We Are in This Dance Together Nancy Plankey-Videla, 2012-07-04. Changes in the global economy have real and contradictory outcomes for the everyday lives of women workers. In 2001, Nancy Plankey Videla had a rare opportunity to witness these effects firsthand. Having secured access to one of Latin America's top producers of high-end men's suits in Mexico for participant observer research, she labored as a machine operator for nine months on a shop floor made up mostly of women. The firm had recently transformed itself from traditional assembly techniques to lean cutting-edge Japanese style production methods. Lured initially into the firm by way of increased wages and benefits, workers had helped shoulder the company's increasing debts. When the company's plan for successful expansion went awry and it reneged on promises it had made to the workforce, women workers responded by walking out on strike. Building upon in-depth interviews with over sixty workers, managers, and policy makers, Plankey Videla documents and analyzes events leading up to the female-led factory strike and its aftermath, including harassment from managers, corrupt union officials, and labor authorities, and violent governor-sanctioned police actions. *We Are in This Dance Together* illustrates how the women's shared identity as workers and mothers, deserving of dignity, respect, and a living wage, became the basis for radicalization and led to further civic organizing against the state, the company, and the corrupt union to demand justice.

With contributions from a wide range of experts, this volume presents an overview of contemporary issues in the financial and industrial sectors. This book is an essential read for all scholars and policymakers interested in the current issues facing finance and industry, as well as those who have followed Ajit

Singh's life and works World Economic Outlook, April 2014 International Monetary Fund. Research Dept., 2014-04-08
Global activity has broadly strengthened and is expected to improve further in 2014-15 according to the April 2014 WEO with much of the impetus for growth coming from advanced economies. Although downside risks have diminished, overall lower than expected inflation poses risks for advanced economies; there is increased financial volatility in emerging market economies and increases in the cost of capital will likely dampen investment and weigh on growth. Advanced economy policymakers need to avoid a premature withdrawal of monetary accommodation. Emerging market economy policymakers must adopt measures to changing fundamentals facilitate external adjustment further monetary policy tightening and carry out structural reforms. The report includes a chapter that analyzes the causes of worldwide decreases in real interest rates since the 1980s and concludes that global rates can be expected to rise in the medium term but only moderately. Another chapter examines factors behind the fluctuations in emerging market economies growth and concludes that strong growth in China played a key role in buffering the effects of the global financial crisis in these economies. **Index of Conference Proceedings** British Library.
