Bibliography of Agriculture ,1957 Wasted Michael Redclift,2020-09-10 Sustainable development cannot be achieved solely at the international level Without the creation of more sustainable livelihoods it will remain a utopian and elusive goal Yet given the huge differences in economic development and levels of consumption between North and South how might this be brought about Taking the 1992 Rio Summit as its point of departure Wasted examines what we now need to know and what we need to do to live within sustainable limits One of the key issues is how we use the environment converting natural resources into human artifices commodities and services In the process of consuming we also create sinks Today these sinks the empty back pocket in the global biogeographical system are no longer empty The fate of the global environment is indissolubly linked to our consumption particularly in the energy profligate North To understand and overcome environmental challenges we need to build the outcomes of our present consumption rates into our future behaviour to accept sustainable development as a normative goal for societies one that is bound up with our everyday social practices and actions In this absorbing book Michael Redclift argues that the way we understand and think about the environment conditions our responses and our ability to meet the challenge and discusses tangible policies for increased sustainability that are grounded in recent research and practice

Beloved Community Casey Nelson Blake,2000-11-09 The Young American critics Randolph Bourne Van Wyck Brooks Waldo Frank and Lewis Mumford are well known as central figures in the Greenwich Village Little Renaissance of the 1910s and in the postwar debates about American culture and politics In

Beloved Community Casey Blake considers these intellectuals as a coherent group and assesses the connection between their cultural criticisms and their attempts to forge a communitarian alternative to liberal and socialist politics Blake draws on biography to emphasize the intersection of questions of self culture and society in their calls for a culture of personality and self fulfillment In contrast to the tendency of previous analyses to separate these critics cultural and autobiographical writings from their politics Blake argues that their cultural criticism grew out of a radical vision of self realization through participation in a democratic culture and polity He also examines the Young American writers interpretations of such turn of the century radicals as William Morris Henry George John Dewey and Patrick Geddes and shows that this adversary tradition still offers important insights into contemporary issues in American politics and culture Beloved Community reestablishes the democratic content of the Young Americans ideal of personality and argues against viewing a monolithic therapeutic culture as the sole successor to a Victorian culture of character The politics of selfhood that was so critical to the Young Americans project has remained a contested terrain throughout the twentieth century Bulletin ...
