"I have read and admired all her books, and this one is no exception. It has a rich, lyrical quality, and a remarkable sense of what are the best times. At the same time, it is remarkably detailed. Finally, and surely we have, the only best life. I can only say that this is a great piece."

Far Eastern Beginnings:

On the Frontiers of History Tessa Morris-Suzuki, 2020-08-17 Why is it that we so readily accept the boundary lines drawn around nations or around regions like Asia as though they were natural and self evident when in fact they are so mutable and often so very arbitrary What happens to people not only when the borders they seek to cross become heavily guarded but also when new borders are drawn straight through the middle of their lives The essays in this book address these questions by starting from small places on the borderlands of East Asia and looking outwards from the small towards the large asking what these minor pasts tell us about the grand narratives of history In the process it takes the reader on a journey from Renaissance European visions of Tartary through nineteenth century racial theorising imperial cartography and indigenous experiences of modernity to contemporary debates about Big History in an age of environmental crisis **General Register**

origins in the historians of Greece and Rome through the annalists and chroniclers of the middle ages to the historians of the late eighteenth century The author concentrates on those writers whose works fit into a specific category of writing or who have influence the course of later historical writing though he does deal with some of the more specialist forms of medieval historiography such as the crusading writers and chivalrous historians like Froissart He maintains that modern history did not develop until the 18th Century Institute of Pacific Relations United States. American Isolationists Roger B. Jeans, 2020-12-17 With war on the horizon in the late 1930s many Americans still angry over the outcome of the Great War determined not to get involved in another global conflict Called isolationists or anti interventionists many of them especially the America First Committee focused their attention on the European war when it broke out in September 1939 Most were less interested in Japan's aggression in East Asia which left an opening for another isolationist group the Committee on Pacific Relations which opposed war with Japan right up to the day of the Japanese attack on Pearl Harbor In this first full study of pro Japan isolationists Roger B Jeans provides a detailed history of the committee which was launched in September 1941 a scant ten weeks before the beginning of the war Its driving force was Missourian Orland Kay O K Armstrong who traveled widely during the late 1930s and early 1940s recruiting prominent Americans for his movement against war with Japan He and his colleagues were often critical of US policies and of China the victim of Japanese aggression As a result they were often ostracized as pro Japanese Jeans draws on previously untapped sources the personal letters of committee members and the dossiers the FBI compiled on them to paint a rich picture of this little known group

A History of Korea Michael J. Seth, 2010-10-16 In this comprehensive yet compact book Michael J Seth surveys Korean history from Neolithic times to the present He explores the origins and development of Korean society politics and its still little known cultural heritage from their inception to the two Korean states of today Telling the remarkable story of the origins and evolution of a society that borrowed and adopted from abroad Seth describes how various tribal peoples in the peninsula came together to form one of the world's most distinctive communities He shows

how this ancient culturally and ethnically homogeneous society was wrenched into the world of late nineteenth century imperialism fell victim to Japanese expansionism and then became arbitrarily divided into two opposed halves North and South after World War II Tracing the past seven decades the book explains how the two Koreas with their deeply different political and social systems and geopolitical orientations evolved into sharply contrasting societies South Korea after an unpromising start became one of the few postcolonial developing states to enter the ranks of the first world with a globally competitive economy a democratic political system and a cosmopolitan and dynamic culture North Korea by contrast became one of the world s most totalitarian and isolated societies a nuclear power with an impoverished and famine stricken population Seth describes and analyzes the radically different and historically unprecedented trajectories of the two Koreas formerly one tight knit society Throughout he adds a rich dimension by placing Korean history into broader global perspective and by including primary readings from each era All readers looking for a balanced knowledgeable history will be richly rewarded with this clear and concise book
