A Study in Consciousness Annie Besant, 1904

Cosmic Consciousness Richard Maurice Bucke, 2006-07-01

All at once without warning of any kind he found himself wrapped around as it were by a flame colored cloud. Directly afterwards came upon him a sense of exultation of immense joyousness accompanied or immediately followed by an intellectual illumination quite impossible to describe. Into his brain streamed one momentary lightning flash of the Brahmic Splendor which has ever since lightened his life from First Words. Wildly arrogant, stunningly bombastic and undeniably fascinating. This 1901 work, the masterpiece of an eclectic genius whose life encompassed medical science, mystical transcendence and prospecting for gold, posits a higher form of sentience that only a few humans have ever achieved among them Jesus, Buddha, Mohammed, Dante, William Blake and the author himself, of course. As Bucke shares his metaphysical experience of the cosmic consciousness and offers evidence for the few instances in history of its occurrence, it may as well be frankly stated at once that the view of the present editor is that Francis Bacon wrote the Shakespeare plays and poems; the reader may well be moved to throw this bizarre and highly intriguing book furiously across the room if the reader can put it down at all. That is Canadian mystic and doctor RICHARD MAURICE BUCKE. 1837-1902 was a pioneer in the medical treatment of mental illness; his famous friendship with Walt Whitman was the subject of the 1992 movie *Beautiful Dreamers*. He also wrote *Man's Moral Nature* 1879 and an 1883 authorized biography of Whitman.

The Consciousness Instinct Michael S. Gazzaniga, 2018-04-03

The *Consciousness Instinct* could be the clearest and most compelling attempt to demystify the mind yet written. Julian Baggini, *The Wall Street Journal*. How do neurons turn into minds? How does physical stuff—atoms, molecules, chemicals and cells—create the vivid and various worlds inside our heads? The problem of consciousness has gnawed at us for millennia. In the last century there have been massive breakthroughs that have rewritten the science of the brain and yet the puzzles faced by the ancient Greeks are still present. In *The Consciousness Instinct*, the neuroscience pioneer Michael S. Gazzaniga puts the latest research in conversation with the history of human thinking about the mind, giving a big picture view of what science has revealed about consciousness. The idea of the brain as a machine, first proposed centuries ago, has led to assumptions about the relationship between mind and brain that dog scientists and philosophers to this day. Gazzaniga asserts that this model has it backward: brains make machines, but they cannot be reduced to one. New research suggests the brain is actually a confederation of independent modules working together. Understanding how consciousness could emanate from such an organization will help define the future of brain science and artificial intelligence and close the gap between brain and mind. Captivating and accessible, *The Consciousness Instinct* sets the course for the neuroscience of tomorrow. A rare opportunity to watch a scientific champion grapple with

