Finkelstein, 2011 For the Palestinians who live in the narrow coastal strip of Gaza the Israeli invasion of December 2008 was a nightmare of unimaginable proportions In the 22 day long action 1 400 Gazans were killed several hundred on the first day alone And yet while nothing should diminish Palestinian suffering through those frightful days it is possible something redemptive is emerging from the tragedy of Gaza For as Norman Finkelstein details in a concise work that melds cold anger with cool analysis the profound injustice of the Israeli assault was widely recognized by bodies that it is impossible to brand as partial or extremist Amnesty International Human Rights Watch and the UN investigation headed by Richard Goldstone in documenting Israel's use of indiscriminate and intentional force against the civilian population during the invasion 100 Palestinians died for every one Israeli have had an impact on longstanding support for Israel Jews in both the United States and the United Kingdom for instance have begun to voice dissent and this trend is especially apparent among the young Such a shift Finkelstein contends can create new pressure capable of moving the Middle East crisis towards a solution one that embraces justice for Palestinians and Israelis alike This new paperback edition has been revised throughout and includes an extensive afterword on the Israeli attack on the Gaza Freedom Flotilla which resulted in the deaths of nine activists and further strained the loyalty of many of Israel's traditional allies around the world It also contains a brand new appendix in which Finkelstein dissects the official Israeli investigation of the flotilla attack [The Far Horizons of Time](#) H. Chris Ransford, 2015-04-24 What is Time Assuming no prior specialized knowledge by the reader the book raises specific hitherto overlooked questions about how time works such as how and why anyone can be made to be at the very same instant simultaneous with events that are actually days apart It examines abiding issues in the physics of time or at its periphery which still elude a full explanation such as delayed choice experiments the brain's perception of time during saccadic masking and more and suggests that these phenomena can only exist because they ultimately obey applicable mathematics thereby agreeing with a modern view that the universe and everything within it including the mind are ultimately mathematical structures It delves into how a number of conundrums such as the weak Anthropic Principle could be resolved and how such resolutions could be tested experimentally All its various threads converge towards a same new vision of the
