Gallego, Aritz Irurtzun, 2020-12-24 The study of language has changed substantially in the last decades In particular the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers judgments surveys corpus studies or fieldwork This move is an enriching feature of contemporary linguistics allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact Chomsky 2005 This has generated some sort of divergence not only in research approaches but also in the phenomena studied with an increasing specialization between subfields and accounts At the same time it has also led to subfield isolation and methodological a priori with some researchers even claiming that theoretical linguistics has little to offer to cognitive science see for instance Edelman Phillips den Dikken Bernstein Tortora Sprouse Sch tze Phillips 2013      Deaf Cognition Marc Marschark, Peter C Hauser, 2008-06-30 Deaf Cognition examines the cognitive underpinnings of deaf individuals learning Marschark and Hauser have brought together scientists from different disciplines which rarely interact to share their ideas and create this book It contributes to the science of learning by describing and testing theories that might either over or underestimate the role that audition or vision plays in learning and memory and by shedding light on multiple pathways for learning International experts in cognitive psychology brain sciences cognitive development and deaf children offer a unique integrative examination of cognition and learning with discussions on their implications for deaf education Each chapter focuses primarily on the intersection of research in cognitive psychology developmental psychology and deaf education The general theme of the book is that deaf and hearing individuals differ to some extent in early experience brain development cognitive functioning memory organization and problem solving Identifying similarities and differences among these domains provides new insights into potential methods for enhancing achievement in this traditionally under performing population      **The Routledge Companion to Education** James Arthur, Andrew Peterson, 2013-07-23 The Routledge Companion to Education presents the most comprehensive up to date guide available to the major topics and theories in education Forty specially commissioned chapters covering all aspects of education introduce you to the key thinkers events ideas research and issues that have shaped the field of education      **Synergies of English for Specific Purposes and Language Learning Technologies** Milorad Tošić, 2017-06-23 Bilingualism and multilingualism both make a major contribution in cross cultural interaction but at the same time improve various cognitive abilities such as better attention and multitasking Meaning in the world around us is represented by means of the language that is used for communication and knowledge exchange between intelligent individuals The phenomena of human interaction and communication are recently experiencing unprecedented influence from digital technologies Language learning is part of the global revolution meaning that language learning technologies are playing an increasingly important role in learning English for Specific Purposes This volume addresses

**Family Language Transmission** Brigitte E. Lambert, 2008 This book examines the whys and wherefores of family language transmission from the perspective of parents as language planners and managers of their linguistic resources It draws on a qualitative interview based study of twenty families in which German is was or could have been the target language Successive census analyses have charted a marked decline in the number of German speakers in Australia indicating that motivation for transmitting German has waned The situations where it is presently being transmitted are therefore particularly interesting Data analysis was facilitated by a decision map depicting the planning implementation and outcome phases of the transmission undertaking The main findings show that the parents decision is negotiated around their own needs interests and ambitions in terms of child focussed reciprocal and parent centred motives These in turn are linked to transmission strategies and the linguistic outcomes for the children Through an understanding of the motivational issues arising in this context it will hopefully be possible to better predict the effectiveness of the transmission strategies presently applied
