theory to the furthest limits of its capabilities It invites the reader to re examine a few of the most basic concepts underlying the practice of psychotherapy What is emotion What is a defense mechanism It begins with emotion theory an area of academic study that has traditionally been neglected in psychotherapy training programs Throughout the book it is argued that the patient s experience of emotion is critical for a successful outcome in therapy and that the therapist s understanding of emotion will provide a solid theoretical foundation for practice Attachment theory is also used extensively throughout the book Case examples offer interventions that are designed to translate the theory into practical applications In the middle chapters of the book these basic ideas emotion theory and attachment theory are applied in an extended case example using ample segments of verbatim dialogue Memory theory is used to explain some of the treatment failures in dynamic psychotherapy Memory theory can lead to a revised approach that provides more durable outcomes Dynamic psychotherapy has largely been a therapy of bad memories therefore a systematic approach to focusing on positive memories of early attachment experiences is outlined We must not only help the patient to face negative memories of his past we must also help revive and strengthen positive memories until they have trace dominance over negative ones Finally the possibility that dynamic psychotherapy can lead to spiritual growth is explored Early parent child experiences of oneness can serve as the developmental precursors of the spiritual experience Some of the child development literature including Mahler s notion of symbiosis is reviewed Some preliminary work with patients is presented in which they are invited to broaden their new emotional connection with a parent and others until it leads to a greater sense of spiritual connection and o The Initial Interview in Psychotherapy Hermann Argelander,1976 **Attachment Volume 2 Number 1** Joseph Schwartz,Kate White,2008-03-31 Attachment New Directions in Psychotherapy and Relational Psychoanalysis is a leading edge journal for clinicians working relationally with their clients It is a professional journal featuring cultural articles politics reviews and poetry relevant to attachment and relational issues an inclusive journal welcoming contributions from clinicians of all orientations seeking to make a contribution to attachment approaches to clinical work an international journal open to ideas and practices from all countries and cultures and a cutting edge journal with up to date briefings on latest developments in neuroscience relevant to psychotherapy and counselling Articles What Is To Be Done Reflections on the Bowlby Centenary Year by Rachel Wingfield Can Attachment Theory Help Explain the Relationship Between Childhood Adversity and Psychosis by John Read and Andrew Gumley Genetics and Schizophrenia Part 1 What Is What Exactly by Joseph Schwartz A Study of Professional Curiosity in Non Directive Play Therapy and its Link to Attachment by Angela S Garden Listening to People Who Do Not Speak Attachment Communication and Meaning in Work with Disabled Adults and Children by Jane Kitsen Positive Thinking Does Not Stop Bad Things Happening An Attachment Approach to Compulsive Obsessional Phenomena by Orit Badouk Epstein Through A Lens Darkly Working with a CCTV Team in Trouble by Andy Metcalf Embracing Dissociation by Emerald Davis The Move from Categories to Process Attachment Phenomena and Clinical Evaluation by Arietta Slade *The*
