Empirical Knowledge Readings From Contemporary Sources:

Empirical Knowledge; Readings From Contemporary Sources, Edited by Roderick M. Chisholm and Robert J. Swartz Roderick M. Chisholm (Comp),1973 Roderick M. Chisholm R. Bogdan,2013-03-09 The aim of this series is to inform both professional philosophers and a larger readership of social and natural scientists methodologists mathematicians students teachers publishers etc about what is going on who s who and who does what in contemporary philosophy and logic PROFILES is designed to present the research activity and the results of already outstanding personalities and schools and of newly emerging ones in the various fields of philosophy and logic There are many Festschrift volumes dedicated to various philosophers There is the celebrated Library of Living Philosophers edited by P A Schilpp whose format influenced the present enterprise Still they can only cover very little of the contemporary philosophical scene Faced with a tremendous expansion of philosophical information and with an almost frightening division of labor and increasing specialization we need systematic and regular ways of keeping track of what happens in the profession PROFILES is intended to perform such a function Each volume is devoted to one or several philosophers whose views and results are presented and discussed The profiled philosophers will summarize and review their own work in the main fields of significant contribution This work will be discussed and evaluated by invited contributors Relevant historical and or biographical data an up to date bibliography with short abstracts of the most important works and whenever possible references to significant reviews and discussions will also be included *Empirical Knowledge; Readings from Contemporary Sources* Roderick M. Chisholm,Robert J. Swartz,1973 The various essays in this book most of which were first published after World War II and all but one of which belong to the present century may be thought of as growing out of contemporary attempts to deal with the ancient problem of the criterion **Empirical Knowledge** Roderick M. Chisholm (comp),1973 Epistemology: Contemporary Readings Michael Huemer,2006-03-10 This comprehensive anthology draws together classic and contemporary readings by leading philosophers on epistemology Ideal for any philosophy student it will prove essential reading for epistemology courses and is designed to complement Robert Audi s textbook *Epistemology A Contemporary Introduction* Routledge 1998 Themes covered include perception memory inductive inference reason and the a priori the architecture of knowledge skepticism the analysis of knowledge testimony Each section begins with an introductory essay guiding students into the topic Includes articles by Russell Hume Berkeley Malcolm Quine Carnap J L Austin Pollock Nozick Putnam G E Moore Huemer Reid Plato Bonjour Coady Carroll Fumerton Edwards Foster Howson Urbach Stove Empiricus Oakley Alston Gettier Clark Goldman Lehrer Paxson DeRose Dretske Klein and Chisholm **Perceptual Knowledge** Georges Dicker,2012-12-06 This book grew out of the lectures that I prepared for my students in epistemology at SUNY College at Brockport beginning in 1974 The conception of the problem of perception and the interpretation of the sense datum theory and its supporting arguments that are developed in Chapters One through Four originated in these lectures

The rest of the manuscript was first written during the 1975 1976 academic year while I held an NEH Fellowship in Residence for College Teachers at Brown University and during the ensuing summer under a SUNY Faculty Research Fellowship I wish to express my sincere gratitude to the National Endowment for the Humanities and to the Research Foundation of the State University of New York for their support of my research I am grateful to many former students colleagues and friends for their stimulating constructive comments and criticisms Among the former students whose reactions and objections were most helpful are Richard Motroni Donald Callen Hilary Porter and Glenn Shaikun Among my colleagues at Brockport I wish to thank Kevin Donaghy and Jack Glickman for their comments and encouragement I am indebted to Eli Hirsch for reading and commenting most helpfully on the entire manuscript to Peter M Brown for a useful correspondence concerning key arguments in Chapters Five and Seven to Keith Lehrer for a criticism of one of my arguments that led me to make some important revisions and to Roderick M

An Introduction to the Theory of Knowledge Noah Lemos, 2020-11-26 Now revised and containing three new chapters this book provides a clear and accessible introduction to epistemology or the theory of knowledge It discusses some of the main theories of justification including foundationalism coherentism reliabilism and virtue epistemology Other topics include the Gettier problem internalism and externalism skepticism the problem of epistemic circularity a priori knowledge naturalized epistemology and the epistemic significance of testimony and disagreement Intended primarily for students taking their first classes in epistemology this lucid and well written text will provide an excellent introduction to anyone interested in knowing more about this important area of philosophy

