From Criminal To Courtier The Soldier In Netherlandish Art 1550-1672 History Of Warfare 1:

From Criminal to Courtier David Kunzle, 2021-10-11 The art of the Netherlands Dutch and Flemish is unique in Early Modern Europe in its concern for military cruelty against civilians principally the peasantry Decimated by time and changes in taste this popular iconography proves varied and extensive stretching from Bruegel to and past Rubens Massacres of the Innocents continue to be a favourite subject through the Eighty Years War in contrast to ruling class glorifications of war Dutch patriotic siege prints lay claim to scientific precision in landscapes free of military terror while the idea of military conquest is presented as generous rather than cruel in the ever popular figure of Scipio Africanus Most of the pictorial material is unfamiliar some of it even to specialists and never before published new light is shed on the more familiar phenomena of the civic guard groups and Ter Borch courtier officers good soldiers overcoming a bad image *Soldiers and Settlers in Africa, 1850-1918* Stephen Miller, 2009-09-30 The essays in this volume concentrate on imperial conflict Until recently most historians of empire have concerned themselves with economic issues More recently scholarship has turned to social and cultural aspects of Empire The role of the military however continues to be largely ignored Historians have traditionally viewed the military as an arm of the civil power an institution which did not create policy but faithfully obeyed the directives given to it These essays show that indeed the military thought for itself its officers made policy introduced new strategies and tactics and utilized the services of local settlers and indigenes to pursue the interests of empire and the rank and file informed ideas in Great Britain concerning Africa and Africans Contributors are Edward M Spiers Ian F W Beckett Bill Nasson John Laband Paul Thompson Fransjohan Pretorius Tim Stapleton Ian van der Waag James Thomas Jeffrey Meriwether and Bruce Vandervort **The Military and Society in Russia, 1450-1917** Eric Lohr, Marshall Poe, 2002-11-01 This book explores the interaction of the Russian military and society in the early modern and modern period In contrast to straightforward military histories the volume is concerned with the myriad political economic and cultural currents that shaped the Russian armed forces from their beginnings in Muscovite times to the end of World War I The book begins with an attempt by the editors to provide a large frame in which to place the various contributions What follows are three topical sections including 22 detailed often archival based monographic articles The first section concerns The Military and Society in Muscovy the second section focuses on The Military and Society in Imperial Russia The third part analyzes Patriotism Nationality Religion and the Military *Scottish Soldiers in France in the Reign of the Sun King* Matthew Glozier, 2004-05-01 This volume examines the role and significance of Scottish soldiers in France in the age of the Sun King Louis XIV The study examines the complex relationship of expatriate Scottish soldiers to their homeland and native sovereign within the context of a changing environment for military employment The amity of the so called auld alliance meant little in an age of rapid development in the relationship between armies and the states they served Caught in the middle were a number of Scots attempting to perpetuate traditional modes of employment abroad They found themselves the target of

increasing pressures to commit wholeheartedly to one employer or another The book surveys the history of Scottish soldiers service on the continent generally and in France in particular by examining the specific conditions of military service there in the Sun King s reign with a special focus on the soldiers of the regiment of George Douglas Earl of Dumbarton **A Cumulative Bibliography of Medieval Military History and Technology, Update 2004** Kelly DeVries,2004-12-01 This is the first update of A Cumulative Bibliography of Medieval Military History and Technology which appeared in 2002 It is meant to do two things to present references to works on medieval military history and technology not included in the first volume and to present references to all books and articles published on medieval military history and technology from 2000 to 2002 These references are divided into the same categories as in the first volume and cover a chronological period of the same length from late antiquity to 1648 again in order to present a more complete picture of influences on and from the Middle Ages It also continues to cover the same geographical area as the first volume in essence Europe and the Middle East or again influences on and from this area The languages of these bibliographical references reflect this geography

