Farmers Seed Production New Approaches And Practices:

Farmers' Seed Production Conny Almekinders, N. P. Louwaars, 1999 This handbook covers a whole range of issues relating to local seed supply systems including participatory plant breeding and both technical and practical information on seed production and variety maintenance It suggests new approaches and methods to support on farm seed production by small scale farmers in developing countries The first part of the book describes the functioning of local seed systems and discusses their strengths limitations and possibilities for improvement The authors discuss in detail issues of genetic diversity and in situ conservation farmers rights and legislation The cases presented here illustrate the functioning of local seed systems and experiences with improving them The second part contains technical information on seed production selection storage and distribution and varietal maintenance and improvement of different groups of important food crops which can be applied and implemented at the level of small scale farming The third part contains practical guidelines about how on researchers and agriculturalists might carry out surveys to investigate local seed systems and their limitations and how they can involve interested farmers in practical experimentation to improve their crop seed This book will be of great value and interest to people who work directly with farmers including extension agents national and international NGOs and farmers cooperative workers

Community Seed Production Sustainability in Rice-Wheat Farming Narayan Prasad Khanal, Keshav Lall Maharjan, 2015-05-07 This book analyzes the sustainability of community seed production under a rice wheat farming system from microeconomic perspectives considering how seed producers benefit from community seed production and how those benefits continue into the future Seed producers performance in resource management governance and marketing strategies indicates current benefits whereas soil conservation and risk management practices provide the basis for future benefits Community seed production is a local level seed management system owned by farmers This system provides the institutional mechanism to supply diversified seed demands of open pollinated varieties of food crops in a cost effective way in rural regions Being able to address the concerns of food insecurity poverty climate stress and biodiversity loss in programs and policies of development agencies community seed production is gaining popularity among the farmers and the policy makers in developing countries This book discusses the issues of organizational governance of the community seed producers groups and links them with household level benefits to understand the organizational dynamism and the probable development paths of such organizations in the future It also highlights the necessity to institutionalize lessons learned in community seed production in the stakeholders programs and policies These understandings provide a basis for formulating policies for strengthening the system in developing countries Students researchers policy makers and donor agencies working with CSP in the developing world will find this book useful in broadening their understanding of CSP in general and its sustainability in particular

Farmers, Scientists, and Plant Breeding David Arthur Cleveland, Daniela Soleri, 2002-01-01 The purpose of this book is to examine the nature of and relationship between the knowledge of farmers

and of scientists and how these can be best integrated in plant breeding Mainstreaming efficient legume seed systems in Eastern Africa Food and Agriculture Organization of the United Nations,2019-03-13 Legumes are important components of sustainable farming systems They are useful to diversify and intensify cropping systems fix atmospheric nitrogen and improve soil health act as rotation crops increase and diversify smallholder incomes and lower the carbon footprint mitigating climate change Legumes can therefore play a critical role in achieving the Sustainable Development Goals However as this publication points out their production is challenged by various policy regulatory institutional and technical factors including a lack of attention from the public sector and limited opportunity to attract private sector investment

Globalization and New Geographies of Conservation Karl S. Zimmerer,2006-09-15 Examining the geographical dimensions of environmental management and conservation activities implemented on landscapes worldwide *Globalization and New Geographies of Conservation* creates a new framework and collects original case studies to explore recent developments in the interaction of humans and their environment *Globalization and New Geographies of Conservation* makes four important arguments about the recent coupling of conservation and globalization that is reshaping the place of nature in human environmental change First it has led to an unprecedented number of spatial arrangements whose environmental management goals and prescribed activities vary along a spectrum from strict biodiversity protection to sustainable utilization involving agriculture food production and extractive activities Conservation and globalization are also leading by necessity to new scales of management in these activities that rely on environmental science thus shifting the spatial patterning of humans and the environment This interaction results as well in the unprecedented importance of boundaries and borders transnational border issues pose both opportunities and threats to global conservation proposed by organizations and institutions that are themselves international Lastly *Globalization and New Geographies of Conservation* argues that the local level has been integral to globalization while the regional level is often eclipsed at the peril of the successful implementation of conservation and management programs Bridging the gap between geography and life science *Globalization and New Geographies of Conservation* will appeal to a broad range of students of the environment conservation planning biodiversity management and development and globalization studies *Seeds: Proceedings of the Oxford*
