Emigrant Homecomings The Return Movement Of Emigrants 1600 :

Victorian Narratives of Failed Emigration Tamara S Wagner, 2016-05-26 In her study of the unsuccessful nineteenth century emigrant Tamara S Wagner argues that failed emigration and return drive nineteenth century writing in English in unexpected culturally revealing ways Wagner highlights the hitherto unexplored subgenre of anti emigration writing that emerged as an important counter current to a pervasive emigration propaganda machine that was pressing popular fiction into its service The exportation of characters at the end of a novel indisputably formed a convenient narrative solution that at once mirrored and exaggerated public policies about so called superfluous or redundant parts of society Yet the very convenience of such pat endings was increasingly called into question New starts overseas might not be so easily realizable emigration destinations failed to live up to the inflated promises of pro emigration rhetoric the unwanted might make a surprising reappearance Wagner juxtaposes representations of emigration in the works of Charles Dickens Wilkie Collins Frances Trollope and Charlotte Yonge with Australian New Zealand and Canadian settler fiction by Elizabeth Murray Clara Cheeseman and Susanna Moodie offering a new literary history not just of nineteenth century migration but also of transoceanic exchanges and genre formation

Waiting Territories in the Americas Alain Musset, Laurent Vidal, 2016-09-23 Mobility and displacement are major characteristics of contemporary societies These population shifts are far from fluid homogeneous or linear but are instead interspersed with a range of longer or shorter periods of waiting Whether these intervals are technically administratively or politically motivated they are often understood in spatial terms waiting societies have a territorial dimension This volume examines and assesses the many forms that waiting territories take in order to better understand their various juridical statuses their relationships with their spatial environment and specific forms of temporality and the various economic and social relationships which they foster The contributions primarily focus on the Americas because this continent is the product of the voluntary or forced displacement of various population groups that have themselves left their mark on the territories which they have appropriated The book is divided into five parts Part I The Genealogy and Stakes of Waiting Situations

presents waiting as a state of mobility Part II When Waiting Defines a Territory focuses on the spatial implications of situations of waiting Part III Social Practices and Spatial Dynamics in Waiting Territories explores the ways in which people inhabit waiting territories Part IV Waiting Territories and the Challenges to Identity examines the mutations of identity in situations of waiting and Part V The Memory Heritage and Curation of Waiting Territories looks at the way in which waiting territories can become the focus of heritage practices and the politics of memory

On Many Routes Annemarie Steidl, 2020-11-15 On Many Routes is about the history of human migration With a focus on the Habsburg Empire this innovative work presents an integrated and creative study of spatial mobilities from short to long term and intranational and inter European to transatlantic Migration was not just relegated to city folk but likewise was the reality for rural dwellers and we gain a better understanding of how sending and receiving states and shipping companies worked together to regulate migration and shape populations Bringing historical census data governmental statistics and ship manifests into conversation with centuries old migration patterns of servants agricultural workers seasonal laborers peddlers and artisans both male and female this research argues that Central Europeans have long been mobile that this mobility has been driven by diverse motivations and that post 1850 transatlantic migration was an obvious extension of earlier spatial mobility patterns Demonstrating the complexity of human mobility via an exploration of the links between overseas continental and internal migrations On Many Routes shows that migrations to the United States to the nearest coalfield and to the urban capitals are embedded within complicated patterns of movement There is no good reason to study internal apart from transnational moves and combining these fields brings ample possibility to make migration research more relevant for the much broader field of social and economic history This work poses an invaluable resource to the understudied area of

Habsburg Empire migration studies which it relocates within its wider European context and provides a major methodological contribution to the history of human migration more broadly The ubiquity and functionality of human movement sheds light on the relationship between human nature and society and challenges simplistic notions of human mobility then and now [The Upper Guinea Coast in Global Perspective](#) Jacqueline Knörr, Christoph Kohl, 2016-02 For centuries Africa's Upper Guinea Coast region has been the site of regional and global interactions with societies from different parts of the world engaging in economic trade cultural exchange and conflict This book examines how such encounters have continued into the present day This title was made Open Access by libraries from around the world through Knowledge Unlatched

