The People of the Sea Paul D'Arcy, 2006-03-31 Oceania is characterized by thousands of islands and archipelagos amidst the vast expanse of the Pacific Although it is one of the few truly oceanic habitats occupied permanently by humankind surprisingly little research has been done on the maritime dimension of Pacific history The People of the Sea attempts to fill this gap by combining neglected historical and scientific material to provide the first synthetic study of ocean people interaction in the region from 1770 to 1870 It emphasizes Pacific Islanders varied and evolving relationships with the sea during a crucial transitional era following sustained European contact Countering the dominant paradigms of recent Pacific Islands historiography which tend to limit understanding of the sea's importance this volume emphasizes the flux in the maritime environment and how it instilled an expectation and openness toward outside influences and the rapidity with which cultural change could occur in relations between various Islander groups The author constructs an extended and detailed conceptual framework to examine the ways in which the sea has framed and shaped Islander societies He looks closely at Islanders diverse responses to their ocean environment including the sea in daily life sea travel and its infrastructure maritime boundaries protecting and contesting marine tenure attitudes to unheralded seaborne arrivals and conceptions of the world beyond the horizon and the willingness to voyage He concludes by using this framework to reconsider the influence of the sea on historical processes in Oceania from 1770 to the present and discusses the implications of his findings for Pacific studies

The Evolution of Social Institutions Dmitri M. Bondarenko, Stephen A. Kowalewski, David B. Small, 2020-09-12 This book presents a novel and innovative approach to the study of social evolution using case studies from the Old and the New World from prehistory to the present This approach is based on examining social evolution through the evolution of social institutions Evolution is defined as the process of structural change Within this framework the society or culture is seen as a system composed of a vast number of social institutions that are constantly interacting and changing As a result the structure

of society as a whole is also evolving and changing The authors posit that the combination of evolving social institutions explains the non linear character of social evolution and that every society develops along its own pathway and pace Within this framework society should be seen as the result of the compound effect of the interactions of social institutions specific to it Further the transformation of social institutions and relations between them is taking place not only within individual societies but also globally as institutions may be trans societal and even institutions that operate in one society can arise as a reaction to trans societal trends and demands The book argues that it may be more productive to look at institutions even within a given society as being parts of trans societal systems of institutions since despite their interconnectedness societies still have boundaries which their members usually know and respect Accordingly the book is a must read for researchers and scholars in various disciplines who are interested in a better understanding of the origins history successes and failures of social institutions

Peoples of the Pacific Paul D'Arcy,2017-05-15 Presenting the history of the inhabitants of the Pacific Islands from first colonization until the spread of European colonial rule in the later 19th century this volume focuses specifically on Pacific Islander European interactions from the perspective of Pacific Islanders themselves A number of recorded traditions are reproduced as well as articles by Pacific Island scholars working within the academy The nature of Pacific History as a sub discipline is presented through a sample of key articles from the 1890s until the present that represent the historical evolution of the field and its multidisciplinary nature The volume reflects on how the indigenous inhabitants of the Pacific Islands have a history as dynamic and complex as that of literate societies and one that is more retrievable through multidisciplinary approaches than often realized

Seafaring Women David Cordingly, 2009-03-25 For centuries the sea has been regarded as a male domain but in this illuminating historical narrative maritime scholar David

Cordingly shows that an astonishing number of women went to sea in the great age of sail Some traveled as the wives or mistresses of captains others were smuggled aboard by officers or seamen And Cordingly has unearthed stories of a number of young women who dressed in men s clothes and worked alongside sailors for months sometimes years without ever revealing their gender His tremendous research shows that there was indeed a thriving female population from pirates to the sirens of myth and legend on and around the high seas A landmark work of women s history disguised as a spectacularly entertaining yarn *Women Sailors and Sailor s Women* will surprise and delight [The Naturalist and His 'beautiful Islands'](#) David Russell Lawrence,2014-10-28 I know no place where firm and paternal government would sooner produce beneficial results than in the Solomons Here is an object worthy indeed the devotion of one s life Charles Morris Woodford devoted his working life to pursuing this dream becoming the first British Resident Commissioner in 1897 and remaining in office until 1915 establishing the colonial state almost singlehandedly His career in the Pacific extended beyond the Solomon Islands He worked briefly for the Western Pacific High Commission in Fiji was a temporary consul in Samoa and travelled as a Government Agent on a small labour vessel returning indentured workers to the Gilbert Islands As an independent naturalist he made three successful expeditions to the islands and even climbed Mt Popomanaseu the highest mountain in Guadalcanal However his natural history collection of over 20 000 specimens held by the British Museum of Natural History has not been comprehensively examined The British Solomon Islands Protectorate was established in order to control the Pacific Labour Trade and to counter possible expansion by French and German colonialists It remaining an impoverished largely neglected protectorate in the Western Pacific whose economic importance was large scale copra production with its copra considered the second worst in the world This book is a study of Woodford the man and what drove his desire to establish a colonial protectorate in the Solomon Islands In doing so it also addresses ongoing issues not so much why the independent state broke down but how imperfectly it was put together in the first place [Mathematics and Astronomy in the Ancient World](#) Daniel Patrick Morgan,Tang Quan,2025-09-26 This book contains an edited selection of the papers presented at the Second International Conference on the History of Ancient Mathematics and Astronomy ICHAMA organized by Tang Quan and Qu Anjing and held in Xi an 2 8 December 2018 commemorating the foundation This collection consisting of papers that have been refined and edited into scientific articles provides an overview of how the history of science can be international stepping beyond area studies without being Euro centric Containing chapters written by East Asia scholars who do not publish widely in English the volume opens an important window into their projects and the state of scholarship in their respective countries in relation to the history of mathematics and astronomy As the contributions span a spectrum of senior and junior scholars they are of great interest to an academic audience of researchers and post graduate students in the history of science and the history of mathematics and astronomy in particular [Women Sailors and Sailors' Women](#) David Cordingly,2001-04-15 For centuries the sea has been regarded as a male domain Fisherman navy officers pirates and

explorers roamed the high seas while their wives and daughters stayed on shore. Ocean-going adventurers and the crews of their ships were part of an all male world or were they? In this illuminating historical narrative maritime scholar David Cordingly shows that in fact an astonishing number of women went to sea in the great age of sail. Some traveled as the wives or mistresses of captains. A few were smuggled aboard by officers or seamen. A number of cases have come to light of young women dressing in men's clothes and working alongside the sailors for months and sometimes years. In the U.S. and British navies it was not uncommon for the wives of bosuns, carpenters and cooks to go to sea on warships. Cordingly's tremendous research shows that there was indeed a thriving female population from female pirates to the sirens of legend on and around the high seas. A landmark work of women's history disguised as a spectacularly entertaining yarn, *Women's Sailors* and *Sailor's Women* will surprise and delight readers. *Pacific Islands Monthly*, 1978
