The Electric Century J.B. Williams, 2017-06-29 This book is about how electricity has profoundly changed the way we live work and play Some twenty topics are covered with an abundance of graphs and images to build a comprehensive picture Each looks at the developments and the people who initiated them together with how one led to the next and their subsequent impact on society Topics include electric supply lighting through X rays and all those appliances that make our homes so comfortable Most homes at the end of the twentieth century were full of electrical equipment much of which was regarded as essential It ran from lights washing machines fridges freezers kettles telephones and so on to the more subtle things such as wipers and starter motors on cars In 1900 in all but a tiny minority of houses there were none of these things It is very difficult for us now to imagine a world without electrical equipment everywhere and yet it has only taken a century The Electric Century examines how we got from then to now The nineteenth is often described as the century of steam from the impact it had on employment and transport and The Electric Century makes a similar claim as the description of the twentieth Electricity and the equipment using it are so pervasive that they have affected every corner of modern life

Eugenic Design Christina Cogdell, 2004 In 1939 Vogue magazine invited commercial designer Raymond Loewy and eight of his contemporaries including Walter Dorwin Teague Egmont Arens and Henry Dreyfuss to design a dress for the Woman of the Future as part of its special issue promoting the New York World's Fair and its theme The World of Tomorrow While focusing primarily on her clothing and accessories many commented as well on the future woman's physique predicting that her body and mind would be perfected through the implementation of eugenics Industrial designers' fascination with eugenics especially that of Norman Bel Geddes began during the previous decade and its principles permeated their theories of the modern design style known as streamlining In *Eugenic Design* Christina Cogdell charts new territory in the history of industrial design popular science and American culture in the 1930s by uncovering the links between streamline design and eugenics the pseudoscientific belief that the best human traits could and should be cultivated through selective breeding Streamline designers approached products the same way eugenicists approached bodies Both considered themselves to be reformers advancing evolutionary progress through increased efficiency hygiene and the creation of a utopian ideal type Cogdell reconsiders the popular streamline style in U.S. industrial

design and proposes that in theory rhetoric and context the style served as a material embodiment of eugenic ideology With careful analysis and abundant illustrations Eugenic Design is an ambitious reinterpretation of one of America s most significant and popular design forms ultimately grappling with the question of how ideology influences design *Food and Femininity in Twentieth-Century British Women's Fiction* Professor Andrea Adolph,2013-04-28 In her feminist intervention into the ways in which British women novelists explore and challenge the limitations of the mind body binary historically linked to constructions of femininity Andrea Adolph examines female characters in novels by Barbara Pym Angela Carter Helen Dunmore Helen Fielding and Rachel Cusk Adolph focuses on how women s relationships to food cooking eating serving are used to locate women s embodiment within the everyday and also reveal the writers commitment to portraying a unified female subject For example using food and food consumption as a lens highlights how women writers have used food as a trope that illustrates the interconnectedness of sex and gender with issues of sexuality social class and subjectivity all aspects that fall along a continuum of experience in which the intellect and the physical body are mutually complicit Historically grounded in representations of women in periodicals housekeeping and cooking manuals and health and beauty books Adolph s theoretically informed study complicates our understanding of how women s social and cultural roles are intricately connected to issues of food and food consumption London 1849 Michael Alpert,2014-07-10 London 1849 the city is filthy plagued criminal and filling up with refugees from the Irish Famine and the revolutionary wars on the continent but it is on the brink of reform as stations are built rioters pardoned and the Great Exhibition planned The heaving city is the backdrop for the most sensational crime and trial of the decade the Manning murder case Throughout the sticky summer the people of London obsessed over the fate of a dominant mysterious woman and her weak husband as the full detail of their slaughter of her lover unfolded London 1849 follows the murder trial and execution of the couple interweaving the scene that was London at the time crime noise cholera overpacked slums prostitution law and order prisons fashion shopping finance transport Marx and Dickens *The Wired Northwest* Paul W. Hirt,2012-10-18 The Pacific Northwest holds an abundance of resources for energy production from hydroelectric power to coal nuclear power wind turbines and even solar panels But hydropower is king Dams on the Columbia Snake Fraser Kootenay and dozens of other rivers provided the foundation for an expanding regionally integrated power system in the U S Northwest and British Columbia A broad historical synthesis chronicling the region s first century of electrification Paul Hirt s new study reveals how the region s citizens struggled to build a power system that was technologically efficient financially profitable and socially and environmentally responsible Hirt shows that every energy source comes with its share of costs and benefits Because Northwest energy development meant river development the electric power industry collided with the salmon fishing industry and the treaty rights of Northwest indigenous peoples from the 1890s to the present Because U S federal agencies like the Army Corps of Engineers and the U S Bureau of Reclamation built many of the large dams in the region a significant portion of the power supply is

