Key constructs like motivation, development, beliefs, literacy, and emotions are given substantive updates while entire new chapters touch on trends that have materialized since the publication of the third edition, such as inquiry, world views, Critical Race Theory, cognitive neuroscience, and emerging technologies in education. Throughout this new edition, chapter authors coalesce on issues of social justice, situated approaches to inquiry, and progressive inquiry methods. The Handbook of Educational Psychology Fourth Edition will be an important reference volume for current and future EDP LMS scholars, broadly conceived, as well as for teacher educators, practicing teachers, policy makers, and the academic libraries serving these audiences. Supplement Dr Robert E Slavin, PH D, 2007-07-24 The Eighth Edition of this popular text from renowned educational psychologist Robert Slavin translates theory into practices that teachers can use in their classrooms with a further inquiry into the concept of intentionality and a thorough integration of standards. This edition maintains its in-depth practical coverage with a focus on the intentional teacher by presenting up to the minute research that a reflective intentional teacher can apply. An intentional teacher, according to Slavin, is one who constantly reflects on his or her practice and makes instructional decisions based on a clear conception of how these practices affect students. To help readers become intentional teachers, the author offers a set of questions to guide them and models best practices through classroom examples. Firmly rooted in research up to date theory and classroom tested applications, Educational Psychology prepares teachers as no other text does. It teaches them to think about how students develop and learn to make decisions before and during instruction and to consider what constitutes evidence that their students are learning and succeeding. This edition includes a new focus on reflection, new cases, sections on brain research, programs for language minority students, technology, No Child Left Behind, and after school and summer school programs. It contains new critiques of assessment and accountability strategies and a substantially updated treatment of programming for students with special needs.
