## **Empire And Imperialism The Debate Of The 1870s:**

Empire And Imperialism Peter Cain, 1999-03-15 The 1870s is a key decade in the evolution of British thinking about the nature purpose and future of empire Increasing economic competition began to disturb the complacent assumption about Britain's leadership in technology and in the world economy The growth of other countries most notably the United States and Germany who had both displayed a fearsome military might also put a question mark over Britain's survival as a great power These changes set in motion a reappraisal of Britain's empire and its importance to the motherland and a heated debate as to whether colonialism and imperialism were a burden rather than a benefit to Britain The discussion on the 1870s set the agenda for the debates of the next half century This volume documents the writings that were central to this debate It includes contributions by leading British thinkers statesmen and officials such as J A Froude Robert Lowe Edward Dicey Frederic Seebohm Lord Carnarvon Gladstone Julius Vogel and Lord Blachford highlights the beginnings of a debate still in progress about Britain's decline as an economic power makes available a large number of writings that were previously hard to access and reassesses some previously underestimated or ignored articles **British Imperialism** P.J. Cain, A. G.

Hopkins, 2014-01-14 A milestone in the understanding of British history and imperialism and truly global in its reach this magisterial account received numerous accolades from reviewers in its first edition The first to coin the phrase gentlemanly capitalism Cain and Hopkins make the strong and provocative argument that it is impossible to understand the nature and evolution of British imperialism without taking account of the peculiarities of her economic development In particular the growth of the financial sector and above all the City of London played a crucial role in shaping the course of British history and Britain's relations overseas Now with a substantive new introduction and a conclusion the scope of the original account has been widened to include an innovative discussion of globalization *The Lost History of Liberalism* Helena

Rosenblatt, 2020-02-04 The Lost History of Liberalism challenges our most basic assumptions about a political creed that has become a rallying cry and a term of derision in today's increasingly divided public square Taking readers from ancient Rome to today Helena Rosenblatt traces the evolution of the words liberal and liberalism revealing the heated debates that have taken place over their meaning In this timely and provocative book Rosenblatt debunks the popular myth of liberalism as a uniquely Anglo American tradition centered on individual rights It was only during the Cold War and America's growing world hegemony that liberalism was refashioned into an American ideology focused so strongly on individual freedoms

**Political Intellectuals and Public Identities in Britain Since 1850** Julia Stapleton, 2001 Political intellectuals and public identities in Britain since 1850 will be of interest to scholars and advanced undergraduates in the fields of political thought and British intellectual and cultural history It will also be of interest to a wider community of writers and commentators on the politics of English and British national identity **BOOK JACKET** **Narrative Reliability, Racial**

**Conflicts and Ideology in the Modern Novel** Marta Puxan-Oliva, 2019-03-07 How does racial ideology contribute to the

exploration of narrative voice How does narrative unreliability help in the production and critique of racial ideologies  
 Through a refreshing comparative analysis of well established novels by Joseph Conrad William Faulkner James Weldon  
 Johnson Albert Camus and Alejo Carpentier this book explores the racial politics of literary form Narrative Reliability Racial  
 Conflicts and Ideology in the Modern Novel contributes to the emergent attention in literary studies to the interrelation of  
 form and politics which has been underexplored in narrative theory and comparative racial studies Bridging cultural  
 postcolonial racial studies and narratology this book brings context specificity and awareness to the production of ideological  
 ambivalent narrative texts that through technical innovation in narrative reliability deeply engage with extremely violent  
 episodes of colonial origin in the United Kingdom the United States Algeria and the French and Spanish Caribbean In this  
 manner the book reformulates and expands the problem of narrative reliability and highlights the key uses and production of  
 racial discourses so as to reveal the participation of experimental novels in early and mid 20th century racial conflicts which  
 function as test case to display a broad new area of study in cultural and political narrative theory **Journal of the**

**Co-operation and Transfer, 1870-1930**, 2015-08-27 Conflict and competition between imperial powers has long been a  
 feature of global history but their co operation has largely been a peripheral concern Imperial Co operation and Transfer  
 1870 1930 redresses this imbalance providing a coherent conceptual framework for the study of inter imperial collaboration  
 and arguing that it deserves an equally prominent position in the field Using a variety of examples from across Asia Europe  
 and Africa this book demonstrates the ways in which empires have shared and exchanged their knowledge about imperial  
 governance including military strategy religious influence and political surveillance It asks how when and where these  
 partnerships took place and who initiated them Not only does this book fill an empirical gap in the study of imperial history it  
 traces ideas of empire from their conception in imperial contact zones to their implementation in specific contexts As such  
 this is an important study for imperial and global historians of all specialisms Race and Imperial Defence in the British  
World, 1870-1914 John C. Mitcham, 2016-03-17 The first comprehensive account of the cultural and racial origins of the  
 imperial security partnership between Britain Canada Australia New Zealand and South Africa Drawing on research from  
 every corner of the globe John C Mitcham merges studies of diplomacy defense strategy and politics with a wider analysis of  
 society and popular culture and in doing so poses important questions about race British identity and the idea of empire The  
 book examines diverse subjects such as the South African War the Anglo German naval arms race Queen Victoria's Diamond  
 Jubilee and the birth of the Boy Scout Movement and positions them within the larger phenomenon of British race patriotism  
 that permeated the fin de siècle Most importantly Mitcham demonstrates how this shared concept of Britishness gradually led  
 to closer relations between the self governing states of the empire and ultimately resulted in a remarkably unified effort

