**From Etymology to Pragmatics** Eve Sweetser,1990 This book offers a new approach to the analysis of the multiple meanings of English modals conjunctions conditionals and perception verbs Although such ambiguities cannot easily be accounted for by feature analyses of word meaning Eve Sweetser s argument shows that they can be analyzed both readily and systematically Meaning relationships in general cannot be understood independently of human cognitive structure including the metaphorical and cultural aspects of that structure Sweetser shows that both lexical polysemy and pragmatic ambiguity are shaped by our metaphorical folk understanding of epistemic processes and of speech interaction Similar regularities can be shown to structure the contrast among root epistemic and speech act uses of modal verbs multiple uses of conjunctions and conditionals and certain processes of historical change observed in Indo European languages Since polysemy is typically the intermediate step in semantic change the same regularities observable in polysemy can be extended to an analysis of semantic change

Verbal Encounters Roberta Frank,2005-01-01 Due to conquests and colonialism through the centuries it is not unusual for languages and cultures to be influenced by other foreign languages and cultures The modern English language for example owes many of its words to Old Norse and Latin debts dating from contacts made during the Middle Ages Verbal Encounters is a collection of papers on the cultural and linguistic exchange in Old Norse Old English and medieval Latin literature written in honour of Roberta Frank former University Professor of Medieval Studies at the University of Toronto The essays feature new scholarship in the field on topics such as the integral position of Anglo Latin within Anglo Saxon culture and literature constructions of feminine strength and effectiveness in Anglo Saxon literature the

rise of Latin based learning in twelfth century Iceland medieval Icelandic religious poetry and the conversion to Christianity in medieval Scandinavia The essays in *Verbal Encounters* are not merely a fitting tribute to Roberta Frank but also strong contributions to current scholarship on medieval literature and culture

Metaphor Networks R. Trim, 2007-09-19 *Metaphor Networks* focuses on the historical evolution of metaphor and proposes new theories on language change based on substantial empirical data It explores how the metaphors of today are very often linked to images existing in the past and traces metaphor paths back to the Middle Ages and Antiquity The findings reveal that regular patterns of evolution emerge and the aims of the book are to find out what lies behind these patterns

Metaphor in Zulu Eric Hermanson, 2006-09-01 This study examines metaphor in Zulu in the light of conceptual metaphor theory from the perspective of a Bible translator It then considers the possibility of translating Biblical Hebrew metaphor into Zulu Selected Hebrew metaphors in the Book of Amos are analysed according to conceptual metaphor theory and compared with the conceptual metaphor analysis of the corresponding verses in existing Zulu translations thereby increasing the empirical basis of the theory and showing that it is valid for the study of both Biblical Hebrew and Zulu and a useful tool for translators

A Theory of Conventional Implicature and Pragmatic Markers in Chinese Guangwu Feng, 2010-07-16 The overall aim of this book is to advance a Gricean theoretical framework of conventional implicature within which Chinese pragmatic markers can be accommodated It has two linked objectives Firstly it sets out to advance a theory of conventional implicature Conventional implicature is itself a highly controversial term understood very differently by various brands of contemporary pragmatic theory and is a pivotal concept in the debates between the Gricean and Neo Gricean theorists on the one hand and proponents of Relevance Theory on the other This book offers an exemplary analysis and definition of what is involved in these current debates and it both clarifies and problematises a large range of associated issues The second objective is to offer a principled and systematic analysis of pragmatic markers in Chinese Markers of this sort and a range of interconnected categories including discourse particles have been the subject of intense investigation in recent years and this detailed study of Chinese markers is a contribution in this area which is of substantial importance both theoretical and empirical

**Metaphorical Conceptualizations** Ulrike Schröder, Milene Mendes de Oliveira, Adriana Maria Tenuta, 2022-03-07 The book deals with the important shift that has been heralded in cognitive linguistics from mere universal matters to cultural and situational variation The discussions examine cognitive and cultural linguistics theories in relation to the following areas of research i metaphorical conceptualization ii the influence of culture on metaphor metonymy and conceptual blends iii the impact of culture and cognition on metaphorical lexis iv the interface of pragmatics and cognition when metaphor is studied in situ that is in face to face as well as in virtual multimodal interaction v the application of insights from metaphorical conceptualizations to language teaching and vi recent methods for revealing inter cultural metaphorical conceptualizations corpus based approaches gesture studies etc The book brings together cognitive functional and inter cultural approaches

