

The background of the cover features several technical line drawings of fishing gear. On the left, there is a vertical net structure with a complex frame. In the center, a long, thin net or line extends horizontally. On the right, there are two large, curved net structures, possibly trawls or seines, shown in profile. The drawings are rendered in a light color, likely white or light yellow, against a dark, textured background.

A Fishery Manager's Guidebook Kevern L. Cochrane, Serge M. Garcia, 2009-06-15 Co published with the Food and Agriculture Organization of the United Nations Fisheries management is the process that has evolved to try to ensure that fisheries operate in a manner that provides the immediate benefits in a sustainable manner The widely accepted goal is that the full range of benefits should not only be available for this generation but for generations to come Fisheries management has been successful in some cases but there have also been many many cases of failure This volume is intended to contribute to improving this unsatisfactory state by addressing the widespread need for information and guidance on the broad and often complex task of fisheries management It is an updated and expanded edition of the first version of A fishery manager's guidebook which was published as a FAO Fisheries Technical Paper in 2002 The major part of this new edition is divided into five parts intended to cover the range of concerns tools and techniques essential to the modern fisheries manager whether that manager is an individual or a formal or informal group Following the Introduction Part I examines the primary dimensions of fisheries biological ecological social and economic Part II looks at the legal and institutional characteristics of fisheries Part III explores the tools that fishery managers have to achieve the objectives expected from a fishery Part IV discusses the role of scientific information of indicators and reference points Part V moves into implementation of fisheries management and includes a chapter on special considerations in small scale fisheries This landmark publication is aimed at fishery managers and scientists All libraries in research establishments and universities where fisheries and aquatic sciences are studied and taught will need copies of this important volume Fisheries around the world make essential contributions to human well being including the provision of basic food supplies employment recreational opportunities foreign currency and others providing benefits to hundreds of millions of people Despite these benefits our record of managing fisheries so that the benefits can be sustained has been poor at best and most fisheries around the world are experiencing serious ecological social or economic problems and usually all three Today there is global concern about the state of fishery resources and aquatic ecosystems their resilience to future stresses such as climate change and their ability to continue to provide benefits *A Fishery Manager's Guidebook* K. L. Cochrane, 2002-01-01 This publication was prepared to promote and to provide support in the implementation of the Code of Conduct for Responsible Fisheries especially Article 7 Fisheries Management As such it also supplements the FAO Technical

Guidelines for Responsible Fisheries NO 4 Fisheries management It is intended primarily for the practising fishery manager and decision maker with particular emphasis on developing countries although it is hoped that the volume will also be of interest to managers in developed countries
