## “The Perfect Paragraph”

Sharks are a group of fish characterized by a cartilaginous skeleton, five to seven gills, and pectoral fins that are not fused to the head. Today's sharks are classified with the Selachimorpha clade, a sister group to the rays. However, the term “shark” has also been used for extinct members of the subclass Elasmobranchii outside the Selachimorpha, such as Cladoseleache. Under this broader definition, the earliest known sharks date from more than 420 million years ago.