*Aspectual Inquiries* Paula Kempchinsky, Roumyana Slabakova, 2005-02-14 The study of the linguistic reflexes of aspect has been an active field of research in various sub disciplines of linguistics such as syntax semantics including discourse theory and acquisition studies However communication and dissemination of results across these various subfields has often been indirect This volume solves that problem The different angles brought together here give us a comprehensive picture of the representation of aspect in the mind brain of the speaker The papers in this volume represent the results of a workshop on the syntax semantics and acquisition of aspect held in 2002 whose purpose was to foment active cross disciplinary communication A number of the papers examine the syntactic representation of lexical or situation aspect while others focus on the syntactic interaction of lexical aspect with grammatical aspect and of grammatical aspect and tense Other papers examine the role of aspect in discourse representations while a third group of papers reports on results of empirical studies on the acquisition of aspect in both first and second language acquisition and patterns of loss of morphosyntactic reflexes of aspect in language attrition This volume is of interest to researchers and advanced graduate students in syntax semantics discourse representation and language acquisition particularly those working on tense and aspect     *Multimodal Metaphor* Charles J. Forceville, Eduardo Urios-Aparisi, 2009-09-04 Metaphor studies has over the past 30 years become a discipline in its own right mainly because of the cognitive linguistic claim that metaphors characterize thought not just language But most metaphor scholars hitherto focus exclusively on its purely verbal expressions Since both persuasive and narrative discourses in contemporary society increasingly draw on modalities other than language alone sustained research into a broader range of manifestations of metaphor is imperative This volume is the first book length study to investigate multimodal occurrences of metaphor and is of interest to scholars interested in metaphor as well as in multimodal discourse Each chapter investigates metaphors whose identification and interpretation depend on the co presence of at least two of the following modalities language visuals gestures sound music On the basis of case studies in a variety of discourse genres advertising cartoons films comics conversation music amply represented in photographs logos drawings film stills and musical scores the contributors demonstrate that and how metaphor can occur multimodally providing ideas and methodological angles enabling further theorizing and testing in this rapidly expanding field Covering creative as well as conceptual metaphors and where appropriate evaluating cultural factors governing metaphor interpretation the contributors provide a wealth of material for studying the conceptual and rhetorical force of metaphor in contemporary society     *Metaphor Wars* Raymond W. Gibbs, Jr, 2017-05-04 The study of metaphor is now firmly established as a central topic within cognitive science and the humanities We marvel at the creative dexterity of gifted speakers and writers for their special talents in both thinking about certain ideas in new ways and communicating these thoughts in vivid poetic forms Yet metaphors may not only be special communicative devices but a fundamental part of everyday cognition in the form of conceptual metaphors An enormous body of empirical evidence from cognitive linguistics and related disciplines has emerged detailing how conceptual metaphors

underlie significant aspects of language thought cultural and expressive action Despite its influence and popularity there have been major criticisms of conceptual metaphor This book offers an evaluation of the arguments and empirical evidence for and against conceptual metaphors much of which scholars on both sides of the wars fail to properly acknowledge

**Extended Conceptual Metaphor Theory** Zoltán Kövecses,2020-04-23 The phenomenon known as metaphor is an extremely complex mental event we cannot capture its complexity if we tie ourselves to existing standard views on metaphor This book offers fresh insight into metaphor updating an established theory conceptual metaphor theory CMT in the context of current cognitive linguistic theory and clarifying many of the issues that researchers in the study of metaphor have raised against conceptual metaphor theory Starting with an introduction to CMT the subsequent chapters set out propositions for Extended Conceptual Metaphor Theory including a discussion on whether literal language exists at all whether conceptual metaphors are both conceptual and contextual and whether they are both offline and online Providing a fresh take on a constantly developing field this study will enrich the work of researchers in areas ranging from metaphorical cognition to literary studies

*Cognitive Grammar* Ronald W. Langacker,2008-02-04 This book fills a long standing need for a basic introduction to Cognitive Grammar that is current authoritative comprehensive and approachable It presents a synthesis that draws together and refines the descriptive and theoretical notions developed in this framework over the course of three decades In a unified manner it accommodates both the conceptual and the social interactive basis of linguistic structure as well as the need for both functional explanation and explicit structural description Starting with the fundamentals essential aspects of the theory are systematically laid out with concrete illustrations and careful discussion of their rationale Among the topics surveyed are conceptual semantics grammatical classes grammatical constructions the lexicon grammar continuum characterized as assemblies of symbolic structures form meaning pairings and the usage based account of productivity restrictions and well formedness The theory's central claim that grammar is inherently meaningful is thereby shown to be viable The framework is further elucidated through application to nominal structure clause structure and complex sentences These are examined in broad perspective with exemplification from English and numerous other languages In line with the theory's general principles they are discussed not only in terms of their structural characterization but also their conceptual value and functional motivation Other matters explored include discourse the temporal dimension of language structure and what grammar reveals about cognitive processes and the construction of our mental world

