From Capitalism To Equality An Inquiry Into The Laws Of Economic Change:

From Capitalism to Equality Charles Andrews, 2000 This pathbreaking renewal of the labor theory of value written as a popular introduction to political economy revives the optimistic tradition of laws of historical progress *Organicity*

Dobereiner David Dobereiner, 2019-10-15 Nature is endlessly reinventing itself in a constant flux of movement and diversity Yet the advancement of modern civilization has engendered extreme inequality social division and an imbalance between society and nature Our technological proficiency has given our species the illusion of omnipotence in our efforts to build robots more like us we have not noticed how robotic we ourselves have become To deal with this profound crisis we must understand this problem at its roots Could the origins of social domination and ecological exploitation be related Is it possible for us to transform these dynamics and design society in a way that is cognizant of and harmonious with the Earth In this visionary book David Dobereiner lucidly delves into the present urban and ecological impasse and examines the prospects for our future Laced with insights into social and political ecology and written with a lifetime's experience of innovating in ecological design *Organicity* shows that there is still hope to build a more humane egalitarian and sustainable system but it requires a fundamental shift in the way we do civilization At the crossroads of creation and destruction will evolution or entropy triumph

Economics of Fulfillment Vincent Frank Bedogne, 2009-05-13 At present every nation embraces a blend of two major economic philosophies socialism and capitalism Does either system of economic belief however meet our needs Faced with uncertain global economic conditions and problems with capitalism and free markets we seek solutions in socialism and government control Faced with declining individual freedom and problems with socialism and government control we seek solutions in capitalism and free markets In light of the emerging evolution of consciousness view of the universe we see economics in all its past and contemporary forms those that lean toward socialism and those that lean toward capitalism as obsolete A new economic philosophy reveals itself an economics for tomorrow an economics of fulfillment

Commonsense Guide to Current Affairs Vincent Frank Bedogne, Marcy Jean Everest, 2009-08-01 From clones family abortion terrorism and the concept of the collective to economics nuclear power cap and trade renewable energy and the politics of climate change Everest and Bedogne do something much needed and remarkably absent in today's media They strip away the layers of liberal and conservative ideology to look at the most talked about topics of our time from the standpoint of what the politicians have forgotten common sense Brought to light by logic history and science the book filters the issues that in today's world every citizen student and educator needs to understand through what we know to be sound that which we have gained through our day to day trials our all too often repressed ability to see things in a practical and matter of fact way

The End of the Street David Dobereiner, 2006 Knowing that global land uses require radical rethinking David Dobereiner looks at how development ideals can be translated into practical techniques that conserve natural resources take advantage of existing structures and improve the economic and social dimensions of a community

while considering the financial realities that must be faced What needs to be done he believes is known and is technically feasible David Dobereiner was an associate professor of architecture at the Syracuse University department of architecture and has also served on design juries and given seminars and lectures at Harvard University MIT and the University of California Berkeley In 1990 he won an international design competition to build bioclimatic houses in the Canary Islands His team's submission was the only winning entry from the United States **American Book Publishing Record**, 2001

expression resides not in the expression itself but in the experience of a person's engagement with it Meaning will be different not only to different people but also to the same person at different times This book offers a way of attending to these different meanings This way or method is a version of a trans cultural activity that Richard Dawson calls attunement The activity of attunement involves a movement of self adjustment to a language which a person transforms in her or his use of it Consciously performing the activity can enable understanding of the processes by which we constitute ourselves and