publicly owned initiating contentious debates over how that power should best serve the citizens of the region Hirt dissects these ongoing battles evaluating the successes and failures of regional efforts to craft an efficient yet socially just power system Focusing on the dynamics of problem solving governance and the tense relationship between profit seeking and the public interest Hirt s narrative takes in a wide range of players not only on the consumer side where electricity transformed mills mines households commercial districts urban transit factories and farms but also power companies operating at the local and regional level and investment companies that financed and in some cases parasitized the operators His study also straddles the international border It is the first book to compare energy development in the U S Northwest and British Columbia Both engaging and balanced in its treatment of all the actors on this expansive stage The Wired Northwest helps us better understand the challenges of the twenty first century as we try to learn from past mistakes and re design an energy grid for a more sustainable future

of the time From Submarines to Suburbs is a fascinating analysis of the way corporations made the successful switch from supporting the war effort to building on the peacetime prosperity by re tooling the patriotic fervor of the home front The Evolution of Household Technology and Consumer Behavior, 1800-2000 Julia Sophie Woersdorfer, 2017-03-27 The increasing division and specialization of labor between the market and the nonmarket sector is a central stylized fact of long run economic development Over time a large share of activities which had formerly been carried out by the private household itself has become replaced by market alternatives raising at the same time the demand for consumer goods The neoclassical economic framework of household production theory relates the increasing demand for household technology to rising wages and opportunity costs of time the higher the wage rate the more costly it is to spend time in unpaid housework activities Consumer products are thus purchased to make household production processes more efficient and to substitute capital goods for the household's time time substitution hypothesis Although this hypothesis sounds plausible at first sight it cannot capture the essential phenomena underlying the complex process of the mechanization of the home over the past 200 years Its major weakness lies in the treatment of consumer preferences whose explanatory potential is explicitly factored out Using the washing of clothes as a microcosm of household economics this book examines long term changes in cleanliness consumption patterns from the perspective of an evolutionary economic psychologically informed consumer theory Woersdorfer shows how the historical evolution of cleanliness consumption over the past 200 years is the result of the interplay of supply and demand side factors namely technical change in washing technology on one side and motivational driving forces and consumer learning capabilities on the other Hence not changing relative prices but innate consumer needs and consumer learning processes leading to a growing understanding of how to satisfy those needs are the essential driving forces behind the rising technological endowment of the home and the corresponding demand for household appliances The Evolution of Household Technology and Consumer Behavior 1800 2000 will be of interest to researchers in the field of evolutionary economics history of technology economic history innovation economics and sociology **Work and Society** Tim Strangleman, Tracey Warren, 2008-04-10 Work and Society provides a comprehensive investigation of the major trends in work and employment The changing social order and its impact upon the labour market in recent years alongside the huge changes brought about by new technology and globalization are considered *Fashioning the Feminine* Cheryl Buckley, Hilary Fawcett, 2001-12-21 Representations of fashionable femininity have multiplied throughout the 20th century with complex versions of feminine identity being found in fashion store advertising magazines photography and museum collections This book examines the relationship between women's fashion female representation and femininity in Britain throughout the 1900s The authors unpick the dynamics of the fashion system and set fashion into the context of British social life using the oral history accounts of women of all classes to highlight the meanings of particular fashions
