From Age-Ing to Sage-Ing Schachter-Shalomi Zalman Miller Ronald S, 2014-07-01 Over two decades ago beloved and respected rabbi Zalman Schachter Shalomi felt an uneasiness He was growing older and fears about death and infirmity were haunting him So he decided to embark on mission to get to the bottom of his fears Through a series of events that included a vision quest in a secluded cabin and studying with Sufi masters Buddhist teachers and Native American shamans Reb Zalman found a way to turn aging into the most meaningful and joyous time in his life In this inspiring and informative guide Reb Zalman shares his wisdom and experience with readers He shows readers how to create an aging process for themselves that is full of adventure passion mystery and fulfillment rather than anxiety Using scientific research both neurological and psychological Reb Zalman offers techniques that will expand horizons beyond the narrow view of the present into a grand and enduring eternity By harnessing the power of the spirit as well as explaining exactly how to become a sage in their own community he gives readers a helpful and moving way to use their own experiences to nurture heal and perhaps even save a younger generation from the prison of how we typically regard aging In this updated version of his popular book Reb Zalman has added a brand new introductory chapter that provides insight into the shifts that have taken place in our culture since the first edition of this book came out in the 1990s He speaks about the role the 78 million now aging Baby Boomers are currently playing in how we think about aging Additionally he provides new inspiring ideas about the importance of an elder's role in shaping society and explains how elders can embrace the power they have to provide value and wisdom to those around them *From Age-ing to Sage-ing* Zalman Schachter-Shalomi, Ronald S.

volume much warmth human compassion and necessary wisdom Elie Wiesel winner of the Nobel Peace Prize **Choices & Changes** G. Richard Ambrosius, 2006-04 For the first time in human history the prospect of living a long healthy and productive life has become a reality for the majority of people What was the privilege of the few has become the destiny of the many Robert Butler MD Gerontologist Choices and then to create criteria with which to distinguish between those categories age sex nationality race religion education etc As we do this the categories ultimately and often unconsciously shape our world view Retirement for example is a word stereotypically used to categorize that portion of life that occurs when one quits working and becomes old As such we tend to distinguish retirees from productive members of society We then help others distinguish these people by creating categories to describe places where they gather senior centers or dwell retirement communities healthcare centers assisted living communities or 50 communities Retirement is that magical time of life when the focus somehow shifts from who you are and what you do to what you once did and who you used to be as if all your experience is at once inaccessible to the person you've become How does this type of prejudice occur Where does it come from Let's examine the word Various dictionaries offer multiple definitions of the word retirement To go away retreat or withdraw to a private sheltered or secluded place To go to bed To give ground as in battle retreat withdraw To give up one's work business or career especially because of advancing age To move back or away or seem to do so You probably have noticed most of these definitions focus on quitting going away withdrawing from or giving up Retirement implies that your self worth and your worth to society are a thing of the past Such an implication is negative unfounded and dangerous to one's health It is fine to retire for the evening but it is not fine to retire from life simply because of some mindless designation While retirement may have been an appropriate descriptor of later life during the industrial age when very few people lived into their 60s and 70s the term is no longer relevant when applied to today's active healthy and well educated older adults Perhaps it is time to retire words like retirement retired or retiree when referring to people in life's second half just as we have retired other words used to categorize and demean minorities and women over the years I have been railing against aging stereotypes for 30 years and now for the first time I am beginning to experience them myself as I approach my 60th year Tod **A Heart of Wisdom** Susan Berrin, 2014-09-13 Shows us how to understand and meet the challenges of our own process of aging and the aging of those we care about from a Jewish perspective from midlife through the elder years Over 40 contributors offer their insights and experiences through personal narrative text studies poems ceremonies and stories about aging retiring growing learning caring for elderly parents living and dying **Handbook of Geriatric Care Management** Cathy Cress, 2011-03-30 A comprehensive guide for Geriatric Care Managers GCMs to help define duties and procedures while providing guidelines for setting up a geriatric care practice from publisher description **Health Care Issues of Aging Families** John W. Beyond Nostalgia Ruth E. Ray, 2000 For three years Ruth E Ray visited and participated in eight writing groups at six senior centers in inner city and suburban Detroit looking for ways in which the elderly fashion their memories through personal narrative Her innovative book involves the reader in the construction of life stories as a richly rewarding and highly social process that often reveals the types of relationships that dominate the lives of group members the majority of whom are women Because Ray wrote and responded herself and shares her anxiety and triumph in presenting her writing to women old enough to be her mother some of a different race and class Beyond Nostalgia is an excellent primer for professionals working with diverse groups in a variety of settings It is also an important contribution to the emerging field of feminist gerontology Ray's book demonstrates its own thesis that the presentation and negotiation of life stories in writing groups initiates change and personal growth among older people Drawing on personal observations the give and take of meeting conversations lengthy interviews and the life stories themselves Ray tells a story of adult development through personal narrative She recreates the group process through which age peers begin to articulate what life means both individually and collectively The writing groups of older adults that Ray studied challenged their members to consider not just cultural influences but generational effects on the evolving content and structure of their life stories Age Ray argues has been largely ignored by feminists and she makes a strong case for the need to learn how women make meaning of their lives across the life span As an important document and analysis of that process Beyond Nostalgia should appeal to academics and practitioners in women's studies composition studies gerontology developmental psychology sociology social work and linguistics and to anyone who works with older people