migration history based on life histories but exploring mentalities as well as experiences against a setting of deep social and economic change Key moments are the 1970s loss of Britons privilege in Commonwealth destination countries Thatcher s refugees in the 1980s and shifting attitudes to cosmopolitanism and global citizenship by the 1990s It charts a long process of change from the 1960s to patterns of discretionary and nomadic migration which became more common practice from the end of the twentieth century Memory, Migration and Travel Sabine Marschall,2018-05-16 Migration and forcible displacement are growing and impactful dynamics of the current global age These processes generate mobility flows travel patterns and touristic behaviour driven by personal and collective memories The chapters in this book highlight the importance of travel and tourism for enabling such memories and memory based identity practices to unfold This book investigates how diasporic communities transnational migrants refugees and the internally displaced recreate home in their host place of residence through material culture performativity and social relations and how involuntary tangible and intangible stimuli evoke memories of home It explores an array of diverse geographical contexts balancing ethnographic vignettes of contemporary migrant societies with archival research providing historical accounts that reach back more than a century Memory Migration and Travel makes an original contribution by linking the emergent field of memory studies to the disciplines of tourism and migration diaspora studies and will be of interest to students and researchers in the fields of tourism geography migration diaspora studies anthropology and sociology **Links to the Diasporic Homeland** Russell King,Anastasia Christou,Peggy Levitt,2015-10-14 This book examines return mobilities to and from ancestral homelands of the second generation and beyond It presents cutting edge empirical research framed within the mobilities transnational and return migration diaspora paradigms on a trans local and global scale The book is unique in presenting not only a variety of return movements including short term visits and longer term return migrations but also circulatory movements within transnational social fields while engaging with notions of home belonging identity and generation The individual contributions range widely over different ethnic national regional and global settings including Europe North America the Caribbean the Gulf and Africa The result is a remapping of the conceptualisation of diaspora and of the role of successive generations in the diasporic experience as well as a nuancing of the concepts of return migration and transnationalism by their extension to the second and subsequent generations of immigrants This book was originally published as a special issue of Mobilities *East European Diasporas, Migration, and Cosmopolitanism* Ulrike Ziemer,Sean P. Roberts,2013 Following the collapse of the communist regimes in Eastern Europe and the Soviet Union there were considerable migration flows the migrations and subsequent diasporas often having special characteristics given the relative lack of migration in communist times and the climate of increasing nationalism which had the potential of working against multiculturalism This book explores these migrations and diasporas and examines the nature of the associated cosmopolitanism *British and Irish diasporas* Donald MacRaild,Tanja Bueltmann,J. C. D. Clark,2019-01-07 People from the British and Irish Isles have for

centuries migrated to all corners of the globe. Wherever they went the English Irish Scots Welsh and even sub national supra regional groups like the Cornish co mingled blended and blurred. Yet while they gradually integrated into new lives in far flung places British and Irish Isle emigrants often maintained elements of their distinctive national cultures which is an important foundation of diasporas. Within this wider context this volume seeks to explore the nature and characteristics of the British and Irish diasporas stressing their varying origins and evolution the developing attachments to them and the differences in each nation's recognition of their own diaspora. The volume thus offers the first integrated study of the formation of diasporas from the islands of Ireland and Britain with a particular view to scrutinizing the similarities differences tensions and possibilities of this approach.

Britain's Experience of Empire in the Twentieth Century

Andrew Thompson, 2016-11-24. Written by specialists from various fields this edited volume is the first systematic investigation of the impact of imperialism on twentieth century Britain. The contributors explore different aspects of Britain's imperial experience as the empire weathered the storms of the two world wars was subsequently dismantled and then apparently was gone. How widely was the empire's presence felt in British culture and society? What was the place of imperial questions in British party politics? Was Britain's status as a global power enhanced or underpinned by the existence of its empire? What was the relation of Britain's empire to national identities within the United Kingdom? The chapters range widely from social attitudes to empire and the place of the colonies in the public imagination to the implications of imperialism for demography trade party politics and political culture government and foreign policy the churches and civil society and the armed forces. The volume also addresses the fascinating yet complex question of how after the formal end of empire the colonial past has continued to impinge upon our post colonial present as contributors reflect upon the diverse ways in which the legacies of empire are interpreted and debated in Britain today.

Empire and Globalisation

Gary B. Magee, Andrew S. Thompson, 2010-02-11. Focusing on the great population movement of British emigrants before 1914 this book provides a perspective on the relationship between empire and globalisation. It shows how distinct structures of economic opportunity developed around the people who settled across a wider British World through the co ethnic networks they created. Yet these networks could also limit and distort economic growth. The powerful appeal of ethnic identification often made trade and investment with racial outsiders less appealing thereby skewing economic activities toward communities perceived to be British. By highlighting the importance of these networks to migration finance and trade this book contributes to debates about globalisation in the past and present. It reveals how the networks upon which the era of modern globalisation was built quickly turned in on themselves after 1918 converting racial ethnic and class tensions into protectionism nationalism and xenophobia. Avoiding such an outcome is a challenge faced today.
