Zacharias,1999 In particular they question whether sprawl was a necessary condition of American industrialization could the agricultural base that preceded and surrounded the city have survived the onrush of residential real estate speculation with a bit of foresight and public policies that the politically outnumbered farmers could not have secured on their own **A Social Geography of Canada** Guy M. Robinson,2013-12-30 This collection of essays focus on subjects which formed the basis of his life s work the changing character of Canadian landscape and society and the urbanization of that society including aspects of its historical evolution its present spacial forms and current social issues **The Farm and the City** ,1980 *Transnational Crime Fiction* Maarit Piipponen,Helen Mäntymäki,Marinella Rodi-Risberg,2020-10-27 Focusing on contemporary crime narratives from different parts of the world this collection of essays explores the mobility of crimes criminals and investigators across social cultural and national borders The essays argue that such border crossings reflect on recent sociocultural transformations and geopolitical anxieties to create an image of networked and interconnected societies where crime is not easily contained The book further analyses crime texts wider sociocultural and affective significance by examining the global mobility of the genre itself across cultures languages and media Underlining the global reach and

mobility of the crime genre the collection analyses types and representations of mobility in literary and visual crime narratives inviting comparisons between texts crimes and mobilities in a geographically diverse context The collection ultimately understands mobility as an object of study and a critical lens through which transformations in our globalised world can be examined

[Demands On Rural Lands](#) Chris Cocklin, 2019-04-09 Planning for the use of rural lands in the developed countries of the world has become an increasingly contentious process as resources become more limited and conflicting needs grow stronger The critical questions are Which is more important agriculture livestock production recreation industry or urban housing and Who decides priorities and responsibilities for use The capacity of the land to meet all of the demands placed upon it without serious environmental disruption has become a major concern for all Recognizing the exigencies of the situation the contributors define and evaluate the theoretical and methodological frameworks within which rural land use problems can be analyzed In the discussions focus on the identification and characterization of resources and competing users of rural lands stressing that a careful articulation of the problem is essential to effective planning is aimed at developing appropriate information bases useful in planning for the problems related to the management of these rural lands The discussion of policy options for rural resource use

[The Importance of Place in Contemporary Italian Crime Fiction](#) Barbara Pezzotti, 2012-09-20 By taking as its point of departure the privileged relationship between the crime novel and its setting this book is the most wide ranging examination of the way in which Italian detective fiction in the last twenty years has become a means to articulate the changes in the social landscape of the country Nowadays there is a general acknowledgment of the importance of place in Italian crime novels However apart from a limited scholarship on single cities the genre has never been systematically studied in a way that so comprehensively spans Italian national boundaries The originality of this volume also lies in the fact that the author have not limited her investigation to a series of cities but rather she has considered the different forms of social landscape in which Italian crime novels are set Through the analysis of the way in which cities the urban sprawl and islands are represented in the serial novels of eleven of the most important contemporary crime writers in Italy of the 1990s Pezzotti articulates the different ways in which individual authors appropriate the structures and tropes of the genre to reflect the social transformations and dysfunctions of contemporary Italy In so doing this volume also makes a case for the genre as an instrument of social critique and analysis of a still elusive Italian national identity thus bringing further evidence in support of the thesis that in Italy detective fiction has come to play the role of the new social novel

**Cities After Socialism** Gregory Andrusz, Michael Harloe, Ivan Szelenyi, 2011-08-10 Cities After Socialism is the first substantial and authoritative

analysis of the role of cities in the transition to capitalism that is occurring in the former communist states of Eastern Europe and the Soviet Union. It will be of equal value to urban specialists and to those who have a more general interest in the most dramatic socio-political event of the contemporary era: the collapse of state socialism. Written by an international group of leading experts in the field, *Cities after Socialism* asks and answers some crucial questions about the nature of the emergent post-socialist urban system and the conflicts and inequalities which are being generated by the processes of change now occurring. Housing and Planning References, 1981 *New Directions in Urban Geography* Chiranji Singh Yadav, 1986

The Waste Land at 90, 2011-01-01 Presenting work from scholars of various ranks and locations including Canada, Romania, Taiwan, Bosnia Herzegovina, the UK and the USA, this volume offers critical perspectives on what is often considered the most important poem of literary modernism: T. S. Eliot's *The Waste Land*. The essays explore such topics as Eliot's use of sources, his poem's form, his influences, and his alleged misogyny. Building off contemporary work on Eliot and his poem, these essays illustrate the continued importance of *The Waste Land* in our understanding of the last century. This book should be of interest to students and scholars of modernism and modernist poetry. Rural Land-Use Planning in Developed Nations (Routledge Revivals) Paul Cloke, 2013-10-18 This edited collection, first published in 1989, provides a detailed analysis of rural land use policies on a country-specific basis. Case studies include analyses of planning and legislation in Britain, The Netherlands, Japan, the USA and Australia. Alongside a comprehensive overview of the concept and application of rural land use, from Paul Cloke, environment issues, resource management and the role of central governments are topics under discussion throughout. At an international level, this title will be of particular interest to students of rural geography and environmental planning. Geographies of Agriculture Guy Robinson, 2014-01-14 Agricultural Geography has changed dramatically in recent decades, reflecting the transformation of the farming industry itself. *Geographies of Agriculture* embraces these changes, applying ideas and methods from contemporary social science as it moves beyond farm-based production to address current issues affecting the production and consumption of food and fibre throughout the world. The book places special emphasis on topics that reflect globalisation processes: integration of agriculture into the wider agri-food system, concern with attaining sustainable production systems, and the importance of both government and supra-government policies. Examples are drawn from North America, Western Europe and the developing world. *Geographies of Agriculture* will appeal especially to Geography students but should also be of interest to a broader range of students in Sociology, Economics and Development Studies, and anyone interested in agriculture, food production and consumption, and rural development.
