From Detached Concern To Empathy Humanizing Medical Practice:

From Detached Concern to Empathy M.D., Ph.D. Jodi Halpern, 2001-05-10 Physicians recognize the importance of patients' emotions in healing yet believe their own emotional responses represent lapses in objectivity. Patients complain that physicians are too detached. Halpern argues that by empathizing with patients rather than detaching, physicians can best help them. Yet there is no consistent view of what precisely clinical empathy involves. This book challenges the traditional assumption that empathy is either purely intellectual or an expression of sympathy. Sympathy, according to many physicians, involves over-identifying with patients, threatening objectivity and respect for patient autonomy. How can doctors use empathy in diagnosing and treating patients without jeopardizing objectivity or projecting their values onto patients? Jodi Halpern, a psychiatrist, medical ethicist, and philosopher, develops a groundbreaking account of emotional reasoning as the core of clinical empathy. She argues that empathy cannot be based on detached reasoning because it involves emotional skills including associating with another person's images and spontaneously following another's mood shifts. Yet she argues that these emotional links need not lead to over-identifying with patients or other lapses in rationality but rather can inform medical judgement in ways that detached reasoning cannot. For reflective physicians and discerning patients, this book provides a road map for cultivating empathy in medical practice. For a more general audience, it addresses a basic human question: how can one person's emotions lead to an understanding of how another person is feeling. **The Ethos of**

Medicine in Postmodern America Arnold R. Eiser, 2013-12-24 Has postmodern American culture so altered the terrain of medical care that moral confusion and deflated morale multiply faster than both technological advancements and ethical resolutions? *The Ethos of Medicine in Postmodern America* is an attempt to examine this question with reference to the cultural touchstones of our postmodern era: consumerism, computerization, corporatization, and destruction of meta-narratives. The cultural insights of postmodern thinkers such as Foucault, Deleuze, and Guattari, Lyotard, Baudrillard, Bauman, and Levinas help elucidate the changes in healthcare delivery that are occurring early in the twenty-first century. Although only Foucault among this group actually focused his critique on medical care itself, their combined analysis provides a valuable perspective for gaining understanding of contemporary changes in healthcare delivery. It is often difficult to envision what is happening in the psychosocial-cultural dynamic of an epoch as you experience it. Therefore, it is useful to have a technique for refracting those observations through the lens of another system of thought. The prism of postmodern thought offers such a device with which to view the eclipse of changing medical practice. Any professional practice is always thoroughly embedded in the social and cultural matrix of its society, and the medical profession in America is no exception. In drawing upon the insights of key Continental thinkers such as American scholars, this book does not necessarily endorse the views of postmodernism but trusts that much can be learned from their insight. Furthermore, its analysis is informed by empirical information from health services research and the sociology of medicine. Arnold R. Eiser develops a new understanding of

healthcare delivery in the twenty first century and suggests positive developments that might be nurtured to avoid the barren Silicon Cage of corporate bureaucratized medical practice Central to this analysis are current healthcare issues such as the patient centered medical home clinical practice guidelines and electronic health records This interdisciplinary examination reveals insights valuable to anyone working in postmodern thought medical sociology bioethics or health services research
