Emerging Influentials In State Legislatures Women Blacks And Hispanics:

Emerging Influentials in State Legislatures Albert Nelson, 1991-06-30 Although representation by women blacks and Hispanics in state legislatures has increased greatly in recent decades the significance of these gains has not been systematically evaluated Albert Nelson's study explores several important questions in this area Does greater representation in fact result in proportionally greater influence in political parties and policy outcomes How do party affiliation gender and other variables affect the political fortunes of these groups And what is the impact of party affiliation on their turnover rates in legislatures Nelson scrutinizes the factors that influence minority and female incorporation into the legislative process including opportunity and incentives party affiliation religion employment and cultural elements He examines differences in legislative representation in the North and South In addition he assesses party representation according to gender minority group and political affiliation and investigates differences in turnover rates between Democrats and Republicans Nelson explains how these elements translate into practical political results in both legislatures and the power base provided by political parties The final chapter provides an overview of Nelson's findings and identifies promising areas for continuing research Based on a statistical analysis of state legislatures in the 1980s this book will be a useful resource for scholars and students in political science the social sciences minorities studies and women's studies

African American Legislators in the American States Kerry Lee Haynie, 2001 Has black inclusion in the political process changed political institutions and led to more black influence in the governmental process How do African American legislators balance racial interests with broader issues of government And how is their effectiveness subjectively perceived and objectively evaluated In one of the first book length studies to analyze the behavior of African American state legislators in multiple legislative sessions across five states Kerry Haynie has compiled a wealth of valuable data that reveals the dynamics and effectiveness of black participation in the legislative process Owing to the increasing role of state government in administering what he defines as key black issues education healthcare poverty social welfare civil rights and children's issues Haynie focuses on bills introduced in these categories in Arkansas Illinois Maryland New Jersey and North Carolina The book reveals how responsive political institutions have been to the nation's largest minority group It explores the question of how legislators deal with the duality dilemma which requires them to be both responsible legislators and race representatives and whether agendas should be deracialized in order to appeal to a broader constituency Along with numerous statistical charts illustrating everything from representation on house standing committees to a ranking of the fifteen legislative sessions by quartiles of African American political incorporation a useful and revealing portrait emerges one that will fuel debate and inform future discussions of the role of African Americans in the political process

Gender, Race, and Office Holding in the United States Becki Scola, 2013-12-04 Over the past several decades the number of women elected to higher office in the United States has grown substantially However when the electoral gains of women are considered on a state by state basis there are

observable variations in the rate by state at which women are elected to state legislative office Scholars have noted an additional variation in women office holders that women of color serve at higher rates than white women Becki Scola's book provides an explanation for these two interrelated puzzles on electoral gender gaps She examines the factors surrounding the uneven proportional distribution of female legislators and then explores why gender appears to be an advantage for women of color office holders Through an examination of the divergent state level institutional and environmental conditions Scola maps out the factors that contribute to more or less female legislative service and how race ethnicity intersects with these conditions She reveals that the common conceptions and theories that help us understand women's office holding in general do not equally apply to both white women and women of color's legislative service The first book length study to analyze how race informs gender in terms of patterns of office holding *Gender Race and Office Holding in the United States* provides insight into both underrepresentation in general as well as the underlying dynamics of representation within specific groups of women *Legislative Leadership in the American States* Malcolm E. Jewell, Marcia Lynn Whicker, 1994 A

Term Limits and the Dismantling of State Legislative Professionalism Thad Kousser, 2005 The wisdom of term limits and professional politics has been debated since the time of Aristotle spurring reforms of legislatures in Athens Rome Venice and in the US under the Articles of Confederation This book examines recent trends in American states in order to investigate the age old question of how the rules that govern a legislature affect the behavior of its members and the policies that it produces The clear and consistent finding is that the two reforms have countervailing effects whatever professionalization has brought more of term limits have reduced This lesson comes from quantitative analyses of data from all fifty states and detailed examinations of legislative records from six states informed by interviews with over one hundred

legislators staff assistants lobbyists journalists and executive officials *The African-American Male* Jacob U. Gordon, 1999-07-30 The plight of the Black male in American society has been well documented by scholars and practitioners Although Black males represent only 6 percent of the American population they represent about 40 percent of the prison population the number of Black males in prison and jail exceeds the number of Black males in higher education The homicide rates for Black males were 72.5 percent per 100,000 nearly eight times higher than for White males This bibliographic volume explores the extent to which American academia has addressed these problems It will be an invaluable resource for researchers as well as practitioners in social service programs In addition to more than 400 annotated publications the book includes a selected list of works on the African American male and a compilation of doctoral dissertations This publication will serve as a reference in public as well as academic libraries human service agencies government policymaking agencies and in academic courses in gender and ethnic studies criminal justice and social psychology *Gendering Legislative Behavior* Tiffany D. Barnes, 2016-06-30 In democracies power is obtained via competition Yet as women gain access to parliaments in record numbers worldwide collaboration appears to be on the rise This is puzzling why if politicians can secure power through competition would we observe collaboration in Congress Using evidence from 200 interviews with politicians from Argentina and a novel dataset from 23 Argentine legislative chambers over an 18 year period *Gendering Legislative Behavior* reexamines traditional notions of competitive democracy by evaluating patterns of collaboration among legislators Although only the majority can secure power via competition all legislators particularly those who do not have power can influence the policy making process through collaboration Tiffany D Barnes argues that as women have limited access to formal and informal political power they collaborate more than men to influence policy making Despite the benefits of collaboration patterns of collaboration vary among women because different legislative contexts either facilitate or constrain women's collaboration *Ethnicity, Race, and Crime* Darnell F. Hawkins, 1995-02-16 Researchers have long noted that rates of reported crime and punishment are higher for some ethnic and racial groups in the U.S than for others Comparatively high rates of crime have been reported for white ethnic Americans during the past and some groups of racial minorities today These observations have prompted much public debate and acrimony but surprisingly little research Contributors include Thomas A Regulus Joan McCord M Craig Brown and Barbara D Warner Eric Monkkonen E M Beck and Stewart E Tolnay Martha A Myers Gary LaFree Robert D Crutchfield Dorothy Lockwood Anne E Pottieger and James A Inciardi William Chambliss Coramae Richey Mann Theodore G Chiricos and Charles Crawford Zoann Snyder Joy Roland Chilton Raymond Teske and Harald Arnold Pamela Irving Jackson and Darnell F Hawkins **Latino Politics in Massachusetts** Carol Hardy-Fanta, Jeffrey Gerson, 2014-01-14 This collection of original essays explores the major challenges to Latino political representation in cities where Latino populations do not make up the majority of the population and therefore cannot rely on sheer numbers to gain representation **Racism in Contemporary America** Meyer

Weinberg,1996-05-23 Racism in Contemporary America is the largest and most up to date bibliography available on current research on the topic It has been compiled by award winning researcher Meyer Weinberg who has spent many years writing and researching contemporary and historical aspects of racism Almost 15 000 entries to books articles dissertations and other materials are organized under 87 subject headings In addition there are author and ethnic racial indexes Several aids help the researcher access the materials included In addition to the subject organization of the bibliography entries are annotated whenever the title is not self explanatory An author index is followed by an ethnic racial index which makes it convenient to follow a single group through any or all the subject headings This is a source book for the serious study of America s most enduring problem as such it will be of value to students and researchers at all levels and in most disciplines