*The Dutch Empire between Ideas and Practice, 1600–2000* René Koekoek, Anne-Isabelle Richard, Arthur Weststeijn, 2019-11-18 This volume explores the intellectual history of the Dutch Empire from a long term and global perspective analysing how ideas and visions of empire took shape in imperial practice from the seventeenth century to the present day. Through a series of case studies the volume critically unearths deep rooted conceptions of Dutch imperial exceptionalism and shows how visions of imperial rule were developed in metropolitan and colonial contexts and practices. Topics include the founding of the Dutch chartered companies for colonial trade, the development of commercial and global visions of empire in Europe and Asia, the continuities and ruptures in imperial ideas and practices around 1800 and the practical making of empire in colonial court rooms and radio broadcasting. Demonstrating the relevance of a long term approach to the Dutch Empire the volume showcases how the intellectual history of empire can provide fresh light on postcolonial repercussions of empire and imperial rule. Chapter 1, Chapter 3, Chapter 7 and Chapter 8 of this book are available open access under a CC BY 4.0 license at [link.springer.com](https://link.springer.com). Problems of British Economic Policy, 1870-1945 Jim Tomlinson, 2013-11-05 Most historical accounts of economic policy set out to describe the way in which governments have attempted to solve their economic problems and to achieve their economic objectives. Jim Tomlinson however focuses on the problems themselves, arguing that the way in which areas of economic policy become problems for policy makers is always problematic itself, that it is never obvious and never happens naturally. This approach is quite distinct from the Marxist, the Keynesian or the neo classical accounts of economic policy, the schools of thought which are described and criticized in the introduction. Subsequent chapters use the issues of unemployment, the gold standard and problems of trade and Empire to demonstrate that these competing accounts all obscure the true complexities of the process. Because they adhere to simple assumptions about the role of economic theory or of vested interests, previous histories have been unable adequately to explain the dramatic change after the First World War in attitudes to unemployment, for instance, or the decision to return to gold in 1925. Jim Tomlinson surveys the institutional circumstances, the conflicting political pressures and the theories offered at the time in an attempt to discover the conditions which characterized the questions as economic problems and contributed

to the choice of solutions The result is a sophisticated and intellectually compelling account of matters which have remained at the forefront of political debate since its first publication in 1981 Colonialism in Africa 1870-1960: Volume 4 L. H. Gann, Peter Duignan, 1969 A comprehensive study of recent African history examining the political social and economic effects of colonialism The Politics of Imperial Memory in France, 1850-1900 Christina B. Carroll, 2022-05-15 By highlighting the connections between domestic political struggles and overseas imperial structures The Politics of Imperial Memory in France 1850 1900 explains how and why French Republicans embraced colonial conquest as a central part of their political platform Christina B Carroll explores the meaning and value of empire in late nineteenth century France arguing that ongoing disputes about the French state s political organization intersected with racialized beliefs about European superiority over colonial others in French imperial thought For much of this period French writers and politicians did not always differentiate between continental and colonial empire By employing a range of sources from newspapers and pamphlets to textbooks and novels Carroll demonstrates that the memory of older continental imperial models shaped French understandings of and justifications for their new colonial empire She shows that the slow identification of the two types of empire emerged due to a politicized campaign led by colonial advocates who sought to defend overseas expansion against their opponents This new model of colonial empire was shaped by a complicated set of influences including political conflict the legacy of both Napoleons international competition racial science and French experiences in the colonies The Politics of Imperial Memory in France 1850 1900 skillfully weaves together knowledge from its wide ranging source base to articulate how the meaning and history of empire became deeply intertwined with the meaning and history of the French nation

*Welfare and Social Policy in Britain Since 1870* Lawrence Goldman, 2019-01-24 This collection of twelve essays reviews the history of welfare in Britain over the past 150 years It focuses on the ideas that have shaped the development of British social policy and on the thinkers who have inspired and also contested the welfare state It thereby constructs an intellectual history of British welfare since the concept first emerged at the end of the nineteenth century The essays divide into four sections The first considers the transition from laissez faire to social liberalism from the 1870s and the enduring impact of late Victorian philosophical idealism on the development of the welfare state It focuses on the moral philosophy of T H Green and his influence on key figures in the history of British social policy like William Beveridge R H Tawney and William Temple The second section is devoted to the concept of planning which was once in the mid twentieth century at the heart of social policy and its implementation but which has subsequently fallen out of favour A third section examines the intellectual debate over the welfare state since its creation in the 1940s Though a consensus seemed to have emerged during the Second World War over the desirability and scope of a welfare state extending from the cradle to the grave libertarian and conservative critiques endured and re emerged a generation later A final section examines social policy and its implementation more recently both at grass roots level in a study of community action in West London in the districts made infamous by the fire at

