The Effectiveness of World Bank Support for Community-based and -driven Development ,2005-01-01

Participatory approaches that involve local communities in their own development have gained substantial support among international donors over the past quarter century and have become increasingly important in the work of the World Bank. Community participation is an approach to development that can be used with any Bank lending instrument and across sectors. Projects can involve communities in different ways by sharing information, consulting, collaborating or empowering them. The process of involving communities in project activities is also expected to contribute in most cases to communi

Multilateral Banks and the Development Process Vinod Thomas, 2017-07-05. A chain is only as strong as its weakest link. When the links in the chain represent development projects, if individual projects fail to achieve their purpose, the development program's effectiveness is compromised. When the chain's links are strong and well connected, the results are improved for the sector, country, and region. The role of multilateral banks is crucial; they inform the impact of development operations and support policymakers in decision making. This volume emphasizes that some crucial links in development tend to be systematically overlooked. In these matters, preoccupation with the immediate exigencies seems to come at the expense of attention to enduring problems at a great cost to society. Development practitioners should apply policies that have produced results over time, ensuring that the links in the chain are strong, but too often they overlook those links because of myopia, complexity, tradition, or special interests. This book will help policy makers and practitioners focus on the links that measure progress and matter for lasting results.

Diverging Paths of Development in Central Asia Gül Berna Özcan, 2018-11-09. Newly gained sovereignty, uneven penetration of neo-liberal ideals, and the growth of disparate capitalist markets have elicited varied responses in Central Asia. What does development mean for the political class and for ordinary citizens? What are the effects of new capitalist institutions and markets? What impact did western development blueprints and external donor engagement leave in the region? This book illuminates the diverse realities of post-Soviet development in Central Asia through a multidisciplinary prism. The contributing articles are grounded in a range of social science disciplines, including architecture, anthropology, and geography. The analyses demonstrate how a synthesis of specialist knowledge from area studies and individual disciplinary methodologies can provide well-grounded critical positions on development. The book highlights the complexities of everyday routines of dispossession and coping strategies in the face of natural and manmade disasters. These experiences create deep moral anxieties under the debilitating effects of monetisation and marketisation of ordinary livelihoods, social ties, and environmental resources. This book was originally published as a special issue of *Central Asian Survey*.

OECD,1992-11-14 *An Impact Evaluation of India's Second and Third Andhra Pradesh Irrigation Projects* Howard White,2008 The Independent Evaluation Group IEG of the World Bank has undertaken impact evaluations of the Bank s support to irrigation in Andhra Pradesh India under AP Irrigation II and III and of the U K Department for International Development supported Rural Livelihoods Project RLP This is one of a series of IEG impact evaluations see appendix H IEG s program of impact evaluation is in part carried out under a Department for International Development IEG partnership agreement hence the focus on RLP However survey villages are also covered by the Bank supported DPIIP project so that the findings are also relevant to this project World Bank Engagement at the State Level World Bank,2010-04-21 This report is a pilot cross country study that summarizes 10 years 1998 2008 of the World Bank s engagement at the state level in selected large federal countries and combines elements of a country assistance evaluation and a thematic review It looks at several strategic and operational questions posed by state level engagement among them the selection of states the scope and the modalities of engagement According to the report two tendencies often in tension featured in most approaches for selection of states for direct engagement One was to support better performing reformist states while the other was to support the poorest states as a more direct route to reducing poverty Overall the study confirms the desirability of continued selective lending in a few focus states Among other findings the Bank s engagement with progressive reformist states has added value and has been highly appreciated but in order to enhance the poverty impact of state level interventions greater weight should be given to the needs of poorest states by balancing states propensity to reform and the concentration of poverty within them continued focus on public finance management appears sound irrespective of whether engagement is confined to this area or serves as an entry point for broader engagement there is considerable scope for greater impact from knowledge transfer between states and countries and expanded knowledge services to the state level clients **Budget**
