Employer Controls Over Private Life:

The Social Origins of Private Life Stephanie Coontz, 2016-02-23 A highly original account of the evolution of the family unit Current debates about the future of the family are often based on serious misconceptions about its past Arguing that there is no biologically mandated or universally functional family form Stephanie Coontz traces the complexity and variety of family arrangements in American history from Native American kin groups to the emergence of the dominant middle class family ideal in the 1890s Surveying and synthesizing a vast range of previous scholarship as well as engaging more particular studies of family life from the seventeenth to the nineteenth centuries Coontz offers a highly original account of the shifting structure and function of American families Her account challenges standard interpretations of the early hegemony of middle class privacy and affective individualism pointing to the rich tradition of alternative family behaviors among various ethnic and socioeconomic groups in America and arguing that even middle class families went through several transformations in the course of the nineteenth century The present dominant family form grounded in close interpersonal relations and premised on domestic consumption of mass produced household goods has arisen Coontz argues from a long and complex series of changing political and economic conjunctures as well as from the destruction or incorporation of several alternative family systems A clear conception of American capitalism's combined and uneven development is therefore essential if we are to understand the history of the family as a key social and economic unit Lucid and detailed **The Social Origins of Private Life** is likely to become the standard history of its subject

Family Disintegration Anton Purcell, 2002 The contemporary family is being distracted disturbed and distraught by societal pressures from every direction The nuclear family concept believed crucial to child rearing is becoming passé according to census data Or has the wave of disruption to families crested It is hoped that this bibliography will serve as a useful tool to researchers seeking further information on families and the pressures being exerted upon them in the 21st century

Employment Privacy Law in the European Union Catarina Castro, 2002 This book contains the national reports and a comparative synthesis regarding the employment privacy law in the European Union It reflects the background research that has been undertaken to prepare a European study conducted with the support of the European Commission DG Employment and Social Affairs The main purpose of this research has been to undertake a comparative study in the European Union on the issue of the protection of workers personal data more in particular concerning the case of surveillance and monitoring The study has focused on the situation in the various Member States of the European Union and has aimed to focus on the extent of the Member State laws and guidelines in this area on whether such laws or existing guidelines adequately protect the worker and on suggestions or recommendations or appropriate guidelines that would ensure suitable protection for the worker in relation to his or her monitoring and surveillance by the employer The research has been undertaken under the supervision of the editor with the cooperation of the contributors who are all specialists in the field of employment privacy Each expert has prepared a country study

regarding the situation in the relevant Member State The national research activities have resulted in a general discussion at a closed expert meeting on 4 and 5 October 2001 organised at the Law Faculty of the University of Leuven Belgium During this seminar country surveys have been further explained and discussed and policy options or suggestions have been looked upon in the examined field of study The comparative overview departs from the horizontal approach of comparativism This means that it integrates all relevant information regarding Member States horizontally throughout the general theme and its appropriate subthemes Contributions to this book are made by C Castro X C V squez M Colucci M Forde A H land T Homan A Johansson L Kanellos J Kristiansen N Melzer G Morris S Nerbonne A von Koskull *Institutional Inequality and the Mobilization of the Family and Medical Leave Act* Catherine R. Albiston, 2010-07-26 How do Family and Medical Leave Act rights operate in practice in the courts and in the workplace This empirical study examines how institutions and social practices transform the meaning of these rights to recreate inequality Workplace rules and norms built around the family wage ideal the assumption that disability and work are mutually exclusive and management s historical control over time all constrain opportunities for social change Yet workers can also mobilize rights as a cultural discourse to change the social meaning of family and medical leave Drawing on theoretical frameworks from social constructivism and new institutionalism this study explains how institutions transform rights to recreate systems of power and inequality but at the same time also provide opportunities for law to change social structure It provides a fresh look at the perennial debate about law and social change by examining how institutions shape the process of rights mobilization **The European Convention on Human Rights and the Employment Relation** Filip Dorssemont, Klaus Lörcher, Isabelle Schömann, 2014-07-18 The accession by the European Union to the European Convention on Human Rights ECHR has opened up new possibilities in terms of the constitutional recognition of fundamental rights in the EU In the field of employment law it heralds a new procedure for workers and trade unions to challenge EU law against the background of the ECHR In theoretical terms this means that EU law now goes beyond recognition of fundamental rights as mere general principles of EU law making the ECHR the gold standard for fundamental social rights This publication of the Transnational Trade Union Rights Working Group focuses on the EU and the interplay between the Strasbourg case law and the case law of the Court of Justice of the European Union CJEU analysing the relevance of the ECHR for the protection of workers rights and for the effective enjoyment of civil and political rights in the employment relation Each chapter is written by a prominent European human rights expert and analyses the case law of the European Court of Human Rights ECtHR and also looks at the equivalent international labour standards within the Council of Europe in particular the Revised European Social Charter the International Labour Organization ILO in particular the fundamental rights conventions and the UN Covenants in particular the International Covenant on Economic Social and Cultural Rights and the interpretation of these instruments by competent organs The authors also analyse the ways in which the CJEU has acknowledged the respective ECHR articles as general principles of EU

