Emerging Concepts Of Alcohol Dependence:

Emerging Concepts of Alcohol Dependence E. Mansell Pattison, Mark B. Sobell, Linda C. Sobell, 1977 **Determinants of Substance Abuse** Mark Galizio, Stephen A. Maisto, 2013-06-29

With the recent increase in the scope of drug and alcohol problems has come an awareness of the need for solutions. In this context, federal support for research on drug problems increased tremendously during the last 10 to 15 years with the establishment of the National Institute on Drug Abuse (NIDA) and the National Institute on Alcohol Abuse and Alcoholism (NIAAA). Funding from these and other sources has led to a substantial increase in the quantity and quality of published work related to substance abuse. As data accumulate, it is becoming more apparent that substance abuse problems are extremely complex and are influenced by a variety of biological, psychological, and environmental variables. Unfortunately, it has proved difficult to go beyond this conclusion to a description of how these multiple factors work together to influence the development of and recovery from drug and alcohol dependence. The purpose of this book is to try to meet that objective by including in one volume literature reviews and theoretical analyses from a wide variety of drug researchers. We chose the authors in an attempt to assure that each of the various levels of analysis appropriate to the substance abuse problems would be included. In each case, the author was asked to consider how the variables in his or her particular domain might contribute to the appearance of individual differences in both alcohol and drug problems.

Choice, Behavioural Economics and Addiction Nick Heather, Rudy E. Vuchinich, 2003-11-13

Choice Behavioural Economics and Addiction is about the theory, data, and applied implications of choice-based models of substance use and addiction. The distinction between substance use and addiction is important because many individuals use substances but are not also addicted to them. The behavioural economic perspective has made contributions to the analysis of both of these phenomena, and while the major focus of the book is on theories of addiction, it is necessary also to consider the behavioural economic account of substance use in order to place the theories in their proper context and provide full coverage of the contribution of behavioural economics to this field of study. The book discusses the four major theories of addiction that have been developed in the area of economic science: behavioural economics, They are hyperbolic discounting, melioration, relative addiction, and rational addiction. The main objective of the book is to popularise these ideas among addiction researchers, academics, and practitioners. The specific aims are to articulate the shared and distinctive elements of these four theories, to present and discuss the latest empirical work on substance abuse and addiction that is being conducted in this area, and to articulate a range of applied implications of this body of work for clinical, public health, and public policy initiatives. The book is based on an invitation-only conference entitled Choice Behavioural Economics and Addiction: Theory, Evidence, and Applications, held at the University of Alabama at Birmingham on March 30 and April 1, 2001. The conference was attended by prominent scientists and scholars representing a range of disciplines concerned with theories of addiction and their consequences for policy and practice. The papers in the book are based on the papers given at the above conference.

The Biology of Alcoholism Benjamin Kissin, 2012-12-06 Pathogenesis is defined in Blackiston's Medical Dictionary as the course of development of disease including the sequence of processes or events from inception to the characteristic lesion or disease The central position of the word pathogenesis in the titles of Volumes 6 and 7 in itself connotes a bias on the part of the editors in favor of the disease concept of alcoholism inasmuch as the end product of the pathogenetic process is presumed to be a disease But the disease model as here conceptualized is vastly different from that of Jellinek or of Alcoholics Anonymous or of psychoanalysis In those theories alcoholism is seen as the inevitable consequence of some specific flaw in the heredity or the experience of the afflicted individual that inexorably leads to alcoholism In these present volumes the alcoholic syndrome is viewed rather as the outgrowth of the interaction of a variety of biological psychological and social influences which depending on the predominance of one or another may lead to different types of alcoholism This view which has been labeled the bio psycho social perspective encompasses a larger view of the dynamics of

the development of alcoholism incorporating data from each of the phenomenologic levels involved An additional complication arises from the fact that the physiological and psychosocial stigmata of alcoholics which are probably most often the result of prolonged drinking frequently have come to be considered as causes of the disease *Alcohol Health and Research World*, 1977

Handbook of Psychology and Health, Volume I Robert J. Gatchel, Andrew Baum, Jerome E. Singer, 2021-09-30 Originally published in 1982 this volume deals with behavioral medicine and clinical psychology Much of what psychologists had been able to contribute to the study and treatment of health and illness had to this point been derived from clinical research and behavioral treatment This volume presents some of this work providing a fairly comprehensive view of the overlap between behavioral medicine and clinical psychology Its purpose was to present some of the traditional areas of research and practice in clinical psychology that had directly and indirectly contributed to the development of behavioral medicine Before the birth of behavioral medicine which subsequently attracted psychologists from many different areas ranging from social psychology to operant conditioning the chief link between psychology and medicine consisted of the relationship albeit sometimes fragile and tumultuous between clinical psychology and psychiatry Many of the behavioral assessment and treatment methods now being employed in the field of behavioral medicine were originally developed in the discipline of clinical psychology

