From Head To Toe Body Math:

From Head to Toe ,1993-01-01 A collection of original stories poems riddles games and hands on activities to develop early math skills focusing on math intrinsic to the human body **Do the Math: Why Math Is Nothing Like How You Imagine** Jack Tanner,2020-03-02 If God had to design a language with which he could make the universe what language would it be Mathematics is the only language fit for God and fit for a universe But if the universe is made of mathematics why not God too God uses mathematics for Creation because God is mathematics God is a living quantum computer and individual souls are quantum nodes of God Isn t it time you did the math Mathematics is both the language and substance of divinity

Math Explorations and Applications Stephen S. Willoughby,Carl Bereiter,Peter Hilton,Joseph H. Rubinstein,WrightGroup/McGraw-Hill Staff,2002-07 *Mathematics Methods for Elementary and Middle School Teachers* Mary M. Hatfield,2004-04-29 An activity based approach to teaching with an emphasis on using manipulatives to build conceptual understanding This invaluable book combines practical teaching ideas video examples updated assessment techniques and the NCTM Assessment Standards to give teachers all the background they need to introduce elementary and middle school students to the wonders of mathematics **Zoo-A-Logical Math** Thomas Kearney,2012-04 The work for this book began with a course I created and taught called Animal Behavior I always knew that there was a strong magnetic bond between people and animals but it wasn t until I began working on my curriculum that I truly found out how strong this bond really was Millions of people young and old will visit zoos and aquariums each year People stand in front of the animals hypnotized by the every movement of the animal People seemed to be looking not just at the animal but almost as if they were looking inside these animals wondering and questioning about the lives of some of our most distant animal relatives In my classroom I found the exact same kinds of responses The discussions and questions of my students motivated me to share with you the lives and abilities of some of the most amazing living creatures in the world People realize that humans are also animals but the belief that we have superior intelligence and problem solving abilities makes us think we are far superior to all of the rest of our Animal World As I began to learn more and lead my student discussions I soon realized that maybe our intelligence was the only thing that we really did have in our superiority over the rest of our animal relatives I began to look into the idea of comparing humans to animals in a wide variety of behaviors and activities and soon a brand new window into the REAL world of animals began to open up I soon realized that even the most insignificant animals in our world were really superstars when compared to humans By using math we are able to truly get a comparison of animals and how they relate to our own human abilities As I began to create the problems and do the math it became very evident that I began to get the responses that I had hoped for I soon began to call these responses the Wow factor A number of times the teachers that have worked on the problems would actually go back and do the problems a second time because there has to be a mistake or no way that this can be true There were no mistakes and the math did not lie The math allowed us to look at the animals in a
