From Many Strands Ethnic And Racial Groups In Contemporary America The:

From Many Strands Stanley Lieberson, Mary C. Waters, 1988-09-20 The 1980 Census introduced a radical change in the measurement of ethnicity by gathering information on ancestry for all respondents regardless of how long ago their forebears migrated to America and by allowing respondents of mixed background to list more than one ancestry The result presented for the first time in this important study is a unique and sometimes startling picture of the nation's ethnic makeup From Many Strands focuses on each of the sixteen principal European ethnic groups as well as on major non European groups such as blacks and Hispanics The authors describe differences and similarities across a range of dimensions including regional distribution income marriage patterns and education While some findings lend support to the melting pot theory of assimilation levels of educational attainment have become more comparable and ingroup marriage is declining other findings suggest the persistence of pluralism settlement patterns resist change and some current occupational patterns date from the turn of the century In these contradictions and in the striking number of respondents who report no ethnic background or report it incorrectly Lieberson and Waters find evidence of considerable ethnic flux and uncover the growing presence of a new unhyphenated American ethnic strand in the fabric of national life A Volume in the Russell Sage Foundation Census Series

The Impact of Immigration on African Americans Steven Shulman, 2017-09-04 Immigration has significant consequences for all Americans but especially for African Americans The sheer magnitude of immigration it is the primary factor driving population growth is so large that it directly or indirectly affects the economic political social and environmental circumstances of most Americans But the geographic concentration of immigrants in urban areas and the economic concentration of immigrants in the low wage sector of the labor market have special consequences for African Americans since they are especially likely to live in urban areas and to be low wage workers These effects can be both negative and positive Immigration has sharply increased the supply of labor into the low wage sector of the labor market which tends to reduce wages and employment opportunities for low wage native workers Employers may prefer hiring immigrants who are perceived to be hard working and uncomplaining to hiring African Americans Immigrants can also increase the competition for scarce public services especially education on which African Americans depend Yet immigration

can also stimulate economic growth and urban revitalization which can increase job opportunities and spread an ideology of multiculturalism Immigration can dilute the political power of African Americans but it can also strengthen the civil rights coalition Immigration can benefit some groups while hurting others This volume presents research and analysis that reflects and advances the debates about the economic and political consequences of immigration for African Americans The contributors include Gerald Jaynes Yale University Vernon Briggs Cornell University Frank Bean and Jennifer Lee University of California Irvine Robert Cherry Brooklyn College Manuel Pastor University of California Santa Cruz and Enrique Marcelli University of Massachusetts Boston Steven Camarota Center for Immigration Studies Frank Morris University of Texas D

Identity and Integration Bernhard Peters, 2017-03-02 Symbolic boundaries cultural differences and ethnic conflicts have gained significance and new meanings in a global situation characterized by the dissolution of traditional political and societal structures Communications and political and economic interactions increasingly cross the borders of states nations and ethnic communities and yet symbolic borders and separate group identities are nevertheless asserted The perceived efforts of migrants to maintain their cultural and ethnic identities are often blamed as a cause of conflict within nation states This intriguing volume recognizes that migrants with an Islamic background are seen as especially problematic cases Turks are the biggest category among Muslim migrants in Europe and more than one third of all Muslim migrants in Europe are from Turkey Referring primarily to immigration from Turkey this book combines both exemplary case studies of Turks within Europe and theoretical papers with innovative perspectives on the relations between integration and identity

The Schematic State Debra Thompson, 2016-10-20 By examining the political development of racial classifications on the national censuses of the United States Canada and Great Britain *The Schematic State* maps the changing nature of the census from an instrument historically used to manage and control racial populations to its contemporary purpose as an important source of statistical information employed to monitor and rectify racial discrimination Through a careful comparative analysis of nearly two hundred years of census taking it demonstrates that changes in racial schemas are driven by the interactions among shifting transnational ideas about race the ways they are tempered and translated by nationally distinct racial projects and the configuration of political institutions involved in the design and execution of census policy This book argues that states seek to make their populations racially legible turning the fluid and politically contested substance of race into stable identifiable categories to be used as the basis of law and policy
