Venkataiah,      **Piagetian Theory and Its Implications for the Helping Professions** ,1978      **The Moral and Spiritual Development of Free People** Robert Edward Jenkins,1977      **Jsl Vol 18-N4 JOURNAL OF SCHOOL LEADERSHIP**,2009-10-16 The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts We welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations The editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world Growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement      Toward a Good Society in the Twenty-First Century N. Karagiannis,J. Marangos,2013-05-14 Having previously defined a good society as a sustainable society with a high level of development significant provision of meaningful jobs and low levels of inequality and social ills Toward a Good Society in the Twenty first Century provides a wide range of principles and policies that would be necessary if we are to achieve a good society      **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1977      Resources in Education ,1998      **New Foundations for Knowledge in Educational Administration, Policy, and Politics** Douglas E. Mitchell,2013-04-03 This book probes the intellectual foundations of scholarly inquiry into educational administration policy and politics The question of whether and if so how social science theories and methods contribute to an understanding of these issues is hotly debated today Is there really a scientific basis for evaluating and or improving educational administration politics and policy The contributors all recognized scholars in the fields of educational organization administration policy and politics tackle the question of epistemology directly addressing anew what rules of scholarly conduct should guide research and practice in the field and how those rules of inquiry should guide the training of scholars and education professionals The Introduction places the chapters in a common intellectual framework for rebuilding confidence in social science inquiry and of the legitimacy of the university as an arbiter of scientific knowledge claims New Foundations for Knowledge in Educational Administration Policy and Politics Science and Sensationalism is directed to research scholars faculty graduate students and policy agency staffers in the fields of educational policy politics and administration educational evaluation and educational foundations It is well suited as a text for graduate courses in these areas      *New Learning* Robert-Jan Simons,Jos van der Linden,Tom Duffy,2007-05-08 This book brings together research and theory about New Learning the term we use for new learning outcomes new kinds of learning processes and new instructional methods that are both wanted by society and stressed in psychological theory in many

countries at present It describes and illustrates the differences as well as the modern versions of the traditional innovative ideas     **Educational Leadership** ,1977     **Handbook of Psychology, Educational Psychology** Irving B.

Weiner,William M. Reynolds,Gloria E. Miller,2012-10-05 Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do This award winning twelve volume reference covers every aspect of the ever fascinating discipline of psychology and represents the most current knowledge in the field This ten year revision now covers discoveries based in neuroscience clinical psychology's new interest in evidence based practice and mindfulness and new findings in social developmental and forensic psychology     *The Ethical Dimensions of School Leadership* P.T. Begley,Olof Johansson,2006-04-11 Among the many significant features of this volume is the dedication to the late Don Willower Professor of Education at Pennsylvania State University It is significant in light of Willower's long record of major contributions to the empirical literature in Educational Administration and his mentorship of many students steeped in the tradition of the so called science of administration These include scholars like Wayne Hoy and Peter Cistone who readily acknowledge their personal and intellectual debt to Willower How is it then that Willower a colleague of the giants of Educational Administration in the 60s and 70s people such as Dan Griffiths Jack Culbertson and Roald Campbell to name just a few came to associate himself with this relatively upstart group of academics and practitioners interested in values of all things As an inheritor of the mantle thrown down by Getzels and Guba all those years ago it might seem strange to see Willower consorting with people who argue about the distinction between fact and value It is true of course that Willower majored in philosophy at the State University of New York at Buffalo as an undergraduate So the language and the ways of thinking among many of those interested in values and ethics were not all that foreign to him He could certainly hold his own in debate with his friend Chris Hodgkinson the foremost philosopher of Educational Administration in the field today and a contributor to this volume     **Perspectives on Curriculum Development, 1776-1976** ASCD 1976 Yearbook

Committee,1976     **New Perspectives on Young Children's Moral Education** Tony Eaude,2015-12-17 New Perspectives on Young Children's Moral Education explores how to approach young children's moral education in a world of uncertainty and change What is moral education How do young children learn to act and interact appropriately How do we enable children to recognise that how they act and interact matters How can character virtues and value help young children internalise qualities associated with living a good life Challenging many current assumptions about ethics and education Tony Eaude suggests that a moral dimension runs through every aspect of life and that ethics involves learning to act and interact appropriately based on an ethic of care and enduring qualities and attributes to equip children to resist strong external pressures Drawing accessibly on research in neuroscience and psychology he discusses how young children learn highlighting the role of emotion culture example habituation and feedback Small actions can help to develop agency empathy

and thoughtfulness and a sense of moral identity with an increasing emphasis on self regulation a vocabulary of ethics and intrinsic motivation Eade explores how character virtues and values can help young children and adults to recognize and internalize qualities associated with living a good life He identifies how adults and learning environments can support these processes and shows why an inclusive approach is needed rather than focusing on these topics only in particular settings programmes or lessons Recognising pitfalls and dilemmas Eade argues that an approach based on virtue ethics and an apprenticeship model is suitable in school and other settings both religious and otherwise internationally The Social Context and Values George F. McLean, Orlino Antonio Pegoraro, 1989 To find more information about Rowman and Littlefield titles please visit [www.rowmanlittlefield.com](http://www.rowmanlittlefield.com) **Childhood Education**, 1975 Includes music **Empowering Children** R. Brian Howe, Katherine Covell, 2007-06-09 Approved by the General Assembly of the United Nations in 1989 the United Nations Convention on the Rights of the Child affirms that children in all countries have fundamental rights including rights to education To date 192 states are signatories to or have in some form ratified the accord Children are still imperilled in many countries however and are often not made aware of their guaranteed rights In *Empowering Children* R. Brian Howe and Katherine Covell assert that educating children about their basic rights is a necessary means not only of fulfilling a country's legal obligations but also of advancing education about democratic principles and the practice of citizenship The authors contend that children's rights education empowers children as persons and as rights respecting citizens in democratic societies Such education has a contagion effect that brings about a general social knowledge on human rights and social responsibility Although there remain obstacles to the implementation of children's rights in many countries Howe and Covell argue that reforming schools and enhancing teacher education are absolutely essential to the creation of a new culture of respect toward children as citizens Their thorough and passionate work marks a significant advance in the field