law and asks whether the Lisbon Treaty will also warrant a reassessment of the way it has treated conflicts between these general principles and the so called fundamental freedoms Artificial intelligence and human rights. Rubén Miranda Gonçalves,2021-12-14 We are publishing this book as the result of a research project carried out by the University of Las Palmas de Gran Canaria in Spain and AFM Krakow University in Poland Some parts of it were already announced during a scientific Conference organised remotely in Krak w in October 2020 It is now time to present the research findings in writing The issue of Artificial Intelligence has long raised questions and interests including those of legal science A number of problems have not yet been widely analysed despite the fact that the present time is undoubtedly a time of technological challenges Therefore in the presented publication prepared by the international scientific community under our scientific guidance the authors try to analyse the areas which in their opinion and in our opinion required such analysis The leitmotif of our scientific work was human rights and their relationship with Artificial Intelligence In presenting the research results in this book we realise that a number of issues still need to be clarified Nevertheless we hope that the work presented for the reader s consideration will constitute an interesting voice in the discussion a point of reference for all those dealing with the legal issues of new technologies and the protection of human rights As the presented book is a collective work the authors essentially present their own views The whole work has been designed to address a broad spectrum of issues in Artificial Intelligence and human rights in a single collection We are convinced that such a broad view will allow everyone interested in the discussed issues to see the essence of contemporary problems faced by the science of law in a multinational perspective We encourage everyone to read the book Laura Miraut Mart nMariusz Zalucki **Pursuing Quality of Life** Leonard Nevarez,2011-03-29 From anxieties over work life balance and entangling technologies to celebrations of cool jobs and great places to live quality of life frames the ways we enhance our lives and legitimate social change today But how does the idea of quality of life envision the greater good and what gets lost as a result This book provides the critical framework for understanding the idea s contexts and tensions that are conspicuously missing in popular discussions professional activities and scholarly research on quality of life With multiple case studies taken across North America and Europe it provides a sociological perspective on the contradictory ways we talk about and pursue quality of life in relation to technology consumerism family work public space rural ways of life and ultimately the final years of life Drawing on contemporary and classical social theory it provides an incisive account of the historical shifts in developed societies over the last half century that have transformed our views and pursuits of quality of life Originally a promise to undertake collective effort and pursue social justice at a moment of unprecedented opportunity quality of life now enshrines a solipsistic ideal with which to accommodate the storms of market forces and political failure California. Court of Appeal (2nd Appellate District). Records and Briefs California (State)., Self-Employment Activities of Women and Minorities Ursula Apitzsch,Maria Kontos,2008-02-08 The discussion on new forms of non privileged self employment of women and minorities

is usually divided into separate discourses on women's opportunities on the one hand and ethnic business on the other. The focus in the discussion about the special resources of migrant entrepreneurship has been above all on the assumed collective traditions of ethnic business and not on the individual emancipative resources of the self-employed. This book has brought the two discourses together. While women and migrants are most vulnerable to social exclusion on the labour market at the same time they are subjects of unrecognized resources for self-employment that have to be taken into account under the special conditions of social citizenship policies in the European Union.
