"Happiness" and "Pain" across Languages and Cultures Cliff Goddard, Zhengdao Ye, 2016-07-26 In the fast growing fields of happiness studies and pain research which have attracted scholars from diverse disciplines including psychology philosophy medicine and economics this volume provides a much needed cross linguistic perspective It centres on the question of how much ways of talking and thinking about happiness and pain vary across cultures and seeks to answer this question by empirically examining the core vocabulary pertaining to happiness and pain in many languages and in different religious and cultural traditions The authors not only probe the precise meanings of the expressions in question but also provide extensive cultural contextualization showing how these meanings are truly cultural Methodologically while in full agreement with the view of many social scientists and economists that self reports are the bedrock of happiness research the volume presents a body of evidence highlighting the problem of translation and showing how local concepts of happiness and pain can be understood without an Anglo bias The languages examined include Mandarin Chinese Danish English French German Japanese Koromua a Papua New Guinean language and Latin American Spanish Originally published in *International Journal of Language and Culture* Vol 1 2 2014

scholars from around the globe The Routledge Handbook of Language and Culture provides a vital resource for scholars and students working in this area *Emotions across Cultures* David Konstan, 2022-06-21 It is now recognized that emotions have a history In this book eleven scholars examine a variety of emotions in ancient China and classical Greece in their historical and social context A general introduction presents the major issues in the analysis of emotions across cultures and over time in a given tradition Subsequent chapters consider how specific emotions evolve and change For example whereas for early Chinese thinkers worry was a moral defect it was later celebrated as a sign that one took responsibility for things In ancient Greece hope did not always focus on a positive outcome and in this respect differed from what we call hope Daring not to do or undaring was itself an emotional value in early China While Aristotle regarded the inability to feel anger as servile the Roman Stoic Seneca rejected anger entirely Hatred and revenge were encouraged at one moment in China and repressed at another Ancient Greek responses to tragedy do not map directly onto modern emotional registers and yet are similar to classical Chinese and Indian descriptions There are differences in the very way emotions are conceived This book will speak to anyone interested in the many ways that human beings feel Metaphors of ANGER across Languages: Universality and Variation Zoltan Kövecses, Réka Benczes, Veronika Szelid, 2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context The Routledge Handbook of Language and Emotion Sonya Pritzker, Janina Fenigsen, James Wilce, 2019-12-06 The Routledge Handbook of Language and Emotion offers a variety of critical theoretical and methodological perspectives that interrogate the ways in which ideas about and experiences of emotion are shaped by linguistic encounters and vice versa Taking an interdisciplinary approach which incorporates disciplines such as linguistic anthropology sociolinguistics applied linguistics psychology communication studies education sociology folklore religious studies and literature this book explores and illustrates the relationship between language and emotion in the five key areas of language socialisation culture translation and transformation poetry pragmatics and power the affective body self and emotion communities situates our present day

Reconceptualising Conversion Zeba A. Crook, 2012-08-09 Die Studie nimmt die bisherige Diskussion der Konversion in der Antike neu auf durch eine Verknüpfung von klassischen epigraphischen und biblischen Quellen mit einer sozialwissenschaftlichen Methodologie Der Autor hinterfragt dabei die bisher vorausgesetzte psychologische Kontinuität zwischen antiken und modernen Menschen und bietet statt dessen ein Modell welches an den Denkvoraussetzungen der Antike selbst gebildet wurde Die griechisch-römischen und mediterranen Religionen und Philosophien also auch das hellenistische Judentum und das Christentum orientierten sich an den Modellen von Patronat und Loyalität Das Verständnis der antiken Konversion muss also hier ansetzen In diesem Zusammenhang wird auch die Bekehrung des Paulus neu gedeutet

A Prototype Approach to Hate and Anger in the Hebrew Bible Deena Grant, 2023-06-09 This innovative book applies findings from the field of cognitive linguistics to the study of emotions in the Hebrew Bible The book draws on the prototype approach to conceptual categories to help interpret emotion language in biblical passages Contemporary scholarship has come to recognize that biblical emotion terms do not necessarily possess exact equivalents within our modern lexicons even if some of these terms express or appear to express concepts similar to those conveyed by modern emotion language In particular the book focuses on *sn* and *rh* which are almost always equated in modern English with hate and anger However the ancient Hebrew roots evoke varied and robust emotion scripts that are quite different than their English counterparts We see how the prototype script model may help to expose the unique nuances of *sn* and *rh* and put into profile elements of these emotions that may otherwise go unnoticed Overall the study demonstrates that even though modern emotion terms cannot fully capture the ancient emotional experience our shared use of language to evoke meaning offers us entrance into the emotional world represented in the Hebrew Bible
