the appeal of marketing savvy terrorist groups This book will be of interest to students of terrorism studies radicalisation and propaganda communication and security studies The Greatness of Humility Joseph J. McInerney, 2016-02-15 The jury is out on the virtue of humility Most people find humility a more attractive character trait in others than its opposites of pride and arrogance Yet many philosophers be they ancient or modern find little value in humility as a virtue For the Aristotelian moral tradition humility is an impediment to greatness Modern philosophers take this sentiment further asserting that humility is a sham virtue that leads to unhappiness and human debasement The Christian intellectual tradition however provides a contrast to these negative appraisals of humility St Augustine of Hippo is an eloquent and robust proponent of humility s value Unlike the thinkers of the classical and modern philosophic traditions Augustine asserts that humility is not only a significant virtue it is the indispensable foundation of human greatness The Greatness of Humility traces how Augustine makes his argument regarding the importance of humility and shows how his position measures up to those of his philosophical rivals Uncertainty, Macroeconomic Stability and the Welfare State Sven Larson, 2019-01-15 This title was first published in 2002 This monograph sets out to model a macroeconomy that is inherently unstable because of qualitative or Keynesian uncertainty By modelling a macroeconomic theory this approach to fixed or sticky prices also investigates the link between uncertainty sticky prices and macro stability by suggesting that such prices improve economic activity rather than impeding it **Your Children Are Listening** Jim Taylor, 2011-06-14 Children become the messages they get the most And as a parent your words attitudes and actions are constantly sending your children messages creating their earliest ideas about themselves others and the world around them Now parenting expert Dr Jim Taylor describes the vital opportunity you have to shape your children even when they may not appear to be listening and guides you to answer this crucial question How can I be sure I m sending the healthiest messages If you consciously send your children the right messages the benefits for them will be profound Your Children Are Listening offers Nine essential messages all children need to hear on love competence security compassion gratitude nature respect responsibility and emotion Why these messages are so important The different conduits through which children receive your messages Message blockers that can prevent them from getting through And fun catchphrases and activities you can use to send these messages every day
