## **Efficiency Equity And Legitimacy The Multilateral Trading System In The Millennium:**

**Efficiency, Equity, and Legitimacy** Roger B. Porter, 2001 Despite its widely acknowledged contribution to global prosperity over the past half century the movement toward further liberalization has increasingly been challenged This collection of essays examine several key issues at the heart of the debate over the multilateral trading system *Efficiency, Equity and Legitimacy*, 2000 Trading Services in the Global Economy Juan R. Cuadrado Roura, Luis Rubalcaba-Bermejo, J. R. Bryson, 2002-01-01 This book provides one of the first interdisciplinary reviews of the relationship between services globalisation and trade liberalisation as we enter the twenty first century Written by academics and policymakers it contains a detailed analysis of the characteristics of service trade and of recent and current service trade negotiations **Symbolic Power in the World Trade Organization** Matthew Eagleton-Pierce, 2013 Questions of power are central to understanding global trade politics and no account of the World Trade Organization WTO can afford to avoid at least an acknowledgment of the concept A closer examination of power can help us to explain why the structures and rules of international commerce take their existing forms how the actions of countries are either enabled or disabled and what distributional outcomes are achieved However within conventional accounts there has been a tendency to either view power according to a single reading namely the direct coercive sense or to overlook the concept entirely focusing instead on liberal cooperation and legalization In this book Matthew Eagleton Pierce shows that each of these approaches betray certain limitations which in turn have cut short or worked against more critical appraisals of power in transnational capitalism To expand the intellectual space the book investigates the complex relationship between power and legitimation by drawing upon Pierre Bourdieu's notion of symbolic power A focus on symbolic power aims to alert scholars to how the construction of certain knowledge claims are fundamental to and entwined within the material struggle for international trade Empirically the argument uncovers and plots the recent strategies adopted by Southern countries in their pursuit of a more equitable trading order By bringing together insights from political economy sociology and law Symbolic Power in the WTO not only enlivens and enriches the study of diplomatic practice within a major multilateral institution it also advances the broader understanding of power in world politics Science and Risk Regulation in International Law Jacqueline Peel, 2010-11-04 The regulation of risk is a preoccupation of contemporary global society and an increasingly important part of international law in areas ranging from environmental protection to international trade This book examines a key aspect of international risk regulation the way in which science and technical expertise are used in reaching decisions about how to assess and manage global risks An interdisciplinary analysis is employed to illuminate how science has been used in international legal processes and global institutions such as the World Trade Organization Case studies of risk regulation in international law are drawn from diverse fields including environmental treaty law international trade law food safety regulation and standard setting biosafety and chemicals regulation The book also addresses the important question of the most appropriate balance between science and

non scientific inputs in different areas of international risk regulation      *State Agency and the Patenting of Life in International Law* Bitá Amani, 2009 This important and timely volume considers competing international obligations in relation to the patenting of life offering a pragmatic two step approach to state agency to resolve apparent conflicts between the regulatory options afforded by economic globalization and the need to forge domestic laws that reflect community values

**Dilemmas of a Trading Nation** Mireya Solís, 2017-08-01 The balancing of competing interests and goals will have momentous consequences for Japan and the United States in their quest for economic growth social harmony and international clout Japan and the United States face difficult choices in charting their paths ahead as trading nations Tokyo has long aimed for greater decisiveness which would allow it to move away from a fragmented policymaking system favoring the status quo in order to enable meaningful internal reforms and acquire a larger voice in trade negotiations And Washington confronts an uphill battle in rebuilding a fraying domestic consensus in favor of internationalism essential to sustain its leadership role as a champion of free trade In *Dilemmas of a Trading Nation* Mireya Solís describes how accomplishing these tasks will require the skillful navigation of vexing tradeoffs that emerge from pursuing desirable but to some extent contradictory goals economic competitiveness social legitimacy and political viability Trade policy has catapulted front and center to the national conversations taking place in each country about their desired future direction economic renewal a relaunched social compact and projected international influence *Dilemmas of a Trading Nation* underscores the global consequences of these defining trade dilemmas for Japan and the United States decisiveness reform internationalism

At stake is the ability of these leading economies to upgrade international economic rules and create incentives for emerging economies to converge toward these higher standards At play is the reaffirmation of a rules based international order that has been a source of postwar stability the deepening of a bilateral alliance at the core of America s diplomacy in Asia and the ability to reassure friends and rivals of the staying power of the United States In the execution of trade policy today we are witnessing an international leadership test dominated by domestic governance dilemmas

### **Constitutionalism, Multilevel Trade Governance and Social Regulation**

Christian Joerges, Ernst-Ulrich Petersmann, 2006-10-19 This is a book about the ever more complex legal networks of transnational economic governance structures and their legitimacy problems It takes up the challenge of the editors earlier pioneering works which have called for more cross sectoral and interdisciplinary analyses by scholars of international law European and international economic law private international law international relations theory and social philosophy to examine the interdependences of multilevel governance in transnational economic social environmental and legal relations Two complementary strands of theorising are expounded One argues that globalisation and the universal recognition of human rights are transforming the intergovernmental society of states into a cosmopolitan community of citizens which requires more effective constitutional safeguards for protecting human rights and consumer welfare in the national and international governance and legal regulation of international trade The second emphasises the dependence of the functioning of international markets and liberal trade on governance arrangements which respond credibly to safety and environmental concerns of consumers traders political and non governmental actors Enquiries into the generation of international standards and empirical analyses of legalization and judicialisation practices form part of this agenda The perspectives and conclusions of the more than 20 contributors from Europe and North America cannot be uniform But they converge in their search for a constitutional architecture which limits empowers and legitimises multilevel trade governance as well as in their common premise that respect for human rights private and democratic self government and social justice require more transparent participatory and deliberative forms of transnational cosmopolitan democracy Trading Fish, Saving Fish Margaret A. Young, 2011-04-14 Numerous international legal regimes now seek to address the global depletion of fish stocks and increasingly their activities overlap The relevant laws were developed at different times by different groups of states They are motivated by divergent economic approaches influenced by disparate non state actors and implemented by separate institutions such as the World Trade Organization and the United Nations Food and Agriculture Organization Margaret Young shows how these and other factors affect the interaction between regimes Her empirical and doctrinal analysis moves beyond the discussion of conflicting norms that has dominated the fragmentation debate Case studies include the negotiation of new rules on fisheries subsidies the restriction of trade in endangered marine species and the adjudication of fisheries import bans She explores how regimes should interact in fisheries governance and beyond to offer insights into the practice and legitimacy of regime interaction in international law **Making Global Trade Governance Work for Development** Carolyn Deere Birkbeck, 2011-08-18 Discussion of the governance of global trade and the multilateral trading system is too often dominated by developed country scholars and opinion makers with inadequate attention given to developing country perspectives Making Global Trade Governance Work for Development gathers a diversity of developing country views on how to improve the governance of global trade and the WTO to better advance sustainable development and

respond to the needs of developing countries With contributions by senior scholars commentators and practitioners the essays combine new empirically grounded research with practical insights about the trade policy making process They consider the specific governance issues of interest to developing countries and acknowledge the changing dynamics in the global economy and in trade decision making *International Governance in the Wto* Tomer Broude,2004 **The International Trading System** Alice Landau,2005-02-03 The World Trade Organization WTO is without doubt one of our main instruments of globalization the controversy which is whipped up by this organization is arguably mainly caused by the mystery which surrounds it The International Trade System seeks to remove the clouds of misunderstanding that circle the multilateral commercial system by clearly **Environmental Management** Michael V.
