Wray, 2016-12-15 This highly practical and readable book gets right down into the detail of what good formative assessment looks like in math classrooms and shows how teachers can make this a part of their regular planning and instruction. Dylan Wiliam, Emeritus Professor of Educational Assessment, University College London. Imagine how it would feel to not worry about how to plan, teach and check for student mathematical understandings and related proficiencies. Imagine if this important process felt like a natural, every day part of your lesson preparation instead of an extra thing to do. This must have resource shows the way. NCTM Past President Francis Skip Fennell and nationally recognized mathematics educators Beth McCord Kobett and Jonathan Jon Wray offer five of the most impactful, proven assessment techniques: Observations, Interviews, Show Me, Hinge Questions and Exit Tasks. You can implement every day. Tried and tested by teachers just like you, you'll find that this palette of classroom-based techniques will truly assess learning and inform teaching. Research and classroom practice indicates that formative assessment is poorly understood. This book gives you a concise, research-based classroom dedicated plan with lots of tools, activities, classroom vignettes and student work to guide your daily use of these techniques. *The Formative 5* Both within and between lessons, K-8 teachers of mathematics will learn to think and go beyond assessment of learning, focusing on assessment for learning.
