 With the recent global economic crisis attitudes and practices in relation to intellectual property valuation are changing as  
 exemplified by the dichotomy explained in this book which makes it unique While there has been a move towards global  
 harmonisation in terms of valuation of both tangible and intangible assets that are based on innovation there is also a  
 tendency against global harmonisation because of cultural attitudes and practices of different countries This can be seen  
 most acutely in relation to intellectual property valuation in Asia especially East Asia which often differs from the West's  
 perception of valuation The book is written by experts in intellectual property valuation and innovation who are mainly  
 practitioners covering innovators marketers accountants social innovators and business and management academics The  
 breadth and practitioner background of most of the contributors make the material relevant to those involved in valuation  
 economics business management accounting and finance law and maritime insurance This book takes an interdisciplinary  
 approach that cross cuts all the above mentioned disciplines and takes the understanding of intellectual property valuation to

 decentralization and the globalization of Korean popular culture By analyzing the process of culture featured place marketing  
 Pop City shows that urban spaces are produced and sold just like TV dramas and pop idols by promoting spectacular images
