From An Antique Land Travels In Egypt And The Holy Land:

From an Antique Land David Roberts, 1989 Journals and illustrations detail the author's experiences on his 1838 journey through the Middle East **Visualising Britain's Holy Land in the Nineteenth Century** Amanda M. Burritt, 2020-04-11 This book demonstrates the complexity of nineteenth century Britain's engagement with Palestine and its surrounds through the conceptual framing of the region as the Holy Land British engagement with the region of the Near East in the nineteenth century was multi faceted and part of its complexity was exemplified in the powerful relationship between developing and diverse Protestant theologies visual culture and imperial identity Britain's Holy Land was visualised through pictorial representation which helped Christians to imagine the land in which familiar Bible stories took place This book explores ways in which the geopolitical Holy Land was understood as embodying biblical land biblical history and biblical typology Through case studies of three British artists David Roberts David Wilkie and William Holman Hunt this book provides a nuanced interpretation of some of the motivations religious perspectives attitudes and behaviours of British Protestants in their relationship with the Near East at the time *Freemasonry and the Visual Arts from the Eighteenth Century Forward* Reva Wolf, Alisa Luxenberg, 2019-11-28 Choice Outstanding Academic Title for 2020 With the dramatic rise of Freemasonry in the eighteenth century art played a fundamental role in its practice rhetoric and global dissemination while Freemasonry in turn directly influenced developments in art This mutually enhancing relationship has only recently begun to receive its due The vilification of Masons and their own secretive practices have hampered critical study and interpretation As perceptions change and as masonic archives and institutions begin opening to the public the time is ripe for a fresh consideration of the interconnections between Freemasonry and the visual arts This volume offers diverse approaches and explores the challenges inherent to the subject through a series of eye opening case studies that reveal new dimensions of well known artists such as Francisco de Goya and John Singleton Copley and important collectors and entrepreneurs including Arturo Alfonso Schomburg and Baron Taylor Individual essays take readers to various countries within Europe and to America Iran India and Haiti The kinds of art analyzed are remarkably wide ranging porcelain architecture posters prints photography painting sculpture metalwork and more and offer a clear picture of the international scope of the relationships between Freemasonry and art and their significance for the history of modern social life politics and spiritual practices In examining this topic broadly yet deeply Freemasonry and the Visual Arts sets a standard for serious study of the subject and suggests new avenues of investigation in this fascinating emerging field *Revealing the Holy Land* Kathleen Stewart Howe, Santa Barbara Museum of Art, St. Louis Art Museum, 1997 This is the catalog for an exhibition of nineteenth century photographs drawn primarily from the world class collection of Michael G Wilson Included are the starkly beautiful photographs of Sergeant James McDonald's surveys of Palestine and Jerusalem recently discovered photographs by Ernest Benecke and the rare photographs by Maxime Du Camp taken in 1850 as he traveled with Flaubert With the invention of

photography and the increasing popularity of travel in the mid nineteenth century the Holy Land became one of the most photographed places on earth Interest in Jerusalem and Palestine was particularly pronounced in England partly because of England's need to control its routes to the riches of India but also because of Britain's cultural identification with the people and lands of the Bible Imperial ambition and deeply ingrained cultural associations resulted in a surge of photographic activity in Palestine McDonald's photographs from surveys of Jerusalem and the Sinai epitomize the dual imperatives of Bible and Empire Photography provided a new standard for authenticity in pictorial representations Early photographs were considered the ultimate bearers of reality at a time when viewers had not yet lost their naive faith in the objective accuracy of photography Throughout the last half of the nineteenth century the Holy Land drew legions of photographers amateurs recording a stop on the Grand Tour academics pursuing archaeological theories military surveyors all trying to capture the truthfulness of a land that had enormous spiritual emotional and political connotations for most of the Western world What they saw and how they saw it are the themes of this beautifully recorded collection

Gutenberg in Shanghai Christopher A. Reed, 2011-11-01 In the mid 1910s what historians call the Golden Age of Chinese Capitalism began accompanied by a technological transformation that included the drastic expansion of China's Gutenberg revolution Gutenberg in Shanghai examines this process It finds the origins of that revolution in the country's printing industries of the late imperial period and analyzes their subsequent development in the Republican era This book which relies on documents previously unavailable to both Western and Chinese researchers demonstrates how Western technology and evolving traditional values resulted in the birth of a unique form of print capitalism whose influence on Chinese culture was far reaching and irreversible Its conclusion contests scholarly arguments that view China's technological development as slowed by culture or that interpret Chinese modernity as mere cultural continuity A vital reevaluation of Chinese modernity Gutenberg in Shanghai will be enthusiastically received by scholars of Chinese history and by specialists in cultural studies political science sociology the history of the book and the anthropology of science and technology

