Globalisation and Education Policy Reform in Botswana Richard Tabulawa, 2023-07-21 This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana's Independence in 1966 the book evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures The result of this interplay has been an

education landscape that while reflecting globally circulating education discourses markedly differs from those same discourses The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future As the first book of its kind to delve into education in Botswana from a single authored critical lens the book will be a highly relevant reading for academics researchers and post graduate students of African education comparative education education policy and curriculum studies Cross Cultural Perspectives On Educational Research Robinson-Pant, Anna,2005-11-01 Winner of the BMW Group LIFE Award for Contribution to Intercultural Learning 2007 The research student population of higher educational institutions continues to expand to include people from an ever widening range of cultural and educational backgrounds However many research methods courses are still directed at the traditional student population This book examines aspects of postgraduate research from a cross cultural perspective analysing the dilemmas faced by international students when defining a research question choosing research methods collecting data deciding which language to use and writing their theses Through an exploration of how international students re examine their beliefs and research practices during their study in the UK this book challenges the assumptions of all those engaged in educational research addressing key questions such as How do our teaching and learning experiences shape our approach to educational research How do we judge good educational research What does it mean to be critical The book uses the real life experiences of international students to illuminate the kinds of challenges they may face It supports both students and their supervisors showing students how to approach cultural differences and supervisors how to deal sensitively with the problems encountered by overseas students in their research