perhaps our most formidable mystery Eliezer J Sternberg The Washington Post Fascinating Kirkus Reviews starred review One of the great pleasures of this book is watching Gazzaniga's own brain at work Alan Alda *Transitions Between Consciousness and Unconsciousness* Guido Hesselmann, 2019-06-04 The empirical study of consciousness is in constant progress New ideas and approaches arise methods are being debated and refined and experimental research over the last two decades has produced a rich body of data acquired in the aim to better understand consciousness and its neural underpinnings This volume synthesises this data focusing on how to understand the relations and transitions between consciousness and unconsciousness alongside exploring and distinguishing conscious experience of sensory stimuli and unconscious states Bringing together leading academics and promising young scientists from across the fields of psychology and neuroscience *Transitions between Consciousness and Unconsciousness* discusses controversial topics and ideas providing an overview of current research trends and opinions as well as perspectives on theoretical and methodological questions This is an essential volume for consciousness researchers and students from across psychology neuroscience and philosophy as well as those researching modes of visual processing **Hegel's Epistemological Realism** K.R. Westphal, 2012-12-06 The scope of this study is both ambitious and modest One of its ambitions is to reintegrate Hegel's theory of knowledge into main stream epistemology Hegel's views were formed in consideration of Classical Skepticism and Modern epistemology and he frequently presupposes great familiarity with other views and the difficulties they face Setting Hegel's discussion in the context of both traditional and contemporary epistemology is therefore necessary for correctly interpreting his issues arguments and views Accordingly this is an issues oriented study I analyze Hegel's problematic and method by placing them in the context of Sextus Empiricus Descartes Kant Carnap and William Alston I discuss Carnap rather than a Modern empiricist such as Locke or Hume for several reasons One is that Hegel himself refutes a fundamental presupposition of Modern empiricism the doctrine of knowledge by acquaintance in the first chapter of the *Phenomenology* a chapter that cannot be reconstructed within the bounds of this study Consciousness Susan Blackmore, 2013-11-26 Is there a theory that explains the essence of consciousness Or is consciousness itself just an illusion The last great mystery of science consciousness is a topic that was banned from serious research for most of the last century but is now an area of increasing popular interest as well as a rapidly expanding area of study for students of psychology philosophy and neuroscience This ground breaking textbook by best selling author Susan Blackmore was the first of its kind to bring together all the major theories of consciousness studies from those based on neuroscience to those based on quantum theory or Eastern philosophy The book examines topics such as how subjective experiences arise from objective brain processes the basic neuroscience of consciousness altered states of consciousness out of body and near death experiences and the effects of drugs dreams and meditation It also explores the nature of self the possibility of artificial consciousness in robots and the question of whether animals are conscious The new edition has been fully revised to include the latest developments in

neuroscience brain scanning techniques and artificial consciousness and robotics The new website includes self assessment exercises advanced further reading flashcards and MCQs For all those intrigued by what it means to be to exist this book could radically transform your understanding of your own consciousness **Origins of Consciousness: How the Search to Understand the Nature of Consciousness is Leading to a New View of Reality** Adrian David Nelson,2015-07-04 In recent years science and philosophy have seen a resurgence of open mindedness toward deeper views of consciousness This book explores ideas and evidence now changing the way scientists and philosophers approach the place of consciousness in the universe From the frontiers of modern physics and cosmology to controversial experiments exploring telepathy and mind matter interaction the emerging view promises to change how we understand our place in the universe our relationship to other life and the nature of reality itself **Being and Nothingness** Jean-Paul Sartre,1992 Sartre explains the theory of existential psychoanalysis in this treatise on human reality *Transformation of Consciousness* Tomáš Keltner,2010-10

Poonja,2000-02-01 A collection of spontaneous satsangs or truths spoken from Sri H W L Poonja s experience of the highest and yet simplest truth that we are pure love and consciousness the totality of existence Reveals thousands of ways to help us inquire into who we really are to bring our awareness into the infinity of the moment and surrender to the wisdom of our Truth **How to Be an Existentialist** Gary Cox,2011-09-29 A concise and humorous introduction to existentialism aimed squarely at a general readership and available in paperback for the first time

Content and Consciousness ,2010 Content and Consciousness is an original and ground breaking attempt to elucidate a problem integral to the history of Western philosophical thought the relationship of the mind and body In this formative work Dennett sought to develop a theory of the human mind and consciousness based on new and challenging advances in the field that came to be known as cognitive science This important and illuminating work is widely regarded as the book from which all of Dennett s future ideas developed It is his first explosive rebuttal of Cartesian dualism and one of the founding texts of philosophy of mind *The Edinburgh Review* ,1831 **The Philosophy of Consciousness Without an Object** Franklin Merrell-Wolff,1973 Cosmic Consciousness Richard Maurice Bucke,2000-12 In one of the classic books on the mystical experience Buck outlines the development of various faculties in the history of man and the growth of an individual He believes we are witnessing a continuous psychical revolution and that people like Buddha and Jesus to name a couple are the forerunners of the beings who will eventually inhabit the earth