English as a Lingua Franca in Cross-cultural Immigration Domains Maria Grazia Guido,2008 This book explores the cognitive and communicative processes involved in the use of English as a Lingua Franca ELF within cross cultural specialized contexts where non native speakers of English i e Western experts and non Western migrants interact The book argues that the main communicative difficulties in such contexts are due precisely to the use of ELF since it develops from the non native speakers transfer of their native language structures and socio cultural schemata into the English they speak

Transfer in fact allows non native speakers to appropriate or authenticate those English semantic syntactic pragmatic and specialized discourse structures that are linguistically and conceptually unavailable to them It follows that there are as many ELF varieties as there are communities of non native speakers authenticating English The research questions justifying the ethnographic case studies detailed in this book are What kind of cognitive frames and communicative strategies do Western experts activate in order to convey their culturally marked knowledge of specialized discourse by using their ELF varieties to non Westerners with different linguistic and socio cultural backgrounds What kind of power asymmetries can be identified when non Westerners try to communicate their own knowledge by using their respective ELF varieties Is it possible to ultimately develop a mode of ELF specialized communication that can be shared by both Western experts and non Western migrants

*Pragmatic Markers and Pragmaticalization* Peter Lauwers, Gudrun Vanderbauwhede, Stijn Verleyen, 2012 In this paper we investigate the evolution from imperatives to discourse markers in Romance with a corpus based approach We focus on the case of items coming from verbs meaning to look in a semasiological perspective Spanish *mira* Portuguese *olha* Italian *guarda* French *regarde* Romanian *uite* We show that they all share many uses among which turn taking introduction of reported speech hesitation phenomenon topic shifting and modalization except for French *regarde* We then establish against Waltereit 2002 that the development of these uses is the result of a process

Embodied Conceptualization or Neural Realization Qingqing Zhao, 2019-08-31 This book focuses on linguistic synaesthesia in a hitherto less studied language Mandarin Chinese and adopts a corpus driven approach to support the analysis and argumentation The study identifies directional tendencies and underlying mechanisms for Mandarin synaesthetic adjectives By doing so it not only provides an added layer of understanding for theories of linguistic synaesthesia but also offers evidence to help refine previous theories such as Embodiment Theory and Conceptual Metaphor Theory In brief the book makes a significant contribution to the development of Cognitive Linguistics The intended readership includes but is not limited to graduate students in linguistics and researchers interested in Chinese linguistics in particular and in lexical semantics and cognitive linguistics in general

**Figurative Thinking and Foreign Language Learning** J. Littlemore, Graham D. Low, 2006-04-12 Many vocabulary items that foreign language learners encounter involve figurative extensions of meaning To understand figurative speech learners often need to employ figurative thinking This book examines figurative thinking considers its contribution to language ability and explores the implications for language teaching and learning

*The Middle Voice* Suzanne Kemmer, 1993-01-01 This book approaches the middle voice from the perspective of typology and language universals research The principal aim is to provide a typologically valid characterization of the category of middle voice in terms of which it can be incorporated in a cognitively based theory of human language The term middle voice has had a wide range of applications in the linguistic literature of this century The main thesis in this volume is that there is a coherent though complex semantic category of middle voice in human language which receives grammatical instantiation in many

languages The author claims there is a semantic property crucial to the nature of the middle which she terms relative elaboration of events that serves as a parameter along which the reflexive and the middle can be situated as semantic categories intermediate in transitivity between one participant and two participant events and which differentiates reflexive and middle from one another In this area most analyses deal with one language and or are limited to Indo European languages This work deals with a subset of middle marking languages that was chosen so as to observe the highest possible number of different middle systems showing significant independent diachronic development     Relational Semantics and the Anatomy of Abstraction Tamar Sovran, 2013-09-05 This book presents a study of meaning relations linking the philosophical tradition of conceptual analysis with recent theories and methodologies in cognitive semantics Its main concern is the extent to which analyzing meaning relations between cognate words reveal the infrastructure of the actual and mental lexicon assuming that language mirrors thought Sovran aims to elucidate their infrastructure and the metaphorical and perceptual models that constitute abstract concepts dealing finally with the role of abstraction in poetic metaphors Overall this volume addresses major contemporary issues in the philosophy of language and theoretical semantics