Aftermaths of War Ingrid Sharp,Matthew Stibbe,2011-02-14 This volume of essays provides the first major comparative study of the role played by women s movements and individual female activists in enabling or thwarting the transition from war to peace in Europe in the crucial years 1918 to 1923 The Chivalric Ethos and the Development of Military Professionalism David J. B. Trim,2003 This volume probes the meaning and significance of military professionalism considers whether it required the waning of the chivalric ethos or merely resulted in it and assesses the influence of both value systems on the rise of Western states **Amphibious Warfare 1000-1700** Trim,Mark C. Fissel,2005-11-01 This volume reconceptualizes amphibious warfare and also fills an important gap in its historiography examining how it was conceived practised and employed from the Crusades through the first wave of European exploration and colonization the Price Revolution and the European wars of religion up to the early Industrial Revolution and the beginnings of a new wave of imperialism Essays examine issues related to strategy operational art tactics logistics and military technology but also consider commerce and culture They reveal that amphibious warfare was often waged for economic reasons and was the quintessential warfare of European imperialism for sea power was required to deliver and sustain land power The volume is lavishly illustrated with 30 plates and twelve maps Contributors Matthew Bennett Louis Sicking Malyn Newitt Jan Glete John F Guilmartin R B Wernham Mark Charles Fissel Guy Rowlands John Stapleton David J B Trim **World Military History Annotated Bibliography** Barton Hacker,2004-12-01 Military institutions and methods of warfare in the non Western world from antiquity through the early 20th century provide the chief subjects of this annotated bibliography of works published before 1967 Especially rich in references to periodical literature it emphasizes military organization and relationships between military and other social institutions rather than wars and battles The bibliography comprises seven parts 1 general and comparative topics including works on the social cultural and biological causes of war 2 the ancient world 3 western

Eurasia since antiquity 4 eastern Eurasia since antiquity 5 sub Saharan Africa and Oceania 6 pre Columbian America and 7 Indians in post contact America **The Complete Soldier** David R. Lawrence, 2009 The period 1603 1645 witnessed the publication of more than ninety books manuals and broadsheets dedicated to educating Englishmen in the military arts Written with the intention of creating the a oecomplete soldiera this didactic literature provided gentlemen with the requisite knowledge to engage in infantry cavalry and siege warfare Drawing on military history and book history this is the first detailed study of the impact of military books on military practice in Jacobean and Caroline England Putting military books firmly in the hands of soldiers this work examines the circles that purchased and debated new titles the veterans who authored them and their influence on military thought and training in the years leading up to the English Civil War

World Military History Bibliography Barton Hacker, 2003-06-01 Preclassical and indigenous nonwestern military institutions and methods of warfare are the chief subjects of this annotated bibliography of work published 1967 1997 Classical antiquity post Roman Europe and the westernized armed forces of the 20th century although covered receive less systematic attention Emphasis is on historical studies of military organization and the relationships between military and other social institutions rather than wars and battles Especially rich in references to the periodical literature the bibliography is divided into eight parts 1 general and comparative topics 2 the ancient world 3 Eurasia since antiquity 4 sub Saharan Africa and Oceania 5 pre Columbian America 6 postcontact America 7 the contemporary nonwestern world and 8 philosophical social scientific natural scientific and other works not primarily historical **Soldiering for God** John F. Shean, 2010-08-23 This new study argues that the religious attitude of the Roman army was a crucial factor in the Christianization of the Roman world Specifically by the end of the third century there was a significant Christian presence within the army which was ready to act in the interests of the faith Conditions at this time were thus ripe for the coming to power of a Christian emperor when Constantine converted to Christianity he could rely upon the enthusiastic support of his Christian soldiers Constantine strengthened his Christian base by initiating policies which accelerated the Christianization of the army The continuation of these policies by Christian Roman emperors eventually allowed them to use the military as a vehicle for the suppression of paganism and heretical Christian sects Crusaders, Condottieri, and Cannon Kagay, Villalon, 2021-10-11 This volume consists of the work of eighteen established and younger scholars and focuses on the Mediterranean as a military arena during the Middle Ages The essays center on several pillars of Mediterranean warfare the crusading movement including the Spanish reconquista the development of gunpowder weaponry the widespread use of mercenaries and warfare as understood by the lawcodes and intellectuals of the period A number of articles in this collection present new answers to old historiographical questions *Crusaders, Condottieri, and Cannon* Donald Joseph Kagay, L. J. Andrew Villalon, 2003 This collection of eighteen essays focuses on various phases of warfare around the medieval Mediterranean Topics of these essays range from crusading activity to the increasing use of mercenaries to the spread of