Behavioral Treatment of Alcohol Problems M. Sobell, 2013-03-09 Ideas about the nature of alcohol problems have been undergoing dramatic change over the past several years This book summarizes the clinical research we have conducted over the past eight years research which has evoked controversy and which we hope will be evaluated as having been influential in the development of a scientific approach to the clinical treatment of alcohol problems Although we reference many studies from the general behavioral literature on alcohol problems we make no pretense of presenting a thorough review of that literature By and large this book focuses on the research we have conducted the rationale for that approach and a detailed discussion of methods and results which cannot be presented in journal articles The book begins by giving the reader a perspective on traditional concepts in the alcohol field and why those concepts are now being challenged Within that conceptual framework we then trace the development and sophistication of our clinical research presenting for the first time in a single work a complete consideration of the rationale methods and results of the study of Individualized Behavior Therapy IBT for alcoholics Following a discussion of many of the more subtle aspects of that study and its results we describe how IBT can be used in an outpatient setting the setting in which we have conducted clinical research for the last six years

Alcoholism Etiology and Treatment Bernard Segal, 2022-05-29 First published in 1988 Alcoholism Etiology and Treatment provides a stimulating discussion concerning an understanding of the etiology and treatment of alcoholism Divided into five chapters it brings themes like the disease concept of alcoholism interdisciplinary biobehavioral research on alcohol problems sociocultural and organizational bases of support for alcohol treatment genetic predisposition to alcoholism and anthropological perspectives on prevention and intervention to provide a

forum for discussion of some of the issues that prevail in the field of alcoholism This book is an essential read for students and scholars of addiction studies psychology sociology and behavioural studies **Alcoholism Treatment Marketing** Donald Self, 2014-04-04 The annual economic burden of alcohol abuse in the United States is staggering yet the alcoholism treatment industry has been historically plagued by governmental regulations moral crusades advocacy of specific treatment approaches and a lack of marketing knowledge Here is the first focused set of research on the marketing of alcoholism treatment services The authors of this much needed volume reputable marketing and research scholars greatly expand the current base of knowledge concerning the alcohol treatment marketing subdiscipline including the referral system analyses of market potentials for providers promotional effort consultation for new providers and the evolving nature of medical services distribution systems Through in depth interviews with treatment providers referral sources and former clients of treatment facilities and in major reviews of literature on the subject Alcoholism Treatment Marketing presents primary research and general research findings to provide practical marketing implications **The Effectiveness and Costs of Alcoholism Treatment** Leonard Saxe, United States. Congress. Office of Technology Assessment, 1983 **Alcoholic Thinking** Danny M. Wilcox, 1998-03-25 Based on long term observation of Alcoholics Anonymous the author focuses on cultural rather than personal causes of drug dependence The author also discusses how the symbolic action of AA language and culture is the key to recovery This study yields critical information about the development and practice of alcoholism and other drug dependence Through the shared linguistic and cultural interaction of AA the U S cultural ideology that emphasizes individualism personal achievement self control and self reliance is shown to result in conflict thus the gap between the perceived ideal and reality intensifies feelings of separation alienation and isolation leading to dependency This detailed ethnographic narrative of Alcoholics Anonymous is based on three years of participant observation The study suggests that anyone can be victimized by alcoholic thinking Anthropologists sociologists psychologists health care and professional social services organizations will be interested in this book **Paying the Tab** Philip J. Cook, 2016-05-31 What drug provides Americans with the greatest pleasure and the greatest pain The answer hands down is alcohol The pain comes not only from drunk driving and lost lives but also addiction family strife crime violence poor health and squandered human potential Young and old drinkers and abstainers alike all are affected Every American is paying for alcohol abuse Paying the Tab the first comprehensive analysis of this complex policy issue calls for broadening our approach to curbing destructive drinking Over the last few decades efforts to reduce the societal costs curbing youth drinking and cracking down on drunk driving have been somewhat effective but woefully incomplete In fact American policymakers have ignored the influence of the supply side of the equation Beer and liquor are far cheaper and more readily available today than in the 1950s and 1960s Philip Cook s well researched and engaging account chronicles the history of our attempts to legislate morality the overlooked lessons from Prohibition and the rise of Alcoholics Anonymous He provides a thorough account of the scientific