Wonderful Things: A History of Egyptology, Volume 1 Jason Thompson, 2015-03-01 The discovery of ancient Egypt and the development of Egyptology are momentous events in intellectual and cultural history The history of Egyptology is the story of the people famous and obscure who constructed the picture of ancient Egypt that we have today recovered the Egyptian past while inventing it anew and made a lost civilization comprehensible to generations of enchanted readers and

viewers thousands of years later This the first of a three volume survey of the history of Egyptology follows the fascination with ancient Egypt from antiquity until 1881 tracing the recovery of ancient Egypt and its impact on the human imagination in a saga filled with intriguing mysteries great discoveries and scholarly creativity Wonderful Things affirms that the history of ancient Egypt has proved continually fascinating but it also demonstrates that the history of Egyptology is no less so Only by understanding how Egyptology has developed can we truly understand the Egyptian past *Geography of the Gaze* Renzo Dubbini,2002-04-15 *Geography of the Gaze* offers a new history and theory of how the way we look at things influences what we see Focusing on Western Europe from the seventeenth to nineteenth centuries Renzo Dubbini shows how developments in science art mapping and visual epistemology affected the ways natural and artificial landscapes were perceived and portrayed He begins with the idea of the view explaining its role in the invention of landscape painting and in the definition of landscape as a cultural space Among other topics Dubbini explores how the descriptive and pictorial techniques used in mariners charts view oriented atlases military cartography and garden design were linked to the proliferation of highly realistic paintings of landscapes and city scenes how the picturesque system for defining and composing landscapes affected not just art but also archaeology and engineering and how the ever changing modern cityscapes inspired new ways of seeing and representing the urban scene in Impressionist painting photography and stereoscopy A marvelous history of viewing *Geography of the Gaze* will interest everyone from scientists to artists *Benezit Dictionary of British Graphic Artists and Illustrators* Stephen Bury,2012-06-21 This dictionary consists of over 3000 entries on a range of British artists from medieval manuscript illuminators to contemporary cartoonists Its core is comprised of the entries focusing on British graphic artists and illustrators from the 2006 *Benezit Dictionary of Artists* with an additional 90 revised and 60 new articles *The Oxford Handbook of Egyptian Epigraphy and Palaeography* Vanessa Davies,Dimitri Laboury,2020-02-28 The unique relationship between word and image in ancient Egypt is a defining feature of that ancient culture s records All hieroglyphic texts are composed of images and large scale figural imagery in temples and tombs is often accompanied by texts Epigraphy and palaeography are two distinct but closely related ways of recording analyzing and interpreting texts and images This Handbook stresses technical issues about recording text and art and interpretive questions about what we do with those records and why we do it It offers readers three key things a diachronic perspective covering all ancient Egyptian scripts from prehistoric Egypt through the Coptic era fourth millennium BCE first half of first millennium CE a look at recording techniques that considers the past present and future and a focus on the experiences of colleagues The diachronic perspective illustrates the range of techniques used to record different phases of writing in different media The consideration of past present and future techniques allows readers to understand and assess why epigraphy and palaeography is or was done in a particular manner by linking the aims of a particular effort with the technique chosen to reach those aims The choice of techniques is a matter of goals and the records work circumstances an

inevitable consequence of epigraphy being a double projection geometrical transcribing in two dimensions an object that exists physically in three and mental an interpretation with an inevitable selection among the object's defining characteristics. The experiences of colleagues provide a range of perspectives and opinions about issues such as techniques of recording challenges faced in the field and ways of reading and interpreting text and image. These accounts are interesting and instructive stories of innovation in the face of scientific conundrum.

Travels in Egypt and the Holy Land William Rae Wilson, 1823 [The Publishers Weekly](#), 1894 **The Cairo Genizah and the Age of Discovery in Egypt** Rebecca J. W. Jefferson, 2022-01-27. The Cairo Genizah is considered one of the world's greatest Hebrew manuscript treasures. Yet the story of how over a quarter of a million fragments hidden in Egypt were discovered and distributed around the world before becoming collectively known as The Cairo Genizah is far more convoluted and compelling than previously told. The full story involves an international cast of scholars, librarians, archaeologists, excavators, collectors, dealers, and agents operating from the mid nineteenth to the early twentieth century and all acting with varying motivations and intentions in a race for the spoils. Basing her research on a wealth of archival materials, Jefferson reconstructs how these protagonists used their various networks to create key alliances or to blaze lone trails, each one on a quest to recover ancient manuscripts. Following in their footsteps, she takes the reader on a journey down into ancient caves and tombs, under medieval rubbish mounds, into hidden attic rooms, vaults, basements, and wells, along labyrinthine souks, and behind the doors of private clubs and cloistered colleges. Along the way, the reader will also learn about the importance of establishing manuscript provenance and authenticity and the impact to our understanding of the past when either factor is in doubt.