Skepticism about the External World Panayot Butchvarov, 1998 Do we know or even have evidence that external material objects exist Drawing powerfully on techniques from both analytic and continental philosophy Butchvarov offers a strikingly original approach to this perennial issue He argues that only a direct realist view of perception the view that in perception we are directly aware of material objects has any hope of providing a compelling response to the skeptic The seemingly insuperable problem for direct realism has always been to explain hallucination dreaming and other situations where the object of awareness is not a really existing physical object This has led many philosophers to adopt views in which perceptual consciousness involves a subjective state that is the direct object of awareness Butchvarov argues persuasively that all such views are helpless in the face of the skeptic's arguments His radical innovation is to insist that the direct object of perceptual and even dreaming and hallucinatory experience is usually a material object but not necessarily one that actually exists This leads to a sophisticated metaphysics in which reality is ultimately constructed by human decisions out of objects that are ontologically more basic but which cannot be said in themselves to be either real or unreal Butchvarov's ingenious approach to a longstanding philosophical issue as well as the extensive range of his references to traditional and contemporary discussions of the topic makes Skepticism about the External World a thrilling and essential book for philosophers and philosophically minded readers

Copyright Office,1975 **Ludwig Wittgenstein** Stuart Shanker,David Kilfoyle,2002 Wittgenstein scholarship has continued to grow at a pace few could have anticipated a testament both to the fertility of his thought and to the thriving state of contemporary philosophy In response to this ever growing interest in the field we are delighted to announce the publication of a second series of critical assessments on Wittgenstein emphasising both the breadth and depth of contemporary Wittgenstein research As well as papers on the nature and method of Wittgenstein s philosophy this second collection also relates to a broader range of topics including psychology politics art music and culture *Moral Theory and Legal Reasoning* Scott Brewer,1998 A Psychoanalysis of Act and Action Diego Enrique Londoño-Paredes,2025-09-29 A Psychoanalysis of Act and Action brings together the study of the philosophy of action and Jacques Lacan s psychoanalytic theory Drawing on the works of Freud and Lacan this book examines desire and the unconscious as key frameworks for understanding action Londoño Paredes explores key premises in the philosophy of action while demonstrating how these may fall short in light of Lacan s ideas The book proposes an alternative to dominant philosophical interpretations exploring Lacan s framework through concepts such as the graph the act the transgressive act acting out and passage l acte The paradoxes of action along with forms of action that carry moral and symbolic weight are examined from a psychoanalytic perspective helping us to understand the interpretive boundaries of action By intertwining philosophical and psychoanalytic perspectives with clinical illustrations of real crimes the book offers a fresh approach to action and act A Psychoanalysis of Act and Action will be essential for psychoanalytically informed readers interested in Lacan It will also be of interest to academics and scholars of the philosophy of mind and action cultural studies criminology and mental disorders **Philosophy and Computer Science** Timothy Colburn,2015-05-20 Colburn computer science U of Minnesota Duluth has a doctorate in philosophy and an advanced degree in computer science he s worked as a philosophy professor a computer programmer and a research scientist in artificial intelligence Here he discusses the philosophical foundations of artificial intelligence the new encounter of science and philosophy logic models of the mind and of reasoning epistemology and the philosophy of computer science touching on math abstraction software and ontology When in Rome Nancy L. Gifford,1983-06-30 The book deals with an issue that is intrinsically important philosophical relativism and with a topic that an introductory audience would find immediately interesting In short the author has succeeded in addressing a popular audience about an important problem that they will already be interested in because of the prevalence of relativism itself in contemporary culture Carl G Vaught Pennsylvania State University A book of just this introductory sort concerning relativism appealing and usable by undergraduates in precisely this way has been very badly needed for a long time The book fills a very real teaching need Patrick Grim State University of New York at Stony Brook It deals clearly sensitively and very readably with one of the most pervasive stubborn and destructive assumptions among students beginning philosophy Marcia Cavell Aufhauser State University of New York College at Purchase *Scientific Challenges to Common Sense Philosophy* Rik Peels,Jeroen de

