**Knowledge-Based Decision Support for Integrated Water Resources Management with an Application for Wadi Shueib, Jordan** David Riepl, 2014-05-13 This book takes a two staged approach to contribute to the contemporary Integrated Water Resources Management (IWRM) research. First it investigates sub-basin scale IWRM modelling and scenario planning. The Jordanian Wadi Shueib is used as exemplary case study. Then it develops a framework to collaboratively manage planning and decision making knowledge on the basis of semantic web technologies. Future IWRM initiatives can benefit from the valuable insights achieved in the presented study.

This valuable book is a compilation of the latest research in the area of IT utilization and management. The Theory of Info-Dynamics: Rational Foundations of Information-Knowledge Dynamics Kofi K. Dompere, 2017-12-06 This book focuses on the development of a theory of info dynamics to support the theory of info statics in the general theory of information. It establishes the rational foundations of information dynamics and how these foundations relate to the general socio natural dynamics from the primary to the derived categories in the universal existence and from the potential to the actual in the ontological space. It also shows how these foundations relate to the general socio natural dynamics from the potential to the possible to give rise to the possibility space with possibilistic thinking from the possible to the probable to give rise to possibility space with probabilistic thinking and from the probable to the actual to give rise to the space of knowledge with paradigms of thought in the epistemological space. The theory is developed to explain the general dynamics through various transformations in quality quantity space in relation to the nature of information flows at each variety transformation. The theory explains the past present future connectivity of the evolving information structure in a manner that illuminates the transformation problem and its solution in the never ending information production within matter energy space under socio natural technologies to connect the theory of info statics which in turn presents explanations to the transformation problem and its solution. The theoretical framework is developed with analytical tools based on the principle of opposites, systems of actual potential polarities, negative positive dualities under different time structures with the use of category theory, fuzzy paradigm of thought and game theory in the fuzzy stochastic cost benefit space. The rational foundations are enhanced with categorical analytics. The value of the theory of info dynamics is demonstrated in the explanatory and prescriptive structures of the transformations of varieties and categorical varieties at each point of time and over time from parent offspring sequences. It constitutes a general explanation of dynamics of information knowledge production through info processes and info processors induced by a socio natural infinite set of technologies in the construction destruction space. **Information, Knowledge, and Technology for Teaching and**

**Research in Africa** Dennis Ocholla, Omwoyo Bosire Onyancha, Aderonke Olaitan Adesina, 2024-08-27 This book focuses on information seeking and the knowledge economy for teaching and research in Africa. The book first explores the evolution and current state of information seeking behavior research, demonstrating its importance in informing practice, policy, and design of information systems. Despite the informal sector's substantial contributions to the national economy in Uganda, there is a lack of studies delving into its information needs as well as an information gap in government, NGOs, and other stakeholders. The book proposes that an appropriate information behavior model for information-poor communities such as informal entrepreneurs must be grounded on oral traditions and indigenous knowledge and should be sensitive to poverty, infrastructure, and illiteracy. The negative impact of the lack of financial literacy skills for women entrepreneurs is investigated, and solutions for this problem are suggested, including regular assessments of women entrepreneurs' financial literacy skills and the introduction of training courses. The role of academic libraries in universities, library services for students with disabilities, and accessibility of library services to students with disabilities is discussed, and theoretical models for enhancing service in academic libraries are presented. The book highlights the specific challenges and opportunities related to information literacy for secondary schools and concludes by examining the rapid changes in library and information science research in South Africa.

Perceptions of Knowledge Visualization: Explaining Concepts through Meaningful Images Ursyn, Anna, 2013-10-31 Multisensory perception is emerging as an important factor in shaping current lifestyles. Therefore, computer scientists, engineers, and technology experts are acknowledging the comparative power existing beyond visual explanations. *Perceptions of Knowledge Visualization: Explaining Concepts through Meaningful Images* discusses issues related to visualization of scientific concepts, picturing processes and products, as well as the role of computing in the advancement of visual literacy skills. By connecting theory with practice, this book gives researchers, computer scientists, and academics an active experience which enhances the perception and the role of computer graphics.

*Information, Knowledge, Evolution and Self* Wayne Talbot, 2016-02-04 To understand this subject in relation to the overarching narrative of evolution, one must first understand a simple scientific fact: one that is generally hidden by imprecise language. Material storage devices, irrespective of whether they be synthetic or organic, do NOT and CANNOT store information. The same is to be said for communications of any form through any media. I realise that this may be difficult to accept, so let me explain. Firstly, the word information is the noun equivalent of the verb to inform, and thus if a communication does not inform you, it is not information to you. It may be information to somebody else, but that is irrelevant in the context of an individual's cognitive processing and knowledge. In the context of evolution, we must always consider the individual organism, for that is where the mechanisms of evolution are said to occur, before impacting a wider group. This is not a science book in the accepted sense, for I am not a scientist. The target readership is people like myself, well educated in a number of fields, enthusiastic amateurs, if you like, but willing and able to see through the fog of technical language and

unsupported assertions to discern the truth for themselves Of course I would welcome readership amongst the scientific community but such people should understand that some of the rigorous norms of scientific publications are absent from this work
