Gibson,2013-07-01 Detailing the role of women in aviation from the very first days of flight to the present this rich exploration of the subject profiles 26 women pilots who sought out and met challenges both in the sky and on the ground Divided into six chronologically arranged sections this book composes a minihistory of aviation Learn about pioneers such as Katherine Wright called by many the Third Wright Brother and Baroness Raymonde de Laroche of France the first woman awarded a license to fly Read about barnstormers like Bessie Coleman and racers like Louise Thaden who bested Amelia Earhart to win the 1929 Women s Air Derby Additional short biography sidebars for other key figures and lists of supplemental resources for delving deeper into the history of the subject are also included **Women in Long Island's**

Past Natalie A. Naylor,2012-10-23 Women have been part of Long Island s past for thousands of years but are nearly invisible in the records and history books From pioneering doctors to dazzling aviatrixes author Natalie A Naylor brings these larger than life but little known heroines out of the lost pages of island history Anna Symmes Harrison Julia Gardiner Tyler Edith Kermit Roosevelt and Eleanor Roosevelt all served as first lady of the United States and all had Long Island roots Beloved children s author Frances Hodgson Burnett wrote The Secret Garden here and hundreds of local suffragists fought for their right to vote in the early twentieth century Discover these and other stories of the remarkable women of Long Island

Jacqueline Cochran Rhonda Smith-Daugherty,2015-03-10 Although Amelia Earhart remains the best known female pilot of the 1930s Jacqueline Cochran stood as the more important aviation pioneer and America s top woman pilot Among her many accomplishments Cochran was the first female aviator to win the Bendix Air Race to fly a bomber to break the speed of sound and to participate in astronaut training This revealing biography explores Cochran s childhood in an impoverished Florida mill town her early career as a pilot and her role in creating and leading the WASPs during World War II It also chronicles her postwar exploits including her participation in the NASA space program her unsuccessful 1956 bid for

Congress and her surprising reluctance to crusade for the advancement of women This detailed profile removing Cochran from Earhart's shadow firmly establishes the aviatrix as a pivotal figure in the history of women in aviation and in war

A History of Women in Astronomy and Space Exploration Dale DeBakcsy, 2023-05-31 For the last four hundred years women have played a part far in excess of their numerical representation in the history of astronomical research and discovery It was a woman who gave us our first tool for measuring the distances between stars and another who told us for the first time what those stars were made of It was women who first noticed the rhythmic noise of a pulsar the temperature discrepancy that announced the existence of white dwarf stars and the irregularities in galactic motion that informed us that the universe we see might be only a small part of the universe that exists And yet in spite of the magnitude of their achievements for centuries women were treated as essentially second class citizens within the astronomical community contained in back rooms forbidden from communicating with their male colleagues provided with repetitive and menial tasks and paid starvation wages This book tells the tale of how in spite of all those impediments women managed by sheer determination and genius to unlock the secrets of the night sky It is the story of some of science's most hallowed names Maria Mitchell Caroline Herschel Vera Rubin Nancy Grace Roman and Jocelyn Bell Burnell and also the story of scientists whose accomplishments were great but whose names have faded through lack of use Queen Seondeok of Korea who built an observatory in the 7th century that still stands today Wang Zhenyi who brought heliocentrism to China Margaret Huggins who perfected the techniques that allowed us to photograph stellar spectra and thereby completely changed the direction of modern astronomy and Hisako Koyama whose multi decade study of the sun's surface is as impressive a feat of steadfast scientific dedication as it is a rigorous and valuable treasure trove of solar data A History of Women in Astronomy and Space Exploration is not only a book however of those who study space but of those who have ventured into it from the fabled Mercury 13 whose attempt to join the American space program was ultimately foiled by betrayal from within to mythical figures like Kathryn Sullivan and Sally Ride who were not only pioneering space explorers but scientific researchers and engineers in their own rights aided in their work by scientists like Mamta Patel Nagaraja who studied the effects of space upon the human body and computer programmers like Marianne Dyson whose simulations prepared astronauts for every possible catastrophe that can occur in space Told through over 130 stories spanning four thousand years of humanity's attempt to understand its place in the cosmos A History of Women in Astronomy and Space Exploration brings us at last the full tale of women's evolution from instrument makers and calculators to the theorists administrators and explorers who have while receiving astonishingly little in return given us quite literally the universe

Women with Wings: Women Pilots of World War II Shannon Baker Moore, 2017-01-01 Women with Wings discusses how in the 1940s women broke free from traditional gender roles by piloting aircraft both on the homefront and in combat making critical contributions to the Allied victory in World War II Aligned to Common Core Standards and correlated to state standards Essential Library is an imprint

Eric Smith,2023-02-23 Every gravestone in every graveyard can frame a story far more complex than the dates engraved upon it It s common for spouses to be memorialized together as a final affirmation of the commitments made in life or for bereaved parents to be buried with children who tragically preceded them in death Close proximity burials of seemingly unrelated figures can similarly reveal

the tales of people who otherwise walked together in life by choice or by chance For example the Confederate burial of Union Col Robert Gould Shaw was certainly meant as a dishonor as Shaw was buried in an unmarked low lying coastal trench alongside the fallen African American members of the 54th Massachusetts Regiment he had commanded at Fort Wagner After the war however the men s remains were recovered and reinterred meaningfully still together at the newly commissioned Beaufort National Cemetery This book explores a dozen unique examples of such side by side burials over the course of U S history It begins by describing each of the protagonists final chapters before spooling out the tales and significance of their actual journeys to such interwoven endpoints The evolution of funerary practices and observances in the United States is interspersed throughout with a special focus on military honors and burials **Scarborough in the**

Twentieth Century Rodney Laughton, 2004 Located on the coast just eight miles south of Portland Scarborough was fertile territory for the dramatic changes that swept over eastern Maine in the twentieth century This history transports the reader from Scarborough s simpler days as a small coastal community to its current status as the fastest growing town in the state The images contained in this volume most of them previously unpublished showcase advances in transportation the growth of business old homesteads and portraits of some of the movers and shakers of the time This significant collection offers an overview of the history that shaped today s Scarborough
