Islam and the European Empires David Motadel, 2014-09-04 At the height of the imperial age European powers ruled over most parts of the Islamic world The British

French Russian and Dutch empires each governed more Muslims than any independent Muslim state European officials believed Islam to be of great political significance and were quite cautious when it came to matters of the religious life of their Muslim subjects In the colonies they regularly employed Islamic religious leaders and institutions to bolster imperial rule At the same time the European presence in Muslim lands was confronted by religious resistance movements and Islamic insurgency Across the globe from the West African savanna to the shores of Southeast Asia Muslim rebels called for holy war against non Muslim intruders Islam and the European Empires presents the first comparative account of the engagement of all major European empires with Islam Bringing together fifteen of the world s leading scholars in the field the volume explores a wide array of themes ranging from the accommodation of Islam under imperial rule to Islamic anti colonial resistance A truly global history of empire the volume makes a major contribution not only to our knowledge of the intersection of Islam and imperialism but also more generally to our understanding of religion and power in the modern world

Imperial Inequalities Gurminder K. Bhambra, Julia McClure, 2022-11-29 Imperial Inequalities takes Western European empires and their legacies as the explicit starting point for discussion of issues of taxation and welfare In doing so it addresses the institutional and fiscal processes involved in modes of extraction taxation and the hierarchies of welfare distribution across Europe s global empires The idea of imperial inequalities provides a conceptual frame for thinking about the long standing colonial histories that are responsible at least in part for the shape of present inequalities This wide ranging volume challenges existing historiographical accounts that present states and empires as separate categories Instead it views them as co constitutive units by focusing upon the politics of economic governance across imperial spaces Authors examine the fiscal innovations that enabled European empires to finance their expansion the politics of redistribution that were important to constructing the veneer of legitimacy of taxation and the fiscal mechanisms that were established to ensure that the imperial contours of inequality continued to define the postcolonial world These diverse contributions provide new resources for how we think about issues of taxation and welfare across the longue dur e This book is relevant to United Nations Sustainable Development Goal 10 Reduced inequalities