Ridder, René van Woudenberg, 2020-05-27 Common sense philosophy holds that widely and deeply held beliefs are justified in the absence of defeaters While this tradition has always had its philosophical detractors who have defended various forms of skepticism or have sought to develop rival epistemological views recent advances in several scientific disciplines claim to have debunked the reliability of the faculties that produce our common sense beliefs At the same time however it seems reasonable that we cannot do without common sense beliefs entirely Arguably science and the scientific method are built on and continue to depend on common sense This collection of essays debates the tenability of common sense in the face of recent challenges from the empirical sciences It explores to what extent scientific considerations rather than philosophical considerations put pressure on common sense philosophy The book is structured in a way that promotes dialogue between philosophers and scientists Noah Lemos one of the most influential contemporary advocates of the common sense tradition begins with an overview of the nature and scope of common sense beliefs and examines philosophical objections to common sense and its relationship to scientific beliefs Then the volume features essays by scientists and philosophers of science who discuss various proposed conflicts between commonsensical and scientific beliefs the reality of space and time about the nature of human beings about free will and identity about rationality about morality and about religious belief Notable philosophers who embrace the common sense tradition respond to these essays to explore the connection between common sense philosophy and contemporary debates in evolutionary biology neuroscience physics and psychology Karl Popper Philip Catton, Graham MacDonald, 2004-08-02 One of the most original thinkers of the century Karl Popper has inspired generations of philosophers historians and politicians This collection of papers specially written for this volume offers fresh philosophical examination of key themes in Popper's philosophy including philosophy of knowledge science and political philosophy Drawing from some of Popper's most important works contributors address his solution to the problem of induction his views on conventionalism and criticism in an open society and his unique position in 20th century philosophy They also examine the current relevance of Popper to understanding liberal democracy his critique of tribalism and his relationship with analytic philosophy in general and with Wittgenstein in particular as well as drawing on the studies of Isaac Newton and Albert Einstein to assess Popper's conception of science Philosophy of Science William Bechtel, 2013-12-16 This text focuses on two major issues the nature of scientific inquiry and the relations between scientific disciplines Designed to introduce the basic issues and concepts in the philosophy of science Bechtel writes for an audience with little or no philosophical background The first part of the book explores the legacy of Logical Positivism and the subsequent post Positivist developments in the philosophy of science The second section examines arguments for and against using a model of theory reduction to integrate scientific disciplines The book concludes with a chapter describing non reductionist approaches for relating scientific disciplines using psycholinguistic and cognitive neuroscience models **The Routledge Handbook of Philosophy of Memory** Sven Bernecker, Kourken Michaelian, 2017-07-14 Memory occupies a fundamental

place in philosophy playing a central role not only in the history of philosophy but also in philosophy of mind epistemology and ethics Yet the philosophy of memory has only recently emerged as an area of study and research in its own right The Routledge Handbook of Philosophy of Memory is an outstanding reference source on the key topics problems and debates in this exciting area and is the first philosophical collection of its kind The forty eight chapters are written by an international team of contributors and divided into nine parts The nature of memory The metaphysics of memory Memory mind and meaning Memory and the self Memory and time The social dimension of memory The epistemology of memory Memory and morality History of philosophy of memory Within these sections central topics and problems are examined including truth consciousness imagination emotion self knowledge narrative personal identity time collective and social memory internalism and externalism and the ethics of memory The final part examines figures in the history of philosophy including Aristotle Augustine Freud Bergson Wittgenstein and Heidegger as well as perspectives on memory in Indian and Chinese philosophy Essential reading for students and researchers in philosophy particularly philosophy of mind and psychology the Handbook will also be of interest to those in related fields such as psychology and anthropology Philosophy of Science and Sociology Edmund Mokrzycki,2013-04-15 Originally published in 1983 This book concentrates on the impact of philosophy of science on sociology and other disciplines It argues that the impact of the philosophy of science on sociology from the rise of the Vienna Circle until the mid 1980s resulted in a deep reaching and in the author s view undesirable methodological reorientation in sociology **One Hundred Twentieth-Century Philosophers** Stuart Brown,Diane Collinson,Dr Robert Wilkinson,Robert Wilkinson,2008-02-20 One Hundred Twentieth Century Philosophers offers biographical information and critical analysis of the life work and impact of some of the most significant figures in philosophy this century Taken from the acclaimed Biographical Dictionary of Twentieth Century Philosophers the 100 entries are alphabetically organised from Adorno to Zhang Binglin and cover individuals from both continental and analytic philosophy The entries have an identical four part structure making it easy to compare and contrast information comprising biographical details a bibliography of major works a listing of relevant secondary and critical literature an appraisal of the philosopher s thoughts and achievements A separate glossary provides an introduction to the origins development and main features of major philosophical schools and movements and offers select bibliographies to guide the reader to further research
