Human Rights, Human Security, and State Security Saul Takahashi, 2014-07-15. This book provides innovative thinking from a variety of perspectives on the important human rights, human security, and national security policy issues of today and how these issues intersect. The issue of human security comes into play in nearly every important policy debate in global politics, and the protection of human rights is now recognized as one of the main functions of any legitimate modern state. How can the international community best ensure that human rights are protected while simultaneously protecting state security? Who should intervene in cases of mass gross violations, and when are military actions justified? This book seeks to address and explore these difficult and pressing questions by presenting the differing views of commentators from various ends of the spectrum. Human Rights, Human Security, and State Security: The Intersection consists of three volumes, each focusing primarily on one of the three broad areas while also drawing connections between them. A powerful resource for policy makers and practitioners in national governments, members of international organizations, and scholars, the innovative thinking presented will give readers a deepened understanding of the various international issues and help them to formulate effective policies in today's complex international landscape.

Stabilization and Human Security in UN Peace Operations Alexander Gilder, 2021-11-29. UN peace operations are increasingly asked to pursue stabilization mandates with lofty expectations of being able to stabilize conflict zones, achieve national reconciliation, and rebuild state legitimacy. This book investigates the relationship between UN stabilization mandates and the concept of human security. The book is divided into three parts. Part I outlines the emergence of stabilization and other trends in peacekeeping practice and outlines an analytical framework of human security. Part II applies the analytical framework to case studies of MINUSMA, MINUSCA, and UNMISS, examining issues such as human rights, empowerment, protection, and vulnerability. In Part III, the book draws out several concerns that arise from stabilization mandates, including the militarisation of UN peace operations and the consequences under international humanitarian law, the risks of close cooperation with the host state, and engagement in counter terror activities, and the potential clash between peacebuilding activities and militarisation. The book will be a valuable resource for
