Empirical Foundations of Information and Software Science III Jens Rasmussen,Pranas Zunde,1987 **Empirical Foundations of Information and Software Science III** Jens Rasmussen,Pranas Zunde,2012-12-06 The monograph presents the proceedings of the Third Symposium on Empir ical Foundations of Information and Software Sciences EFISS held at the Riso National Laboratory in Roskilde Denmark 23 25 October 1985 The EFISS series of meetings was initiated with the express purpose of explor ing subjects and methods of scientific inquiry of empirical nature which are of common interest to information and software sciences Furthermore these meetings were expected to provide a cross disciplinary forum for discussion of problems and exchange of research results of importance for the design and application of advanced information systems The previous two EFISS symposia took place at the Georgia Institute of Technology in Atlanta Georgia USA The first meeting in 1982 focused on methods of experimental design and measurement techniques in information and software sciences The second meeting was held in 1984 and its main theme was the value of information in prescriptive contexts such as value of information for understanding and implementation of these messages instructions and commands Specific examples of problems of this kind are the value of comments for the enhancement of understanding of computer programs the value of information in assisting and guiding users of on line interactive systems and the value of lexical aids in information retrieval In both symposia contributed papers were considered on any other valid subject of empirical foundations of the said two sciences **Empirical Foundations of Information and Software Science V** Pranas Zunde,D. Hocking,2012-12-06 This is the proceedings of the Sixth Symposium on Empirical Foundations of Information and Software Sciences EFISS which was held in Atlanta Georgia on October 19 21 1988 The purpose of the symposia is to explore subjects and methods of scientific inquiry which are of common interest to information and software sciences and to identify directions of research that would benefit from the mutual interaction of these two disciplines The main theme of the sixth symposium was modeling in information and software engineering with emphasis on methods and tools of modeling The symposium covered topics such as models of individual and organizational users of information systems methods of selecting appropriate types of models for a given type of users and a given type of tasks deriving models from records of system usage modeling system evolution constructing user and task models for adaptive systems and models of system architectures This symposium was sponsored by the School of Information and Computer Science of the Georgia Institute of Technology and by the U S Army Institute for Research in Management Information Communications and Computer Sciences AIRMICS 17le Editors vii CONTENTS 1 I KEYNOTE ADDRESS Empirical Foundations of Information and Software Science IV Jagdish C. Agrawal,Pranas Zunde,2012-12-06 This is the proceedings of the Sixth Symposium on Empirical Foundations of Information and Software Sciences EFISS which was held in Atlanta Georgia on October 19 21 1988 The purpose of the symposia is to explore subjects and methods of scientific inquiry which are of common interest to information and software sciences and to

identify directions of research that would benefit from the mutual interaction of these two disciplines The main theme of the sixth symposium was modeling in information and software engineering with emphasis on methods and tools of modeling The symposium covered topics such as models of individual and organizational users of information systems methods of selecting appropriate types of models for a given type of users and a given type of tasks deriving models from records of system usage modeling system evolution constructing user and task models for adaptive systems and models of system architectures This symposium was sponsored by the School of Information and Computer Science of the Georgia Institute of Technology and by the U S Army Institute for Research in Management Information Communications and Computer Sciences AIRMICS 17le Editors vii CONTENTS 1 I KEYNOTE ADDRESS **A Framework of Software Measurement** Horst Zuse,2013-02-06 No detailed description available for A Framework of Software Measurement *Software Measurement* Reiner Dumke,Alain Abran,2013-11-11 Software developers are faced with the challenge of making software systems and products of ever greater quality and safety while at the same time being faced with the growing pressure of costs reduction in order to gain and maintain competitive advantages As in any scientific and engineering discipline reliable measurement is essential for talking on such a challenge Software measurement is an excellent abstraction mechanism for learning what works and what doesn t Victor Basili Measurement of both software process and products provides a large amount of basic information for the evaluation of the software development processes or the software products themselves Examples of recent successes in software measurement span multiple areas such as evaluation of new development methods and paradigms quality and management improvement programs tool supporting initiatives and company wide measurement programs The German Computer Science Interest GI Group of Software Metrics and the Canadian Interest Group in Software Metrics CIM have attended to these concerns in the recent years Research initiatives were directed initially to the definition of software metrics and then to validation of the software metrics themselves This was followed by more and more investigation into practical applications of software metrics and by critical analysis of the benefits and weaknesses of software measurement programs Key findings in this area of software engineering have been published in some important books such as Dumke and Zuse s Theory and Practice of Software Measurement Ebert and Dumke s Software Metrics in Practice and Lehner Dumke and Abran s Software Metrics **Impirical Foundations of Information and Software Science** Jagdish C. Agrawal,2012-12-06 The purpose of the Second Symposium on Empirical Foundations of Informa tion and Software Science EFISS was in essence the same as that of the First Symposium in this series i e to explore subjects and methods of sci entific inquiry which are of fundamental and common interest to information and software sciences and to map directions of research that will benefit from the mutual interaction of these two fields In fact one of the most important results of the First EFISS Symposium was the conclusion that the commonality of these two sciences is much more than just the commonality of their objects of study namely the study of informative and prescriptive properties of texts in all kinds of sign sys tems such as