evidence that has accumulated over the last twenty five years of economic and public health research which demonstrates that higher alcohol excise taxes and other supply restrictions are effective and underutilized policy tools that can cut abuse while preserving the pleasures of moderate consumption Paying the Tab makes a powerful case for a policy course correction Alcohol is too cheap and it s costing all of us *Counseling Theories and Techniques for Rehabilitation Health Professionals* Fong Chan,2004-02-17 This text provides a state of the art treatment of the dominant theories and techniques of counseling and psychotherapy from a rehabilitation perspective Written by recognized experts in their content areas the book focuses on several knowledge domains underlying the practice of counseling in rehabilitation settings These domains are presented within the framework of the major theoretical approaches to counseling and applications are explained as they relate specifically to people with disabilities Case examples are used throughout the text Basic techniques and selected professional issues related to practice are also presented This collection will be useful for practitioners as well as for upper level undergraduates and graduate students in rehabilitation counseling psychology and other rehabilitation health care disciplines such as nursing occupational therapy and physical therapy **Clinical Case Studies in the Behavioral Treatment of Alcoholism** William M. Hay,Peter E. Nathan,2012-12-06 There is no shortage of books on behavioral research on behavioral research on alcoholism or on behavioral research on alcoholism treatment Most of the authors of chapters in this book have been involved in the writing of these books The books and their authors have played an important role in the dramatic increase in the influence of behavioral approaches to one of our society s most troubling human problems There are not many books though which detail the longitudinal course of the behavioral therapies none doing so for behavior therapy with al coholics and problem drinkers That this book now appears then is a first made more valuable by the fact that the chapter s authors are both research ers and clinicians willing and able to combine respect for empirical data with clinical sensitivity and compassion concern and commitment for their patients The chapters in this book reveal important commonalities and telling divergencies in technique strategy and treatment tactics Despite a common perspective on etiology and treatment the authors of the chapters in this book diverge in criteria for deciding on treatment goal choice of initial intervention target the specifics of techniques used and follow up proce dures Common to all though is an openness to innovation a pragmatic appreciation of approaches that work and a sincere respect for the patient and his or her fundamental desire for a healthy happier and more produc tive life *Behavioral Case Formulation* Ira D. Turkat,2013-12-14 One of the most frequent requests I receive from graduate students is for references on how to formulate a complex clinical case Typically after reading the recommended materials the student returns to request more detailed accounts of how clinicians think about particular cases The general lack of such materials in the behavior therapy literature led to the formation of the present volume Throughout much of the behavior therapy literature one gets the impression that most cases seen present circumscribed and straight fmward psychological problems In my experience such cases are rare Accordingly the present

volume was designed to cover more complex problems such as sociopathy and paranoid personality. These disorders are rarely discussed in the behavior therapy literature but nonetheless seem to appear regularly in clinical settings. The cases presented in this book are descriptions of patients seen clinically by the editor or by the contributors. Work on this text began while I was a faculty member at Vanderbilt University and took several years to complete. As the contributors would attest, the task I set out for them was atypical and often difficult. The complexities involved in articulating how one conceptualizes a case are numerous and may help to explain why there are so few sources available on case formulation. The fact that our current state of knowledge in psychopathology is rather limited further exacerbates the problem.

Recent Developments in Alcoholism

Marc Galanter, 2013-11-21. From the President of the Research Society on Alcoholism. In recent years the alcohol research field has matured and is attracting a substantial number of eager and technically sophisticated researchers. There is a feeling of excitement and premonitions of breakthroughs as more and more of alcohol's actions are being detailed. I however have at times been sobered by the perception that the lure of parsimonious explanations and the appeal of studying easily demonstrable effects obscure the critical issues regarding alcohol abuse and alcoholism. Central questions regarding 1 the reinforcing properties of ethanol and other factors responsible for inappropriate consumption of alcohol 2 the heterogeneous characteristics both biologic and sociologic of the alcoholic population and 3 the differential predisposition of individuals to alcohol-induced medical problems needed to be vigorously pursued. Researchers who used animals as models for the human condition needed to become more intimately aware of the variety of factors that are of importance in the development of alcoholism in an individual. On the other hand, researchers studying humans needed to attempt to more clearly define and categorize diagnostic criteria and characteristics of various alcoholic populations. Such categorization and continued characterization of alcoholism allows not only for a framework of concepts within which proper animal models for studies of biologic mechanisms can be developed but also allows for consideration of the most appropriate treatment approaches.