Grenfell Tower in 2017 and at a systemic level where different models of welfare provision are shown to be in uneasy co-existence today The collection is a tribute to Jose Harris emeritus professor of history in the University of Oxford and a pioneer of the intellectual history of social policy Taken together these essays conduct the reader through the key phases and debates in the history of British welfare

**Africa in the Colonial Ages of Empire** Mentan, Tatab, 2017-12-16 Words like colonialism and empire were once frowned upon in the U S and other Western mainstream media as worn out left wing rhetoric that didn't fit reality Not anymore Tatab Mentan observes that a growing chorus of right wing ideologues with close ties to the Western administrations war making hawks in NATO are encouraging Washington and the rest of Europe to take pride in the expansion of their power over people and nations around the globe Africa in the Colonial Ages of Empire is written from the perspective that the scholarly lives of academics researching on Africa are changing constantly in flux and increasingly bound to the demands of Western colonial imperialism This existential situation has forced the continent to morph into a tool in the hands of Colonial Empire According to Tatab Mentan the effects of this existential situation of Africa compel serious academic scrutiny At the same time inquiry into the African predicament has been changing and evolving within and against the rhythms of this new normal of Colonial Empire Old or New The author insists that the long and bloody history of imperial conquest that began with the dawn of capitalism needs critical scholarly examination As Marx wrote in Capital The discovery of gold and silver in America the extirpation enslavement and entombment in mines of the aboriginal population the beginning of the conquest and looting of the East Indies the turning of Africa into a warren for the commercial hunting of black skins signaled the rosy dawn of the era of capitalist production These idyllic proceedings are the chief moment of primitive accumulation Africa in the Colonial Ages of Empire is therefore a MUST READ for faculty students as well as policy makers alike in the changing dynamics of their profession be it theoretically methodologically or structurally and materially

**Forthcoming Books** Rose Arny, 1998-06 [British Businessmen and Canadian Confederation](#) Andrew Smith, 2008-07-16 Andrew Smith discusses the role of British investors in Canadian Confederation covering the period from the construction of the Grand Trunk Railroad in the 1850s to Canada's purchase of Rupert's Land in 1869-70 He describes how some investors lobbied the British government for the policies that made Confederation possible working closely with the Fathers of Confederation many of whom were participants in the same trans Atlantic crony capitalist system British factory owners with classical liberal beliefs however disliked Confederation because they believed it would delay the political independence of the North American colonies something they saw as beneficial

*Capital and Colonialism* Klas Rönnbäck, Oskar Broberg, 2019-07-11 This book engages in the long standing debate on the relationship between capitalism and colonialism Specifically Rönnbäck and Broberg study the interaction between imperialist policies colonial institutions and financial markets Their primary method of analysis is examining micro and macro level data relating to a large sample of ventures operating in Africa and traded on the London Stock Exchange between 1869 and 1969 Their study shows that the

relationship between capital and colonialism was highly complex While return from investing in African colonies on average was not extraordinary there were certainly many occasions when investors enjoyed high return due to various forms of exploitation While there were actors with rational calculations and deliberate strategies there was also an important element of chance in determining the return on investment not least in the mining sector which overall was the most important business for investment in African ventures during this period This book finally also demonstrates that the different paths of decolonization in Africa had very diverse effects for investors

*Britishness Since 1870* Paul Ward, 2004 Thematically organized this book examines the forces that have contributed to a sense of Britishness and how this has been mediated by other identities such as class gender region ethnicity and the sense of belonging to the UK and Ireland

Empires Michael Doyle, 2018-09-05 Although empires have shaped the political development of virtually all the states of the modern world imperialism has not figured largely in the mainstream of scholarly literature This book seeks to account for the imperial phenomenon and to establish its importance as a subject in the study of the theory of world politics Michael Doyle believes that empires can best be defined as relationships of effective political control imposed by some political societies those called metropolises on other political societies called peripheries To build an explanation of the birth life and death of empires he starts with an overview and critique of the leading theories of imperialism Supplementing theoretical analysis with historical description he considers episodes from the life cycles of empires from the classical and modern world concentrating on the nineteenth century scramble for Africa He describes in detail the slow entanglement of the peripheral societies on the Nile and the Niger with metropolitan power the survival of independent Ethiopia Bismarck's manipulation of imperial diplomacy for European ends the race for imperial possession in the 1880s and the rapid setting of the imperial sun Combining a sensitivity to historical detail with a judicious search for general patterns Empires will engage the attention of social scientists in many disciplines