natural or artificial languages Rather the most challeng ing problems appear to be in the areas in which both these sciences overlap such as for instance the problem of trade offs between informative and prescriptive uses of texts This problem can be formulated in generic terms as follows given a certain kind of action or activity which has been pre scribed to some agent i e which is required to be implemented or carried out what kind of information should be provided to the agent in what form and how should it be distributed over the contextual structure of the pre scriptive text to enable the agent to carry out the action or activity most effectively and efficiently   Empirical foundations of information and software science : proceedings of ... Soares,2012-07-17 Successful interaction with products tools and technologies depends on usable designs accommodating the needs of potential users and does not require costly training In this context this book is concerned about emerging concepts theories and applications of human factors knowledge focusing on the discovery and understanding of human interactio   *Systems Engineering* Andrew P. Sage,1992-08-07 Addresses some fundamental considerations associated with the engineering of large scale systems The first part deals with systems methodology design and management including a detailed examination of operational and task level system quality assurance through configuration management audits and reviews standards and systems integration The second part discusses a variety of systems design and management approaches particularly those concerned with system effectiveness evaluation and the human role in systems   *Human Machine Symbiosis* Karamjit S. Gill,2012-12-06 There is now a serious discussion taking place about the moment at which human beings will be surpassed and replaced by the machine On the one hand we are designing machines which embed more and more human intelligence but at the same time we are in danger of becoming more and more like machines In these circumstances we all need to consider What can we do What should we do What are the alternatives of doing it This book is about the human centred alternative of designing systems and technologies This alternative is rooted in the European tradition of human centredness which emphasises the symbiosis of human capabilities and machine capacity The human centred tra dition celebrates the diversity of human skill and ingenuity and provides an alternative to the mechanistic

paradigm of one best way the sameness of science and the dream of the exact language This alternative vision has its origin in the founding European human centred movements of the 1970s These include the British movement of Socially Useful Technology the Scandinavian move ment of Democratic Participation and the German movement of Humanisation of Work and Technology The present volume brings together various strands of human centred systems philosophy which span the conceptual richness and cultural diversity of the human centred movements The core ideas of human centredness include human machine symbiosis the tacit dimension of knowl edge the system as a tool rather than a machine dialogue partici pation social shaping and usability *Computer-Based Management of Complex Systems* Peter M. Milling,Erich O.K. Zahn,2012-12-06 Especially during the last decade the systems approach gained wide spread attention and increased influence in the world of academics and business The holistic view of how individual elements interact with ea h other to form an entity not a collection of isolated parts becomes more and more important Whether it is called integration as in Computer Integrated Manufacturing organism in ecological studies or network like the communication network it is the system s idea which opens neVI dimensions for insights applications and development System Dynamics or Industrial Dynamics as it was called during its early years by its founder and mentor M I T s now Professor Emeritus Jay W Forrester pioneered the use of system concepts and computer simulation for the analysis of complex problems in business and management It was applied to study the dynamics of corporations cities national economies and finally the global problems of man and in his limited and fragile environment The field has reached a stage of self sustained development and momentum A few years ago the System Dynamics Society was founded a high quality academic journal is now published in its fifth volume and the annual International Conferences of the Society were institutionalized and took place in America Europe and Asia The organization of international meet ings for this scientific community however is older than the System Dynamics Society itself The first conventions were held as special sections of conferences devoted to simulation or cybernetics *The Art of Technical Documentation* Katherine Haramundanis,2014-05-16 The Art of Technical Documentation presents concepts techniques and practices in order to produce effective technical documentation The book provides the definition of technical documentation qualities of a good technical documentation career paths and documentation management styles precepts of technical documentation practices for gathering information understanding what you have gathered and methods for testing documentation and considerations of information representation to provide insights on how different representations affect reader perception of your documents Technical writers and scientists will find the book a good reference material *Advances in Human Factors and Ergonomics 2012- 14 Volume Set* Gavriel Salvendy,Waldemar Karwowski,2012-08-06 With contributions from an international group of authors with diverse backgrounds this set comprises all fourteen volumes of the proceedings of the 4th AHFE Conference 21 25 July 2012 The set presents the latest research on current issues in Human Factors and Ergonomics It draws from an international panel that examines cross cultural differences design issues

Stowell,Daune West,James G. Howell,2012-12-06 As we approach the end of the 20th century we can look back upon the achievements that have been made in a variety of human endeavours with pride Enormous strides have been made to improve the quality of life of millions of people through the application of the scientific discoveries made during this and past centuries The 20th century will be remembered as much for the mass exploitation of scientific discovery as for the discoveries themselves The technological age has meant that the human being is able to contemplate activities which defy nature For example some of the work involved in the preparation of these proceedings has been done whilst travelling at over 500 miles per hour seven miles above the surface of the earth It is not difficult to conjecture about the effect that this relatively recent technology has had upon a number of systems Air transportation has provided a number of benefits including such disparate examples such as enabling holidays famine relief and the cross fertilisation of cultural practices from other lands Equally there have been undesirable effects such as enabling the means of mass destruction interference in other cultures and the speedy transportation of disease Moreover the physical presence of the aeroplane itself represents the

consumption of fossil fuels a source of pollution and a change in the way think about life The view expressed here is of course the view of an inhabitant of the western world   Inadvertent Nuclear War Hå. Wiberg,I.D. Petersen,P. Smoker,2013-10-22 Since the dramatic end of the Pacific War in 1945 the threat of nuclear war has exercised the minds of many Initial fears concerned the risk that a political crisis between the Superpowers would escalate through miltary confrontation into a calculated nuclear war Another scenario pictured a new Hitler commanding a nuclear capable state prepared to use such weapons irrationally possibly sparking a catalytic nuclear war between the major Powers More recently attention has shifted towards the risk of the accidental release of nuclear weapons While the risk of intentional conflict between the major Powers has lessened the arsenals have only been marginally reduced leaving the possibility of accidental release as perhaps the most threatening case Inadvertent Nuclear War presents the risk in terms of the reliability and instability of the human and technical systems governing release with contributions ranging from the engineering of computer software to the psychology of the chain of command As Dr Wiberg states in his introduction No known technical construction human being or social organization is absolutely failsafe