gunpowder weaponry Coercion, Conversion and Counterinsurgency in Louis XIV's France Roy L. McCullough, 2007 This is a study of the domestic application of armed coercion during the reign of Louis XIV Relying heavily on archival sources this study demonstrates that the coercive inclination of Louis XIV and the coercive potential of the Sun King's army have been overstated 1917: Beyond the Western Front Ian Beckett, 2009-01-31 The growing military political and socio economic costs for all belligerents as the Great War entered its fourth year were increasingly evident liberal democracies and authoritarian states alike having to remobilise public opinion for yet greater sacrifices While the Western Front was facing these challenges 1917 was also marked by the collapse of Tsarist Russia and by food riots resulting both from the Entente's blockade of Central Europe and the revival of unrestricted submarine warfare by the Central Powers Ottoman Turkey was feeling the strain of war as well as British forces advanced in both Palestine and Mesopotamia For states as yet uncommitted to war such as the United States and China 1917 was a year of decision This volume amply illustrates the significance of this crucial year in the global conflict Contributors are Lawrence Sondhaus Eric Grove Keith Grieves Matthew Hughes Kaushik Roy Vanda Wilcox Laura Rowe and Nick Hewitt Three Armies in Britain Douglas Biggs, 2024-01-22 This work reexamines the political and military aspects of the Revolution of 1399 that removed Richard II and placed Henry of Lancaster on the English throne It argues that Henry of Lancaster was not the all conquering hero of 1399 but was rather the leader of a coalition of disaffected noblemen who had old scores to settle with Richard II It also proposes that Richard II was not an incompetent king whose personality disorder's and or tyrannical behavior brought about his fall Rather it argues that the king was in no worse a political position in 1399 than in 1387 or even 1381 As on the previous two great crises of the reign the king forwent a military option of dealing with his opponents and decided to let the issues of 1399 play themselves out on the field of politics Both in 1381 and 1387 this tactic had proven effective and there was nothing to suggest in 1399 that it would not be so again **Instrumental in War** Steven Walton, 2005-05-01 Scientific research and instrumentation are crucial for military action today but they have not always been so This collection investigates 500 years of the relationship between warfare research and instruments both physical and intellectual to understand this interaction With U S English and French examples contributors provide examples from army and naval history to show how governments and individuals made warfare scientific developing instruments stations and organizations that furthered the cause Some developments directly aided war efforts others were parts of normal science in peacetime and others were relatively ineffective in directly bringing about military change These developmental histories shed light on the origins of modern scientific warfare Contributors Steven A Walton William A Lynch Jamel Ostwald Seymour H Mauskopf James R Fleming Gerard P Scharfenberger William M McBride David Alan Grier Sebastien Soubiran Kenton Kroker Deborah J Warner Peter Galison **Military Governors and Imperial Frontiers c. 1600-1800** Andrew Mackillop, Steve Murdoch, 2003-05-15 This volume examines Scotland's experience of and reaction to European expansion between c 1600 1800 Although Scotland lacked an independent empire in

the seventeenth century it gained unfettered access to the global empire of England after 1707 The volume argues that beneath this seemingly stark discontinuity there lay considerable continuity Using a series of case studies on Scottish governors serving in the empires of Denmark Norway Weden and their eighteenth century Russian and British equivalents it highlights the previously underestimated chronological and geographic extent of Scotland s engagement in European expansion It concludes that a blend of informal networks of kinship and local association complemented the official status of Scottish governors and produced a relatively distinctive and effective strategy for participating in imperialism *Noble Ideals and Bloody Realities* Niall Christie, Maya Yazigi, 2006-04-01 The contributions presented in this volume address several issues related to the topic of medieval warfare from a variety of disciplinary perspectives and examining a number of geographical regions The contributors analyze social and economic issues military strategy technological and medical developments ideology and rhetoric and address warfare in Europe the Byzantine Empire and the Muslim world In three parts the contributors explore warfare in theory warfare in practice and warfare as perceived through medieval and modern historiography In doing so they present a number of engaging case studies that will be of use to students and scholars interested in warfare and its effects on medieval society
