China Engages Latin America R. Evan Ellis, 2022-03-14 This book explores China's engagement with Latin America and the Caribbean as a case study of its broader effort to use commercial tools and instruments of state to create a global economic order that functions to its benefit while neutralizing challenges from institutions states and others that would oppose it Unlike the common representation of the Cold War as a political military struggle this work uniquely examines China's current efforts as primarily seeking to dominate global value chains with supporting political technological and military components In this regard it both leverages and goes beyond works based on dependency theory which has played a key role in the academic and popular discourse in the region The book examines evidence for China's economically focused strategy within Latin America and the Caribbean including the interrelationships and coordination between China's activities in different sectors and between commercial political and other dimensions in the region It further looks at the supporting role played by a diverse range of Chinese initiatives from China's Belt and Road initiative to people to people diplomacy soft power security engagement and the PRC struggle with Taiwan for diplomatic recognition in the region among others The book highlights the implications for Latin America and the Caribbean and for the U S whose prosperity and security is intimately tied to the region
