It offers a deep exploration of various sectors such as the global oil industry, natural gas industry, new energy industry, low carbon market, and electricity market. Since 2023, there have been significant adjustments in the global energy market. The geopolitical situation in the Middle East is unstable, resulting in fluctuating international oil prices and a profound transformation in the trade flow of crude oil. Additionally, the global natural gas trade pattern is undergoing reshaping. China is accelerating the construction of a new energy system with the gradual increase in the proportion of renewable energy consumption, the development and improvement of the domestic carbon market, and the gradual expansion of green electricity trading.
